## MASTER OF HEALTH CARE ADMINISTRATION PROGRAM

The Master of Health Care Administration (MHA) Program prepares students to become leaders in today's complex health care environment. This 47.0 credit hour program emphasizes health system and business literacy, management, leadership, and professional development. All courses are offered in a fully online format. Students have five years from admission to complete the MHA Program.

### Mission

The Master of Health Care Administration Program educates and equips early to mid-career professionals to enter the health sector through an asynchronous competency-driven curriculum and interprofessional experiences to obtain entry to mid-level health care leadership positions.

### **Vision**

To emerge as a national leader in online health care administration education distinguished by our focus on training health care leaders who are prepared for an evolving health care landscape.

### **Values**

- Accountability
- Collaboration
- Honesty
- · Inclusiveness
- Wellness

### STUDENT LEARNING OUTCOMES

The Master of Health Care Administration (MHA) program at Des Moines University is adopting National Center for Healthcare Leadership (NCHL) Healthcare Leadership Competency Model (Version 3.0). The NCHL 3.0 model includes 4 action domains and three enabling domains. The model includes 28 core competencies, each with specific behavioral descriptions. The DMU MHA program aligns didactic preparation and assessment to these 28 competencies.

## **Program Requirements**

To be eligible to apply for admission to the Master of Health Care Administration program at DMU, applicants must have a bachelor's degree from a regionally accredited institution from within the United States or equivalent evaluation from a DMU approved international evaluation service.

Additional information regarding admission to the program can be found on the MHA Program Admissions Requirements <u>website</u> as well as the MHA Program Admissions Criteria <u>website</u>.

### **Program Application Process**

Application to the Master of Health Care Administration program is accepted through the Centralized Application Service for Public Health (SOPHAS), Health Administration, Management & Policy Centralized Application Service (HAMPCAS), or directly through the DMU website.

Detailed information regarding the process can be found on the MHA program admissions <u>website</u>.

Applicants' admissions accounts will reflect updates throughout the process.

A student may request up to 12 hours of graduate credit from a previously-attended accredited institution after being admitted to the program. The request should be submitted by completing the <a href="MHA">MHA</a>
<a href="Transfer Credit Request form">Transfer Credit Request form</a>. Approved transfer credits will be entered on the student's permanent record by the Registrar's Office. Additional information is outlined in the MHA/MPH Transfer Credit policy.

### **Curriculum Overview and Outline**

The program's recommended sequence allows students to master foundational skills that may be applied to their real-world professional experiences on day one, while building advanced competencies throughout the curriculum. The program culminates in a field based learning project in which students act as consultants to a health care organization to apply what they've learned through a collaborative project. Students may choose to complete a long term care internship or a field based learning project.

## **Program Outcomes**

To review various programmatic outcomes statistics (e.g., assessment information, completion rates, graduate survey data, student satisfaction information, etc.), please visit the program's outcomes webpage.

## **Nursing Home Administrator License**

Completing the MHA degree at DMU may fulfill the requirements to be licensed by the Iowa Board of Examiners for Nursing Home Administrators. For licensure, the state of Iowa requires a specialized field-based learning experience in long-term care along with the completion of required course work. To fulfill these requirements, MHA students may complete an Administrator In Training (AIT) program or similar experience to satisfy the Field Based Learning requirement. Students outside of Iowa may also complete an AIT or similar experience to satisfy the MHA Field Based Learning requirement, but are responsible for ensuring licensure requirements for their state are met.

# **Technical Standards for Admission, Academic Promotion and Graduation**

The purpose of this document is to specify the technical standards the University deems necessary for a student to matriculate, remain in good standing and ultimately achieve all the competencies necessary for graduation within their program. The University, therefore, requires candidates to confirm their ability to comply with these standards, with or without accommodation, as a condition of admission and on an annual basis thereafter.

Fulfilment of the technical standards for graduation does not guarantee that a graduate will be able to fulfill the technical requirements of any specific residency program or employment setting.

A candidate who is seeking a MPH or MHA degree at Des Moines University must be capable of completing core educational requirements and achieving all Foundational Knowledge items (MPH only), all core competencies (MHA and MPH), and all concentration competencies (MPH) to qualify for graduation. DMU seeks to develop candidates who will acquire a deep and robust knowledge base with the ability to apply it, effectively interpret information, and contribute to decisions across a broad spectrum of public health and/or health care management settings. The critical skills required to be successful are outlined

below, and include the ability to observe, communicate, understand, integrate core knowledge and skills, and to behave appropriately in varied educational and professional situations.

Reasonable accommodations may be required by otherwise qualified individual candidates to meet the technical standards specified below. Requests for University-provided accommodations will be granted if the requests are reasonable, do not cause a fundamental alteration of the education program, do not cause an undue hardship, are consistent with the standards of the public health and/or health care management profession, and are recommended by the Accommodations and Educational Support Specialist.

