E. Dean Elsea - Business Manager
FOREWORD

Knights of Old once fought to maintain a standard of Honor, often battling against great odds to protect and uphold their ideals. Today that same unwavering spirit of honor and superiority predominates in the Osteopathic Profession and in the training of Osteopathic Students at the Des Moines Still College.

In order to express our appreciation of his many services for the Des Moines Still College of Osteopathy in the past, and as a token of our sincere wishes for continued success in his career as a Physician and a Teacher in the years to come, we respectfully dedicate this book to

Dr. C. F. Spring, B.S., D.O.
Symptomatology, Theory and Principles of Osteopathy
The Founder

"AS YOU CONTEMPLATE STUDYING THIS SCIENCE AND HAVE ASKED TO KNOW THE NECESSARY STUDIES, I WISH TO IMPRESS UPON YOUR MINDS THAT YOU BEGIN WITH ANATOMY AND END WITH ANATOMY."

Dr. Andrew Taylor Still, M.D., D.O.
Cooperation is the keynote of enterprise. Whatever advancement Des Moines Still College has made in the past year has been rooted in the cooperative spirit of the student body. These men and women have created a momentum due to carry them and their school to goals of valuable achievement.

Dr. C. W. Johnson, B.S., D.O.
"Confidence is the son of vision and is sired by information." Osteopathy is our vision. Its confidence has been established. It can only be continued by everlasting trust in your profession and yourself and the replacement of untruths by facts.

DR. J. P. SCHWARTZ, D.O.
ADMINISTRATION

The Board of Trustees

(1) DR. BERTHA CRUM  (2) MRS. K. M. ROBINSON, Secy.
(3) DR. E. E. STEFFEN (4) DR. C. W. JOHNSON (5) DR. J. P. SCHWARTZ
Treasurer  President  Dean
(6) DR. R. B. BACHMAN  (7) DR. H. V. HALLADAY

The executive body that governs the affairs of the Des Moines Still College is the Board of Trustees, annually elected representatives of the Corporate Board. Approximately seventy-five Osteopaths, a majority of whom are practicing in the State of Iowa, comprise the Corporate Board. The college is an eleemosynary institution, owned and managed by the Osteopathic profession and has since inception been dedicated to the Profession—the Teaching and Training of Osteopathic students.
The Faculty

The Faculty of D. M. S. C. O. is composed of a group of serious-minded keen, "dyed-in-the-wool" Osteopaths to whom all credit is due for the high scholastic standing now enjoyed by the college.

Their attitude towards the student is always one of helpfulness. No question is too small, no business too urgent, for them to stop a minute in their busy day to give the student needed advice. They constitute the stabilizing element of our student life.

We crab about their lectures, their methods, their exams, but they come back with a smile engendered by their sincere desire to aid us in becoming true Osteopaths that in the years to come will measure up to the standards of Andrew Taylor Still, the Founder of our Science. All hail the "Faculty of Specialists!"

Dr. C. W. Johnson, B.S., D.O.

Beebe Training School for Technicians
Assistant Technician Beebe Laboratories
Laboratory Director Polyclinic Hospital
The center of activity around the college is, without exception, the Secretary's Office. In the outer court, Rosemary presides in a regal manner over the telephone, treatment slips and mail. The student calls at the wicket, times innumerable throughout the day for the long-looked-for check from home, stamps, and passports to graduation. In the inner sanctum, Mrs. Robinson holds court in person. Here we gather to be separated from our shekels and to learn our fate as to conditions, failures and time credit. A haven for some, and a Waterloo for others.

The Office and the Office force are integral parts in the everyday machinery of our institution. Without them the college would be like a ship without a rudder. The Faculty use it as a meeting place between classes—the students as a center of inquiry.

The business of the various clinics is carried on through this office and the conglomeration of tasks required of the force cause us to wonder, "How do they do it."

Katherine M. Robinson
Secretary

Rosemary Kurtz
Assistant
Student Body

D.M.S.C.O. is proud of her student body. And, why not? A wide-awake group—cooperating and earnestly striving together with the Faculty to keep the school and the profession on the highest possible plane.

Although not great in numbers, we maintain and enjoy within our midst all the activities so essential to college life. We boast two publications: The Log Book, which is published bi-monthly, and the Stillonian, which is published annually. Our Band and Orchestra entertain us regularly in Assemblies. In competitive athletics our teams rank high. Practically every student participates in our Intramural Sports, which include Baseball, Track, Golf and Tennis. Let us not forget that the primary interest and aim of each individual is that of preparing himself for his chosen life's work. This aim, coupled with keen application to studies, ably fits the graduate to take his place in the profession.

Pre-college work is not an entrance requirement, yet it is interesting to note that more than fifty per cent of our total enrollment have previously attended other colleges and universities. It may be of interest to note the number of institutions represented in our student body.

"The Log Book," a four-page newspaper, is published bimonthly with the aim of keeping the Students, the Faculty, and the Field Men of Still College in close relationship with one another.

It carries a multitude of articles of interest to the alumni as well as to the student body. The editorial column, news of the clinics, athletics, fraternities, sororities, along with contributions from the Field, all help to make this paper an important factor in the life of the school. The entire profession receives a copy gratis throughout the entire year.

It has been issued for the past three years under the able editorship of F. Don Baylor. Too much credit cannot be given "Don" for the work he has given and to the ends that he has accomplished through this medium. It is with the deepest regret that we announce his loss through graduation this year.

Honors

IN RECOGNITION of the need of some means of rewarding the students who were worthy of Honors from each graduating class, Beta Chapter of Sigma Sigma Phi, honorary fraternity, presented the Board of Trustees of the college with two medals to be presented at each commencement.

The Sigma Sigma Phi medal for Proficiency in the Science of Osteopathy is awarded to the student who has spent the entire four years of his osteopathic course in the Des Moines Still College, and demonstrated the highest degree of proficiency in his work during that time. The second medal, known as the Sigma Sigma Phi medal for Service to the College and the Profession, is awarded the student who has also spent the entire period of his training at D.M.S.C.O. and who has rendered the highest degree of service to the college and to the profession and still maintained his scholastic standing. The selections are made by a committee composed of a representative of the Board of Trustees, the Superintendent of Clinics and a representative of the Faculty.

The first awards were made at the May commencement, 1926. Dr. Julius C. Bishop won the Medal for Proficiency and Dr. Ross Robertson was awarded the medal for Service. Both Doctors merited the honors bestowed upon them and are to be congratulated upon having received recognition for their attainments.

Of the Class of January, 1927, Dr. J. R. Swanson was awarded the Proficiency medal, and Dr. Lloyd Mitchell received the award for Service. Better selections could not have been made as each amply demonstrated his worth throughout the four years of his work in the college.

The plan as outlined by the Honorary fraternity is proving itself already and the underclassmen are inspired to better work in the hope that at their commencement exercises they might be presented with one of the coveted medals.
THE COLLEGIATE FORD

With a rattle and a clatter,
While the engine heaves a sigh:
With the tires growing flatter,
The collegiate Ford rolls by.

Each fender has a separate song,
Each spring a different squeak;
The top flip-flops as it rolls along,
The gas tank has a leak.

The cylinder walls are badly shot,
The crankshaft terribly bent;
The rickety engine's always hot,
The body one big dent.

But all-in-all, it's not so bad,
While not a pretty car;
The driver's plight is not so sad,
It's better than walking, by far.
Assemblies

Assemblies are regularly held each Friday morning at the third period. The purpose being a get-together for the students and faculty. Programs by the various organizations and outside talent are featured.

At our assembly on Friday, October fifteenth, we had two very distinguished guests. The one being Dr. R. B. Gilmour, of Sioux City, Iowa, President of the American Osteopathic Association, and the other, Dr. R. B. Henderson, Chairman of the Board of Regents of the Province of Ontario, who was making a tour of inspection of the Osteopathic colleges of the United States. Each of the Doctors favored us with a short address, giving some valuable professional advice.

One of the gala events of the season was the premier appearance of Dr. H. V. Halladay's twenty-four-piece brass band, which aptly demonstrated their ability to produce that oft spoken of sedative that soothes the savage beast. To prove their versatility, they played their famous rhapsody both forwards and backwards. By the accomplishment of this feat, Dr. Halladay has removed the least doubt from the minds of the student body as to his ability as a musician.

Dr. Louisa Burns, of the A. T. Still Research Institute, Los Angeles, Cal., gave some very interesting lectures on the work that is being carried on in that institution during her visit to Des Moines in December.
On the thirteenth of January, a special assembly was called at the close of the fourth period to remind Dr. J. P. Schwartz that he had reached another milestone in life. Dr. Johnson called the meeting to order and introduced Dr. Halladay as the speaker of the morning. "Virge" on behalf of the Faculty and student body presented the Dean with a remembrance in honor of his son John Peard. Since the Dean had decreed that his son John should never ride in expensive automobiles, baby carriages, etc., the opportunity was taken to provide the new arrival with a means of transportation, carefully assembled from a jello box mounted on fancy curved runners from a neighboring store box and complete with rope attached for coupling. Needless to say, the Dean was caught somewhat unaware, but recovered in time to give a few well worded remarks in appreciation of the thoughtfulness and appropriateness of the gift.

The traditional Class Day assembly for the Mid-Year class was of a musical nature, and was conducted by L. W. Jamieson, President of the class. Following their part on the morning's program, twenty-one members of the football squad were awarded the much coveted "S."

A special memorial service was held on Thursday, March 2, to pay tribute to the memory of Dr. Halladay's mother who was buried at Kirksville, Mo., on that date. Her loss means a figure gone from the profession that can not be replaced, but her greatness will live on through the influence she shed on her associates.

In addition to the more outstanding features, many excellent musical programs have been enjoyed by the student body during the course of the year. Speakers of local and national repute have appeared before us and kept us well informed on the progress of the "outside world." Pep meetings during the athletic seasons and song-fests at other times tend to keep the undergraduate enthusiasm bubbling at all times.

Our Friday assemblies are events that will be long remembered after our departure into the field. We will carry with us the pleasant memories and the associations that were gained during the most pleasant period of the week.

Dr. R. B. Gilmour
Iowa's President of the A. O. A.
STILLONIAN DAY is the one day in the year that everybody looks forward to with great anticipation. This annual event always takes place on the first Friday in May, and in this particular instance, Nature provided the Staff with copious quantities of beautiful May sunshine.

The day's program started off with an assembly conducted by Lois Irwin-Richardson, Editor-in-Chief of the 1926 Stillonian. Several musical selections by the Garber quartet preceded the presentation of the books to the President of the College, Dr. S. L. Taylor, the Dean, Dr. C. W. Johnson and to Dr. J. P. Schwartz, to whom the volume was dedicated. Following the response by Dr. Schwartz, the remainder of the morning was spent in distributing books to the student body.

The Annual Still College Field Day is first on the program after lunch. A complete program of field events with the special Inter-Fraternity Relay race for the Sigma Phi Trophy preceded the championship game in the baseball league. The "All-Star" Faculty nine had challenged the college champions and it fell to the lot of the Non-Frat team to do battle on the diamond against the Profs.

Much to the surprise of all, the Faculty demonstrated some rare and unexpected skill in the national pastime. Dr. A. B. Taylor occupied the mound with a high degree of efficiency and also proved himself proficient with the stick, getting as far as third on one wallop. Dr. John Woods proved himself a second "Babe Ruth" in his ability to connect with the sphere, as well as in avoidance. Dr. R. B. Bachman proved his versatility at the bat, as well as in pegging to second. It is understood that his practice suffered somewhat following the game due to an excess accumulation of acid in his muscles, somewhat crimping his style. Dr. Johnson forsook his office to participate in the Faculty All Stars and proved an adept hitter but was excused from circling the sacks. Coach Sutton came in for his share of the glory, adequately demonstrating his ability on the diamond.

An event of this nature is never complete unless the trippers of the light fantastic are allowed to demonstrate their ability on the waxed floor. Consequently, in the evening, the followers of Terpsichore gathered for the Stillonian Day Ball at the Masonic Temple. During intermission, the trophies and prizes were awarded the winners of the afternoon's competitions. Dr. and Mrs. Halladay were the official chaperones. The same "Still Spirit" prevailed throughout the evening and the day ended a complete success.
November fifth was the date reserved for the Annual Homecoming at D.M.S.C.O. Everything was in readiness, and the college was decorated with "Welcome" signs to greet the returning alumni and the student delegation from the Kirksville college. For the occasion, the local weather man provided an ideal fall day.

A monster pep meeting was held in the morning and culminated in the entire student body, headed by the band, assembling at the Union Station to give the K. O. C. contingent a hearty welcome. About three hundred students and a forty-piece band came up to cheer the Rams for the afternoon's battle. From this time until the game, the visitors busied themselves inspecting the college and taking in the sights of the city.

The annual clash between the Pirates and the Rams was called for 2:30. An enthusiastic crowd had assembled, supported by the two bands. The game was one of the cleanest and best fought battles that had been staged during the season. The Pirates come out of the fray with the long end of a 21 to 0 score. During the interval between halves the annual Freshman-Sophomore Push-ball battle was staged. The battle was fast and furious and eventually ended in a triumph for the yearlings. Following the game, the various fraternities and sororities held their reunions and banquets.

The next act was staged at the Cotillion Ballroom, the curtain rising at 8:30, where the young and old tripped the light fantastic to the harmonious gyrations of Al Levich's Serenaders. During intermission, the President, Dr. Johnson, in his usual jovial manner, formally welcomed the Kirksville students. The dance program was one of "Virge" Halladay's specialties and ended all too soon for the assembled terpsichoreans. The scene shifted abruptly to the Union Depot, where the visitors were safely started on their homeward journey.

It was by far the most successful homecoming Still College has experienced, and a day long to be remembered by the College and the Alumni.
[ Probation Week ]

This week of probation for the pledges of the various fraternities is always just what it is called—"Hell Week."

Frequently their activities do not begin until midnight, and seldom end before the sky begins to brighten and the stars, if any are out, begin to dim. The duties demanded are oftentimes not only strenuous, but fearsome, ranging from counting, all alone, the boards in the ball park fence and distributing various home commodities to the fairer sex on the downtown street corners, to bringing home the bacon in the form of sparrows from the lofty rafters of some farmer’s barn.

Many intricate contests, requiring considerable pedal exercise, are conducted for the benefit and testing of the neophytes and many are sent in quest of articles now thought to be passe. Failure is inexcusable—woe betide the lowly pledge if it be found that the red ear of sacred corn is merely a common yellow one dipped in mercurichrome!

Yea! The way of a pledge during this week is as that of the transgressor, hard—and at the end of these seven, later appreciated days, they all will agree that Probation Week is indeed "Hell Week."

[ "Still Night" at the Des Moines ]

On Wednesday evening, November ninth, the members of the football squad were the guests of the management of the Des Moines Theatre, who designated this evening as "Still College Night."