- Observation: Candidates and students must be able to acquire required information from readings, lectures, educational materials, and demonstrations.
- 2. Communication: Candidates and students must be able to demonstrate proficiency in the English language such that they can communicate effectively in oral and written form with all members of the public health and/or health care team. Candidates and students must be able to communicate with others in order to elicit and share information. They must have the capacity for comfortable verbal and non-verbal communication and interpersonal skills that enable effective collaboration within a multidisciplinary team. In any case where a candidate's ability to communicate is compromised, the candidate must demonstrate alternative means and/or abilities to communicate.
- 3. Intellectual, Conceptual, Integrative, and Quantitative Abilities:
  Candidates and students must have the ability to accurately measure, calculate, reason, analyze, synthesize, problem solve, and think critically. They must also have the ability to participate and learn through a variety of modalities including, but not limited to, digital learning and communication environments, classroom instruction, small groups, teams, and collaborative activities. Candidates and students must be able to concentrate, timely analyze and interpret data, and make decisions within areas in which there is a reasonable amount of visual and auditory distraction.
- 4. Behavioral Attributes, Social Skills, and Professional Expectation: Candidates and students must be able to effectively utilize their intellectual abilities, exercise good judgment, timely complete all responsibilities, and develop mature, sensitive, and effective relationships with others. Candidates and students must be able to professionally manage heavy workloads, prioritize conflicting demands, and function effectively under stress. They must be able to adapt to changing environments; to display flexibility, to learn to function in the face of their own possible biases and uncertainties inherent in public health and health care management settings, and to not engage in substance abuse. Candidates and students must be able to understand and determine the impact of the social determinants of health and other systemic issues which impact the care of all individuals in a respectful and effective manner regardless of race, color, national origin, ethnicity, creed, religion, age, disability, sex, gender, gender identity, sexual orientation, or any other protected status. Professionalism, compassion, integrity, concern for others, interpersonal skills, interest, and motivation are all qualities that are required throughout the educational process.

### **Reasonable Accommodations**

Des Moines University welcomes qualified candidates and students with disabilities who meet the technical standards of the program, with or without reasonable accommodations. Students with a disability

who may need accommodations during their educational career at DMU will be asked to reaffirm their need for accommodations when acknowledging the ability to meet technical standards annually. The student is responsible for requesting accommodations through the Accommodations and Educational Support Specialist in Academic Support within the Center for Educational Enhancement. Please reach out in person, by email (accommodations@dmu.edu), or by calling Academic Support at 515-271-1516. The Accommodations and Educational Support Specialist reviews all requests for accommodations through an individualized, interactive process.

The use of an intermediary may be a reasonable accommodation while performing some non-essential physical maneuvers or non-technical data gathering. However, an intermediary cannot substitute for the candidates' or student's interpretation and judgement. Intermediaries may not perform essential skills on behalf of the candidate or student, nor can they replace technical skills related to selection and observation.

# Process for Assessing Compliance with the Technical Standards

Candidates are required to attest at the time they accept an offer to matriculate that they meet the applicable technical standards, with or without reasonable accommodation, and annually confirm they continue to meet these standards. These standards are not intended to deter any candidate or student who might be able to complete the requirements of the curriculum with reasonable accommodations.

The University will provide reasonable accommodations as may be required by the Americans with Disabilities Act or the Iowa Civil Rights Act

A student whose behavior or performance raises questions concerning his or her ability to fulfill these technical standards may be required to obtain evaluation or testing by a health care provider designated by the University, and to provide the results to the Center for Educational Enhancement to be considered as part of the interactive process to determine possible reasonable accommodations.

Technological compensation can be made with respect to certain technical standards, but candidates and students should be able to perform these standards in a reasonably independent manner.

## **Physical Health**

In addition to the technical standards set forth, candidates and students must possess the general physical health necessary for performing the duties of a student in the health sciences and a health professional in training without endangering the lives of patients and/or colleagues with whom they might have contact.

## Course Sequence

| Code    | Title                                   | Credit<br>Hours |
|---------|---|-----------------|
| MHA 619 | Health Care Human Relations Management  | 3               |

## **Elective Courses**

There are no required elective hours.

## **Graduation Requirements**

A student is scheduled for graduation after successful completion of all degree requirements and upon recommendation of the program faculty for graduation. To be eligible for graduation, students must have a minimum 2.5 cumulative GPA, and demonstrated competence on all MHA key competencies by obtaining a minimum of 70% one or more times for each competency. All students graduating from the MHA program are required to submit a graduation petition form prior to their intended graduation date. Students must submit this form and pay all fees in order to receive their diploma.