The team and coach sat in a body and as the spotlight was thrown upon each player he was introduced to the audience. This publicity, in addition to the highly successful season for the Pirates, should benefit both the college and the profession at large.

As an added attraction, the Symphonic Saxophone Sextette, under the capable direction of Dr. Halladay appeared upon the stage.
Christmas Program

For the first time in the history of the college, Santa Claus decided to visit D.M.S.C.O. He made his eventful appearance on December seventeenth.

As the Dean had promised, as a gentle reminder that school did not close for the holidays until this day, a fine and special examination for those who did not answer to roll call, not many of the Knights of the Flying Rails forsook the halls of learning prematurely to renew home ties for the Yuletide season.

Everybody responded, as usual to the sound of the gong, and classes were conducted per usual until the close of the third period. Dr. Johnson pronounced the Benediction in Nervous and Mental and that was taken as a signal for the festivities to begin.

The program was arranged by the Men's Pan-Hellenic Council and was put on in true D.M.S.C.O. style. A mammoth Christmas tree, replete with the tinsel and trappings of the season graced the rostrum and following a few musical selections by members of the student body, Santa Claus finally arrived with an overflowing pack. As each student's or Faculty member's name was called he had to proceed to the front of the room and receive and unwrap his gift to the amusement of the gang. Many and varied were the remembrances exchanged that morning. Following the distribution of the gifts, the entertainers returned and music reigned supreme. At the close of the program the sojourners scattered to their various places of abode, to start their annual exodus.

Our first Christmas Day at Still College was one long to be remembered by all who participated in the events of the morning, and no doubt, like many of our recent innovations, will become a part of the annual college program.

Freshman-Sophomore Activities

At about the end of the first week of school, after much "egging on" by the Juniors and Seniors, the Sophomores made an attempt to ride the Frosh some few miles out into the country. Success in a large way was not theirs, on this first attempt, due to the excellent organization of the Frosh.

But undismayed, another attempt and still another were made until a large majority of the yearlings were acquainted with the gentle art of pedestrianism on the frozen plains of Ioway!
As usual there was much opposition, so much, in fact, on the part of two freshmen that a door was removed by force, from its hinges, and the Fresh removed, (also by force), from their assumed slumbers and out into the wintry blasts in "one shoe on and one shoe off" style. Needless to say, these boys rode long and walked longer.

Feeling ran high as the upperclassmen still handed the sophomores the "razzberries," until on Homecoming Day, the annual Push-ball battle, gave both classes an opportunity to let off the excess steam. Each team started with fifteen men, but owing to several individual "push" contests, the original numbers were depleted, especially those of the Sophs. Of course, the Fresh won, or as the Sophs say, were allowed to win. This result ended the "Green Caps for the Freshmen."

[ Social Activities ]

It is true that "all work and no play makes Jack a dull boy," but such is not the case at Still College. As a certain amount of diversification is conducive to good school work, several social functions are given each year.

In order to give everybody an even start, the Freshmen Reception is the first event of the Season. The evening of October fifteenth, found the stage set at the Hoyt Sherman Place, for the occasion. The youthful arrivals turned out in their best regalia, accompanied by the lady of their, or someone else's choice, to trip the light fantastic to the tune of Al Levich's Syncopators. The Faculty, old and young, were also numbered among those present. At a late hour the program ended, and all departing declared the annual affair was greatly enjoyed.

The Pan-Hellenic Council held its first dance of the year at the Hoyt Sherman Place on January twenty-first. Nearly all the members of the three fraternities attended. The night was bitterly cold, but the music and the good fellowship of the dancers made it a most enjoyable party for all. When the party ended, the question in the minds of all was: "When is the next one?" Dr. and Mrs. Cash were the chaperons, and good ones, too. They seemed to enjoy the evening as well as the students, which was as it should be.

For time immemorial it has been the custom of man to have feasts commemorating the departure or return of one of his number. Still College is no excep-
tion to this long-established precedent. They have not celebrated the departure of the outgoing Seniors by one, but by many, as they are now more appropriately called, banquets. They have not been content with satiating their ever-present desire for food, but have added to this dancing. Consequently, as the end of each semester draws near, final and state board examinations are forgotten long enough to consume a goodly quantity of food, and take the last fling to the tune of some melodious orchestra.

As no semester of the college year would be complete without the Terpsichoreans demonstrating their ability, each of the Fraternities stage numerous functions during the period, also the Junior-Senior Prom and the various activities of the Pan-Hellenic Council tend to lighten the time for the student.

In addition to the college affairs, the social life of the city is open to the D. M. S. C. O. student that feels the urge of the bright lights. Theatres, concerts, dances, lectures and all the numerous diversions are available. No one “passes out” from ennui at D. M. S. C. O.

14 P.S.G. Stag Banquet.
26 Commencement.
HE ultimate success of any athletic organization depends primarily upon the ability and personality of the Coach.

In this respect, D.M.S.C.O. is indeed fortunate in having a man of the caliber of Frank R. Sutton at the head of its athletics. Coach Sutton graduated from Marietta College in 1915, having received his A.B. degree. In 1916 he received his A.M. degree from the same institution, having majored in Chemistry. Throughout his college career, Coach Sutton was prominent in athletic circles, having participated in four years of football, three years of basketball, three years of baseball and and one year of track.

During the period, 1917 to 1921, he was coach of athletics at Marietta High School. In 1921, he became Coach of baseball at Marietta College, and since 1922 he has been Director of Athletics at D.M.S.C.O.

By sheer will, hard work, and determination he has elevated athletics in our college to a higher level than ever before attained. Coach Sutton maintains high ideals of sportsmanship and the inculcation of this ideal into the minds of the members of his squads has been largely responsible for the success they have met with during the past few years.
SINCE Coach Frank Sutton started producing winning combinations at Still College and raising the standard of athletics so that the Osteopaths could compete favorably with the teams of any institution, there has probably been no more successful a year than this one. The primary reason is that for the first time in Purple and White history, the Kirksville Rams were sent down to defeat by a fighting machine lead by the dependable veteran, Captain "Ab" Graham.

At the beginning of the season it was felt that the name of "Bonesetter," which had been given the athletic teams a number of years ago, was unsatisfactory. As a result, a contest was held and the title of "Pirates" was adopted and has since proved extremely popular.

The athletes, as usual, were late in arriving from their summer's vacation and had to go into the opening contest with Parsons after a scant week's practice. The Osteopaths put up a sturdy fight but the superior condition of their opponents was too great a handicap and the Suttonites lost 12-0.

The following week the squad journeyed to Lawrence, Kansas, where they met a powerful Haskell Indian eleven which smothered them under a 32-0 defeat. The Stillonian were no match for the weight and skill of the redmen who gained practically at will. It was several weeks before the team really recovered from this contest.

St. Ambrose next gained a 7-0 victory over the Suttonites at Davenport. The backfield played sensational ball in the opening periods and drove deep into scoring territory on four successive occasions only to lose the oval by failing to pack the touchdown punch.

The first victory of the season was registered against Central College, where the Pirates snatched a belated 14-13 win. Loghrey's fifty-yard run to a touchdown after intercepting an enemy pass in the final quarter featured the game. "Race" Myer's dependable toe gave the one point margin with two beautiful place kicks.
The first half ended in a deadlock when the Des Moines eleven failed to take advantage of numerous opportunities to score. But with the third quarter waning, Benny Devine was sent into the fray and immediately twisted his way fifty yards to the enemy twenty-yard line. Shaw culminated a series of plunges by carrying the ball over.

Harold Plude side stepped through a broken field to run thirty yards for the second six points. The final touchdown was made on a plunge by Platt after a march from midfield. Myers added the three points by place kicking. It was a victory well deserved and won by superior fight and aggressiveness.

The season ended with a great scoring spree in which the Pirates ran wild to count 58 points while Jackson University failed to make a single tally. The coach sent in eleven seniors to play the first half and they responded by running up nineteen points. However, with the "Pony" backs, who replaced the Old-Timers, in the third quarter, the Pirates flashed a bewildering attack which even outshone the latters' best efforts.

The backfield men on the squad were Sheets, G. McIntosh, Russell, Platt, Stafford, Devine, Plude, Shaw, and Cassis. Captain Graham, Loghry, Ross and Van Ness took care of the ends. Lillard, Park and Myers were at the tackles. B. Jones, J. Jones, F. McIntosh and Skidmore handled the guards, while the center job was ably handled by Frank Dornbush.
Back row, left to right—Rockhill, Ass't Coach; Logan, B. Jones, Park, Shaw, Platt; J. Jones, Davis, Lillard, Myers, Coach Sutton.

</table>
A. B. GRAHAM—Guard

"Ab" captained the Pirate eleven in great style. His specialty, besides a wonderful fighting spirit on the field of play, is the handling of officials who slip up on the rules. The shoes of this sturdy fighter will be hard to fill next fall.

W. WALKER—Tackle

"Wallie" crashes through 'em on the defense and bowls 'em over on the offense. He's a hard man to stop when he starts for the ball carrier. A four-year "S" man.

DON SHEETS—Quarter

"Don" came through with a fine brand of generalship in every contest. After four years of play his skillful open field running will be absent next season.

SAM LILLARD—Tackle

"Sam" was without a doubt the most consistent lineman on the team. It was through his openings that the backs were able to gain time and again.
R. W. Ross—End, Captain Elect
"Ma" was back at his old wing berth and handled it with his characteristic ease. His "tackling" was severe and he also found little trouble in boxing the opposing tackle.

J. P. Jones—Guard, Captain Elect
"Johnnie" again proved that he is one of the best guards in our history. His ability to sift through the enemy forward wall and tackle the runner far behind the line featured the play of a number of games.

D. N. O. Shaw—Halfback
"Shelby" was the back who hurled himself through the opponent's line when only those short but most important yards were needed. Besides this, the former Marietta star mowed 'em down with perfect interference.

Frank Dornbusch—Center
"Dornie" proved to be one of the best passers ever developed by Coach Sutton. He was steady and cool whenever things looked blue.
REGINALD PLATT—Fullback

"Reg" did the booting for the Pirates and his long spirals were a great aid to the Suttonmen in every game. The lengthy Texan also passed accurately and ran the ends for long gains.

JEAN McINTOSH—Halfback

"Shorty's" cleverness in picking the holes on quick-opening plays was one of the features of the Purple and White attack.

PAUL PARK—Tackle

"Paul" played stellar ball in every game. He was unfortunate in having an old injury recur late in the season but he went in and showed plenty of fight in spite of it.

WILLIAM RUSSELL—Quarter

"Runt" was one of Coach Sutton's star ball toters and could pass with the best. However, the diminutive Olioan will always be remembered as one of the really great tacklers who ever played football. Four years and never missed a tackle.
HAROLD PLUDE—Halfback

"Bunk" played in top form all season. He showed at his best on off-tackle, smashed where he had a chance to get into the open and squirmed his way for added yardage.

BENNIE DEVINE—Halfback

"Bennie" was the rabbit back who carried the ball around the ends for long gains. Three more years for this versatile back.

GEORGE CASSIS—Halfback

"Sure-shot" was the smallest man on the squad but proved himself capable of handling any backfield position.

B. JONES—Guard

"Bern" had his best season this year after three years on the squad. He played a fighting game in the line and was always a hard tackler.
L. H. LOGHRY—End

"Peel" was the flash who handled the long passes. He was the fastest man on the team and was a constant source of worry to the defensive backs.

RALPH VAN NESS—End

"Van" developed a specialty of putting the opposing tackle out of the play and this was mainly responsible for the long gains around his side of the line.

FRANK McINTOSH—Guard

"Mac" looked his best when pulling out of the line to break a way for the ball carriers. No matter what the score, Mac was always in there battling.

L. H. ROCKHILL—Assistant Coach

"Rocky" was the mainstay of the Pirates from the Bench Position. No matter what the score, his optimism was always bubbling over.
WITHOUT a doubt Still College has been represented in the season just completed by the finest basket ball talent in the history of the Osteopathic institution. Too much credit cannot be given to Coach Frank Sutton who has not only built up one of the leading scoring machines of the state but has also raised the whole athletic standard to its present high level.

Although the long, hard schedule of twenty-eight contests required both sacrifice of time and effort on the part of every member, they each responded with the old Still Spirit to give their best against every opponent. The result at the close of the season found a total of eighteen games won, nine lost and one tied. The Suttonites rolled up the exceedingly high total of 979 points to their opponents 783, their average per game being 35 against 28 for the enemy.

Although the team as a whole worked smoothly together, the outstanding feature of the Pirate hoopers' engagements, was the wonderful individual playing of Harold Davis, All-State forward. It was this rangy dribbler's uncanny ability to hit the ring from all angles, especially at critical times that pulled many a game out of the fire to the needed margin of victory. "Davy" looped the ball for a total of 415 points with an average per game of practically fifteen counters. His dribbling was sensational and his pass work exceedingly deceptive.

Captain MacFriend and the veteran "Mike" Hannen were the consistent running mates of Davis in the fast breaking Buccaneer attack. Max registered regularly from his favorite close-in position while Mike came through with numerous shots farther out on the floor.

Van Ness had a great season at back guard where his aggressiveness and ability to smother dribblers was the main factor in the Stillonian defense. "Red" Smith not only ably covered his territory but also went down to score frequently. Cassie Lang and Weldon performed well on many occasions.

The Purple and White season opened rather slowly and for a time it seemed doubtful if the splendid record which finally resulted could be attained. After
trimming Grandview rather easily, they fell before the superior condition of Central, Simpson and Parsons, three of the best fives in the state.

Then, easily toppling Buena Vista, the Pirates engaged in one of the bitterest duels of the year when they tied Parsons, Iowa Conference Champions, at 28-all after three grueling overtime periods. The Fairfield team had all the best of the argument in the initial minutes, completely outpassing the Osteopaths, but in the second half the Stillonian defense tightened and slowly cut down their opponent's lead. But two minutes were left to play when David did his specialty, to sink a brace of buckets and knot the score at 24-24. Overanxiety kept both teams from running up the needed winning counters in the extra periods.

Graceland fell in a lopsided affair but the basket artists from St. Thomas and Platt colleges were just good enough to nose out the Buccaneers by close margins.

Coach Sutton then pulled his men together for a series of seven straight wins, most of which were gained while traveling under the most unfavorable conditions and playing three or four contests a week. Buena Vista, Western Union, Trinity, Omaha, Ellsworth and Graceland fell before the conquerors.

The Omaha contest was the feature battle of this list, being won by a 28-27 count in the final minutes of play. As usual it was the rangy Davis who came to the front with the needed points after the visitor's short pass attack had given them a dangerous lead. It proved the season's most exciting finish. The other noteworthy fact of these wins was the fifty-one points scored against Western Union which was the highest total in any game.

Tabor College squeezed out a very close win from the Buccaneers to put a temporary halt in the winning streak but the reverse was short lived and a group of five straight victories followed. Omaha, Tabor, Kirksville (twice) and Ellsworth were the victims.

The peak of interest was reached in the local college during the two hard-fought battles with the Rams here on successive nights. The Pirates successfully downed the Missouri Osteopaths in the first night's fracas only after Captain Friend had risen to the occasion with needed buckets while the visitors were concentrating on smothering Davis. The final score was 28-20. Van Ness featured the defensive play of the winners besides scoring one of the longest baskets of the season.

Kirksville found themselves no match for the brilliant shooting and bewilder-
ing dribbling of Davis in the play of the following night which ended with a 47-23 landslide. Harold was in perfect form and ran up a total of 28 points by the finest bit of individual play of the year. The defensive play of Hannon and Smith kept the enemy shots well scattered.

The last lap of the long trail ended with Lennox, Simpson, and Platt succumbing to the superior passing of the Pirates while the Kirksville Rams presented a solid front on their home court and took ample revenge by inflicting two stinging defeats in as many nights. The swashbucklers were clearly out-fought in the first game and a 29-27 score downed them after an extra period had been added to the regular time.

In the last contest, which went to the Rams, 35-32, the Osteopathic Dribblers from Iowa looked like easy winners by running a large lead at the start of the second half. At one time they led 29-17, mainly through the stellar looping of Davis. But the Suttonmen made the fatal mistake of easing up and their over-confidence allowed the Missourians to snatch victory from almost certain defeat.

The Freshman Squad

Left to Right—Purdue, Gann, O'Connors, Coach Sutton, Nowlin, Ripley, Monger
HE annual Interclass Track Meet, which has always been the feature event of Stillonian Day, not only drew one of the largest crowds on record but was highly successful both in spirit of rivalry and in number of entries. Coach Frank Sutton handled the events and ran them off smoothly with the help of a corps of able assistants.

In the first and outstanding events of the day, the Interfraternity Medley Relay, for the Sigma Sigma Phi Trophy, a quartette of speed artists from Iota Tau Sigma captured first honors. This fleet team presented a strong combination which was composed of Wadkins in the century, Loghry in the 220 flash, Marlow in the quarter and the brilliant Kale stepping the half as anchor man.

This was the second year of competition for this beautiful silver cup and both times it has been won by the athletes of Iota Tau Sigma. According to the rules for awarding the trophy, the fraternity winning it three times in succession will gain permanent possession. One more win and the cup finds a home in Beta Chapter house.

Phi Sigma Gamma was the second to cross the finish line and were ably represented by Jacobs, Stone, Shaffer and Heinlen. The Nonfraternity combination followed closely with a team composed of Halloway, Wilson, McMurray and Myers. Trimble, Smith, Brinkman and Wright carried the Atlas Club colors in a vain effort to overtake the leaders.

The Interclass section of the meet followed and was won without much difficulty by the Juniors who jumped to an early lead and were never headed, finally
amassing a total of 43 points. The Frosh trailed the winners with 26 counters, followed by the evenly matched Sophomores and Seniors who scored 5 and 3 respectively.

The flashy Loghry started his class to victory in the opener by stepping a fast hundred to break the tape in :10 flat. He was hard pressed by Jacobs, a fellow classman, who finished a scant six inches behind the winner. Davis and Shaw of the Frosh took third and fourth places respectively.

The quarter was captured by the Freshmen when Myer’s long stride carried him to the finish several yards ahead of the Sophomore, Shaffer. Wright took third for the Frosh and Davis, a Junior, was last. Time was :59.

A final burst of speed in his last few strides of the 220 gave Loghry another sensational victory over Marlow who fought every step of the way. Trimble, a Sophomore and Davis a Junior, followed in the order named. The fast time of 23 3-5 seconds was recorded.

It took Kale 5:20 to trot the mile but he lapped his nearest competitor, Warthman, a Junior. Brinkman of the same class finished third.

The half mile interclass relay proved the most exciting event of the afternoon’s program. It was close all the way, only being decided in the last few feet when Loghry, the anchor man for the Juniors, put forth a final effort to nose out Kale of the Frosh. The other members of the winning combination were Wadkins, Davis and Cummins. Wright, Heinlen and Myer were the other Freshmen.

Another Frosh first was registered by Sluss when he heaved the shot forty feet. Van Ness, Walker and Lashlee scored for the Juniors in this event, while Smith added another five for the Frosh in the pole vault. Wadkins and Friend tallied for the Juniors in this event.
BY OFFERING the Interfraternity Baseball Trophy for the first time, the Sigma Sigma Phis instituted one of the most successful athletic events ever staged at the Osteopathic institution. The beautiful cup is to be contested for each year and will become the permanent property of the fortunate nine who captures it three times in succession.

The Nonfrat tossers presented a team composed of former college stars who easily outclassed the others and won handily from the rest of the field. Captain Rice led his victorious players from behind the bat where he performed in big league style. Walker and Garton handled the twirling successfully and allowed a minimum of safeties in each contest. Their speed and curves were too deceptive for the most of the opposing batters who faced them.

The winning combination was composed of Captain Rice, Walker, G. McIntosh, F. McIntosh, Halloway, Garton, Mann, Bishop, Graham, Springer and Facto. Not a game was lost by the champions in three starts.

Phi Sigma Gamma finished second in the league by winning two contests and dropping one to the victors. The runners-up gained their position by playing consistently in the pinches. Captain Lashlee and Lee did splendid work with the stick and slammed the ball to all corners of the lot. Weldon twirled effectively besides doing well at the bat.

The Iota Tau Sigma nine exhibited considerable skill in each contest but did not seem to pack the winning punch in the latter innings. Captain Hovis played stellar ball behind the bat. Loghry and Russell were the offensive artists whose hitting featured the team's play.
The Atlas Club found themselves in the cellar birth at the finish with a record of all three games lost. Captain Sheets had his squad playing good ball in the opening innings but the boys could not stand the pace of the latter frames. Montgomery pitched wonderful ball while Damm was a tower of strength in the infield.

The games were all staged in Still's huge ampitheatre and practically every student was there to back his favorite team. Much constructive criticism was given to faltering athletes by the everwilling fans. Capable rooting paid equal tribute to homerun and error. From every standpoint the contests were a great success and plans are under way to make the league even better in the future.

**Golf**

As the book is going to press the announcement has been made that Golf will be added to the list of Intramural Sports. Dr. H. V. Halladay has presented a cup that will be awarded the winner of the free-for-all tournament this spring. Pairings have already been made for the initial round with a goodly number of the "cow-pasture pool" artists enrolled. It is rumored that Tennis will also be added this spring but to date no announcement has been made.

![Iota Tau Sigma's Winning Relay Team](image-url)
SINCE organization, in September, 1924, the Pan-Hellenic Council has been an active factor in the bringing about of better and more congenial fraternal relations and in the uniting more intimately of the fraternities with the school life, both socially and professionally.

The Council is composed of two representatives from each of the three social fraternities and it is this group that sponsors the practical work meetings and social hours that are held once a month at the various chapter houses. At these meetings the problems confronting the students are taken up, discussed and a conscientious effort made to adjust the condition to the advantage of everyone concerned. The Faculty have aided the organization materially by entering into the spirit of the meetings and also by lecturing to the combined memberships of the fraternities. The activity of the Council is not limited to the betterment of conditions that will affect the fraternity man alone, but their endeavor is directed towards lines that will benefit the entire student body.

The present spirit of cooperation that is evident around the college may be attributed to a large degree to the workings of this organization.

As the Stillonian goes to press, the staff is notified of the formation of a new organization in the college which has for its name, Sigma Chi Omega and which is founded upon the desire of the nonfraternity students of the college to promote professional training, good fellowship and college spirit. The Stillonian bids them welcome and feels confident that the new organization will enjoy a successful career.

The Des Moines General Hospital

The Des Moines General Hospital was founded in the late '90s by the Adventists, and was operated as the Iowa Sanatorium until 1909, at which time it was purchased by the Des Moines Still College and the name changed to the present title. In 1916 the institution was purchased by Dr. S. L. Taylor and under the reorganization that was affected considerable new equipment was added and the scope of the hospital broadened in many directions.

Thus the hospital ran until the spring of 1926, when Dr. Taylor was forced to retire from active practice and the institution was taken over by an Osteopathic Board composed of Drs. J. P. Schwartz, J. L. Schwartz and H. J. Marshall. Of the new executives, Dr. J. P. Schwartz was chosen as President of the Board, having served for the past nine years as Dr. Taylor's assistant. Under the new regime the institution has enjoyed a healthy growth and is rendering the profession of the state as complete a service as any osteopathic institution in the country.

The X-Ray, Physio-therapy and Laboratory departments, under the directorship of Dr. B. L. Cash, are as complete and efficient as could be desired. All types of Blood Chemistry, Urine Analysis, Basal Metabolism, Serum Reactions and tissue work occur in the daily routine of this department.

As an additional service, the hospital owns sixty milligrams of Radium and is prepared to do both surface and deep applications.

Possibly the most outstanding feature of this institution is the extensive Surgical Clinics that are conducted throughout the year, three days per week. It is this feature of the hospital work that most closely links the hospital with the college, as the senior students assist with all minor surgery in the clinic and witness the major operations. During the year 1926, over twenty-one hundred patients were operated in the surgical clinic, of which over fifty were major operations.

A dream of long standing for the Des Moines General Hospital is to be realized within the next year, with the erection of a new building of one hundred and fifty bed capacity. For many years there has been an urgent need for a new building and plans were once formulated in 1918, but the aftermath of the war prevented the completion of the program of building. This time, however, the proposition is "surefire." The state-wide campaign has been launched and has met with decided success. The new structure has been designed by one of the foremost firms of hospital architects in the country and the specifications call for the erection of a three-story building, of old Spanish style of design, to be erected upon the present site and the adjacent property which is owned by the hospital. When the building is completed it will be one of the most beautiful institutions in the state and will be more than worthy of the pride of the entire Osteopathic Profession.
[ General Clinics ]

PROBABLY the most outstanding feature of the college is the extensive Clinics that are maintained in all specialized departments. In this field the college is without peer in the osteopathic field and the student of D. M. S. C. O. receives practical experience that is invaluable to him after graduation.

Beginning with the second semester of the Junior year, the student is "in" Clinic, and from that date the beginning of his practical work. During the period from this time until graduation each student is required to give a minimum of five hundred treatments. The wide variety of cases that present themselves to the clinic for treatment enables the student to secure a well diversified experience in a comparatively short time. During the past year the cases treated averaged fourteen hundred per week. The case upon registration is assigned to a student who conducts the treatment until discharged. Special examination is made before special groups in the individual departments and the laboratory phase of the diagnosis is made by the student himself. A special laboratory is maintained for the Seniors’ use in this connection.

The Obstetrical Clinic is probably the most outstanding of the specialized groups. In this department the case, upon registration, is assigned to a Senior student who is responsible for the management of the case throughout its course. In this field the college requires the student to have made a minimum of two deliveries and to have been in attendance on five additional cases for graduation. Cases requiring hospitalization are cared for in the Des Moines General Hospital and the student secures the additional experience of the hospital routine.

In a field such as our own, we cannot stress too greatly the importance of this practical application of classroom theories. The outstanding success of D.M.S.C.O. graduates in the field may almost invariably be traced to the training they received during their undergraduate days in the Clinics.

The General Osteopathic Clinic is under the direction of Dr. H. V. Halladay and Dr. C. W. Johnson. The specialized divisions are maintained in Nervous and Mental Diseases under Dr. Johnson; Gynecology, Dr. Johnson; Obstetrics, Dr. R. B. Bachman; Pediatrics, Dr. Mary Golden; Eye, Ear, Nose and Throat, Dr. A. B. Taylor; Orthopedics, Dr. H. V. Halladay; Urology and Proctology, Dr. J. P. Schwartz; Surgery, Dr. J. P. Schwartz; X-Radiance, Dr. B. L. Cash; Laboratories, Mrs. Z. A. Innes.

Page One Hundred Thirty-three
AS ONE ascends the stairs of our college building, he soon comes to the laboratories where he may find classes of earnest students endeavoring to solve the problems of health and disease as disclosed by the microscope and various chemical reactions.

In this department the fundamental chemical reactions are taught to students of Inorganic and Organic Chemistry. A comprehensive course in Physiological Chemistry is offered and students are given intensive training in bacteriology, laboratory diagnosis. Pathology Laboratory is under the able supervision of Dr. C. W. Johnson. Another feature of especial interest is the Senior Laboratory, which is completely equipped for urine and gastric analyses and blood counting. This laboratory is open at all hours.

We are justly proud of our laboratories. They are completely equipped with all necessary and modern articles incidental to the work being carried on. Reigning high in this department is Mrs. Z. A. Innes, a woman of wide practical experience and great technical knowledge, a woman who believes that order is the first law of heaven; also, that a laboratory in order is a great inspiration.
The Humor Editor’s Lament

Two hundred treatments yet to go
And still they ask me why
I don’t turn out some Humor
For the time is drawing nigh
When the college year book goes to press.
And, if the work’s not done—
The book will be a sorry mess.

And it won’t be any fun,
To stand before the powers that be
And give out my report,
With the only single ability
That I’m two hundred short.
I try my best to think of some—
But I just fuss and fret,
For how can I write Humor
With two hundred yet to get?

Visions of Diplomas on the far horizon
loom,
But before I’ll ever get one,
You’ll find me in my tomb.
If only some kind fairy,
For whom, favors I had done,
Would send me fourteen patients
With ailments, everyone,
That needed treatments every day,
That didn’t require much knowledge
I might—by next Commencement Day
Get my degree from college.

But, how I’ll ever make the grade
I really do not know—
I simply cannot concentrate
With two hundred yet to go!
Osteopathy De Luxe

A One Act Modern Problem Play by the
Well Known Playwright
IMA PHOOL

Time: 1929.

Place: The nineteenth floor of the Dime Bank Building, Detroit, Michigan.

Many patients are waiting outside the frosted glass door which bears the following inscription:

THE HOUSE OF HEALTH
"GET WELL THE OSTEOPATHIC WAY"

Dr. Ross Richardson .................................................. Exalted Diagnoser
Dr. Donald Sheets .................................................. Supreme Spine Springr
Dr. Adlayah Percy Wartham ........................................ Assistant
Dr. Ralph E. Davis .................................................. Assistant Assistant
Dr. Mildred Trimble .................................................. Head Anesthetizer
Dr. H. J. Brown ....................................................... Grand Tonsil Grabber
Dr. Harold Helf ....................................................... Foot Fault Fixer
Dr. Opal Robinson ................................................... Light Manipulator

Inside there seems to be some disagreement over the diagnosis of a patient's condition.

Dr. Richardson: "There seems to be a little confliction here. There are three votes for Spinal Meningitis, three for muscular rheumatism and one for lumbar. Dr. Robinson didn't vote. Now, Doctors, we will take a revote and Dr. R. you vote for the one you think is the most logical. Ah! That is better, the Spinal Meningitis have it."

Dr. Davis: "I think I'll go down to the fifth floor and get Dr. Graham and Dr. Cummins." (Exit.)

Dr. Sheets: "Don't get Dr. Cavanaugh; he stole a patient from me last week."

Dr. Graham: (Coming in with Dr. Davis and Cummins.) "See here, Ross, are you sure this is Spinal Meningitis? I was measuring a patient for a mustard plaster but I dropped it and came up because I had a case of that once and I know they have to be handled with discretion."

Dr. Cummins: "Meningitis is derived from the Latin, Meninges meaning back—and its meaning pain—so there you have the pain in the back."

Dr. Richardson: (Rapping for silence.) "Come, come let's get to the treatment of this condition."

Dr. Sheets: "Give him the Cuban Grind and work out his upper dorsal."
Dr. WARTHMAN: "No! I read in my aunt's Doctor Book that the thing for this is equal parts of bismuth, Dover's powders, turpentine, morphine, codii, nux vomica, iodine, ergot, hasheesh valerianate of ammonia, opium, cantharides, rex magnus and vox humana."

Dr. BROWN: "But when you consider that these things have to be masticated, acted upon by the salivary glands, chymified by the peculiar action of the stomach and forwarded through the pyloric orifice into the little intestines, where they are touched up with bile and later handed over through the lacteals and thoracic duct into the circulation, where it is yanked back and forth through the heart, lungs and capillaries, and if there is any left, to fork over to the disease, it has to be squeezed into the bony air-tight socket that holds the spinal cord, you begin to realize . . .

Dr. BELF: (Interruping.) "I think the thing to do is to remove the entire spinal cord, hang it over the clothes line and clean with benzine."

(Here the patient leaves, but no one notices it.)

Dr. TRIMBLE: "But it is difficult to keep house without a spinal cord."

Dr. ROBINSON: "Yes, you need it every time you cook a meal."

Dr. CUMMINS: "I advocate Dr. Belf's treatment except that I think it should be treated with insect powder and rolled in Corn Meal."

Dr. DAVIS: "Why not get a dentist to pull it and pack the part that has the hot box in cracked ice?"

Dr. CAVANAUGH: "I think it would be a lot easier to treat the patient for Lumbago."

Dr. RICHARDSON: "I have an idea! We'll call a meeting of the entire class of 1927, have a picnic on Belle Isle, and thresh this thing out."

DRS. BELF, TRIMBLE, SHEETS, ROBINSON, DAVIS, WARTHMAN, CAVANAUGH, and CUMMINS, in chorus: "Hurrah!"

Dr. GRAHAM: "What are we going to have to eat?"

(Enter Dr. Gerald Beebe from Kalamazoo.)

Dr. BEEBE: "Hello, Doctors, I just dropped in from Kazoo. Yes, things are fine. Did I ever tell you about that time up at Lawton when I was out riding with a girl in a Ford Coupe? Well, we started for Paw Paw Lake when . . .

(Here everyone goes to sleep.)

ONE HOUR LATER

Dr. BEEBE: —as I was saying there was a big patch of nettles, and—(Telephone rings violently).

Dr. RICHARDSON: (Rubbing his eyes): "Hello. Oh, yes. (aside) It's the patient. She wants to know if we have reached a decision."

Dr. BROWN: "Let me talk to her. Hello, Yes, the laboratory findings show conclusively that you have a serious form of lumbago. Tomorrow at one-thirty then. All right—g'bye.

Curtain
Graduates of Des Moines Still College,

Des Moines, Iowa.

Dear Doctors:

We have enjoyed knowing you for the past four years. Fraternizing with virile, wide-awake students has instilled enthusiasm and spirit in all whose pleasure it was to know you.

The future of our profession is in your hands. We know that you will bear the load with alacrity and willingness grounded by a continued thirst for knowledge of the healing art. We expect to hear of you in district, state and national affairs, for it is only by such organizations that our science is propagated and extended in a systematic manner. Be a spoke in the wheel of advancement and not a rut that retards its progress.

Des Moines Still College of Osteopathy boasts a motto: "Osteopathy without Limitations." Its limitations are only those that you personally make, your success follows in the same proportion.

That your future good fortunes may ride the crest of the ever-advancing tide of Osteopathy is our sincere wish.

Fraternally,

THE TAYLOR CLINIC.

JPS:AP
Hallucinations

Various patients of the Nervous and Mental Clinic have reported to the Assistant Clinician seeing the following—which only demonstrates the delusions, illusions and mirages to which this class of patients are subject:

Hopkins eating at night without "JO."
Brinkman in a drunken brawl.
Cab Cummins drinking soda pop.
John Wadkins at college at 7 a.m.
H. J. Brown conducting himself in an unprofessional manner.
Moco Elsea saying the right thing at the right time.
Skidmore giving books away.
Rosemary ringing the bell fifteen minutes early.
"Pinkie" Schwartz in a pair of overalls.
Leonard Jacobs laughing boisterously.
Bennie Devine without Bunk Plude.
Bunk Plude without Benny Devine.
Jack Cavanaugh with his own tie on.
Mary Jane with a heavy date.
The Back Row in Nervous and Mental—EMPTY!
Office insulted.
Richardson in jail for a felony.
Walt Damm doing Evangelical work.
Stockers Restaurant out of Coffee.
Van Ness without a chew.
LeRoy Doyle talking in well modulated tones.
Otey Lashlee telling Beebe he's right about anything.
Ava Johnson with a earload of apples.
Charley Johnson on a date with his own girl.
Coach Sutton satisfied with a football game.
Orlando Smith casting a shadow.
Red Maxfield baldheaded.
Bill Russell treating fifteen patients a day.
Dr. Steffen driving a coal truck.
B. E. Scott in a Buster Brown suit.
Widmer wearing Elsea's pants.
Still College without Marietta.
HAVING made my pile in three short years, I started out one day with the avowed intention of visiting every member of the class of 1927.

The first one I came across was a good-natured, red-haired boy with feet like summer squashes. None other than "Red" Groves, who, with the assistance of Bernard Jones, was holding down a large suite of offices in "Squeeuk," Arizona. He told me that the week before he had had a visit from Manley Office. It seems that Office had tossed up a coin to see whether he would blow his brains out or go into the "Ready-Made" clothing business. The coin had fallen in a crack and stood on edge so that he had decided to accept a position as High Pressure Salesman for Frank Kroner's new book on Grecian Mythology.

Josephine Bowman was writing Obituary Poems for a large eastern newspaper and was so busy that she couldn't see me but sent word that she had heard from Mary Jane Porter, who was "doing" Europe with Ray Houghton, who had recently broken the bank at Monte Carlo.

I didn't have to look around for our old friend Finney, as you can stroll into any "Movie Emporium" and see him. He played opposite Ruth Tiberghien in that well-known cinema success, "The Call of the Cow Path," which was so ably directed by Kenneth Haines.

Lloyd Robinson was living the life of a hermit in the mountains and would not consent to interview anyone. Thinking that he might make an exception in my case, I went up to his cabin and found a note telling me that I would find his life's history, (which we will not reveal here), in the right pigeon-hole of his desk and that he recommended the cucumber pickles on the lower shelf of the pantry.

J. S. Montgomery had become quite badly messed up endeavoring to delve into the anatomical structure of a Grizzly Bear. His assistant, Joe Clark, had also become a victim to this fatal "Brown Study," but both were able to be around again.

In Paduka, Washington, I came across a sign that read—

GEORGE WALLACE
Dealer in Flour, Bran, Middlings, Screening, Hen Feed and other Bric-a-Brac.

So that accounted for another of the wandering boys.

Singing Shaw and Walt Danna have opened a "Dance Palace" for people over sixty years of age. They figure that these people will be so old and deaf that there will be very little kicking on the music which is furnished by the trio.

Ghost is a member of the Pennsylvania State Legislature.

Sam Lillard has a goat ranch in California (real Angoras). The Angora is a beautiful animal in pictures, but outside of that it has a type of perspiration that excites adverse criticism. "Still," he says, "It's an independent life and has its advantages."

Hopkins has just turned out a book titled "The Guide to Rapid Affluence" or "How to Get There Without Mental Exertion." He told me that he had seen Reg Platt doing a single at Kieth's Palace, the main part of which consisted of an anthropoid imitation. It is so realistic that he has all the scientists wondering.

Johnny Nowlin is also a book agent, selling a volume on "How to Ventilate the Human Form," by Colt. Patterson is in the hospital with a bullet hole in his
READY MADE PRINTING

and Other Office Stationery and Supplies

Many useful items of office stationery are stocked ready printed. We have ready for delivery at any time Counter Checks, Telephone Call Pads, Office Communication Blanks, Application for Credit Blanks, Applications for Employment, Pending File Copy Sheets and many others, such blanks as are in daily use in many of the better class business and professional offices of Des Moines and the wording perfected through experience. If you are in an office or are about to establish one you are invited to call and investigate the service we offer. Our printing is correct in form, neat in appearance and low in price.

We can supply all your printing needs

WALNUT 1228  DES MOINES  607-609 CHERRY ST.
right hand. He had not regained consciousness when I left town, but had been heard to mutter something about a fifth ace.

The DeWaltts and Caseys went together and bought a mine out in Colorado. The main fault with it seems to be its poverty as a mine and its isolation as a well.

Gehman I found in New Mexico running a chicken farm. "The hen does not care for the sublime in nature," he said. "Why, only yesterday, my assistant, LeRoy Doyle, found an old hen setting on a porcelain door-knob trying to hatch out a litter of Queen Anne Bungalows."

Halloway and Lashlee are both playing baseball with the team from Nashville, Tenn. Myers and Brinkman are at the Y.M.C.A. trying to show the boys the error of getting into automobiles with strange young women. Well do they remember the time they had walking back from Valley Junction.

Lester Schaeffer is Postmaster at Grove City, Pa., and has just put in an order for some new corrugated cuspidors for the lady postal clerks.

Humphrey and Garton have a fine business. The sign over the door reads, viz.:

"Glue, Codfish, Gent's Neckwear, Hides, Tallow and Maple Syrup, Gas Fitting and Undertaking in all its Branches, Diseases of Horses and Children a Specialty."

Springer is a District Sales Manager for the Corona Typewriter Co., and Johnny Walkins is now editing the Williamsport, Pa., "Grit," a sheet that is well known for its veracity. So far I have been unable to locate Barton, Bryson and Runt Russell, but it is rumored that they have joined the marines.

Ward has also disappeared and no trace can be found of him. During his first year of practice he unfortunately "set" a broken leg so that when the cast was removed, although the bones united splendidly, the knee bent the wrong way. The people in the town, after that, made it an object for him to go.

Deane Elsea is a Taxidermist. He said, "I became a creature of habit, and was so used to stuffing them while I was in college that I couldn't get away from it."
One day while treating a ticklish patient, Don Baylor became a little too rough and the patient, in a fit of temporary delirium, jerked a slat from the bed and smote him twice just posterior to his lap, meanwhile hissing through clenched teeth, "Physician, Heal Thyself." Don is now doing research work.

Earl Reed, who, as you doubtless know, was the youngest Sheriff ever in the state of Kansas, a second Lieutenant in the World War, and who worked his way through college painting signs, is the "King Ben" of a new religious cult back in his home town.

Mike Hannon practiced for a while with great success, but as soon as Basket Ball started Mike came back to take some P.G. work in order that he might practice with the boys. Skidmore is also back at school, as he found that he could do better running the "Book Store" than practicing his profession.

A patient came into the clinic conducted by Paul Park, Eddie Grove and Ralph Van Ness with a mild case of strabismus. So, pulling out the tiny muscle that caused the trouble, they snipped out a portion with a pair of op-
tical sheep shears, but in so doing they removed so much that the man's eye turned out so you could hang your hat on it. They were last seen going through Wahoo, Nebraska, in Paul's Ford at a fearful rate.

Charles Johnson, Flynn and Lamb recently made quite a name for themselves. They happened to be present where a man was being hung for stealing chickens. He was right in the middle of an explanation, it seems, when the head vigilante kicked the board from under him and broke his neck. All at once some one shouted, 'My God! We have made a ridiculous blunder! Boys, we can't be too careful about hanging total strangers.' Then these young physicians stepped forward and, one holding the patient, another put his knee in the back of the dead man's neck, while the third gave his head a quick snap backward, with the result that the young fellow, who was in the middle of a large word, something like 'contumely,' when the barrel tipped over, went right on with the word and finished out the explanation. The youth says that he feels better now than ever before and is loved and esteemed by all.

EDWARDS CLINIC
Osteopathic Finger Surgery

Over 90 per cent of the cases referred to this clinic during 1926 were materially benefited, if not entirely relieved, by Finger Surgery and Osteopathic Surgery of the Eye, Ear, Nose, and Throat.

In the department of Osteopathic Otology, the partimute, or so-called deafmute, receives aural training on the Electrophone—audion bulb classes with experienced teachers. A training school for the partimute or deafmute in speech and auditory development while under osteopathic treatment.

Practice Limited to
Osteopathic Ophthalmology, Rhinology and Otolaryngology

Referred patients returned to home Osteopath for aftercare.

Your Patients Returned to You for After-Care and Treatment

"An Osteopathic Environment"

The Des Moines General Hospital

Decalogue of the O. B. Department

1. When thou art called to attend a woman in labor thy answer shall be Yea—Yea—and not Nay—Nay—for if thou shouldst refuse, thy name shall be MUD and thy telephone number will be forever erased from the call sheet.

2. Thou shalt make great haste to arrive at thy destination—thou must not tarry, neither shalt thou stop at the restaurant to partake of food.

3. When thou comest to the house wherein is the woman in travail, prepare to make thyself of service and do not flatter thyself that thy whole duty is to amuse the family with the drippings of thy tongue. For he is an ass, and an unutterable pain in the neck, who will jest at such a time.

4. When thou hast prepared thy sterile solutions and hast boiled well thy instruments, look well that thy thumbs and thy fingers do not contaminate the pan, for this is folly and it shall be thy old neck. Also when thou seest a sterile pan upon a chair, pass not thy huge uncouth foot over it, but move first the pan.

5. If thou art Accoucheur or Consulting Physician, thy place is at the bedside. Neither shalt thou lie down to slumber lest the head shall be born and the perineum torn before thou hast aroused thyself.

6. And if the Assistant in Charge shall deem it wise to do such and so—thy mouth shall be closed and thy eyes and ears open. Verily, even thou canst learn a little. Also Obedience is a virtue and it shall be rewarded. Yea, verily, and as Attention, it, too, shall not go unforgotten.

7. And when the child is born and thou hast heard his cry and when the cord has been cut, take him quickly and do not stand with thy thumb in thy mouth, but get thee hence and clean and dress the child. For verily, his hands are cold and his skin cyanotic, and thou art a sluggard if thou canst not dress a babe in five minutes.

8. Thou shalt not argue with thy neighbor concerning the washing of the rubber sheet. This is an abomination. In short, do quickly the thing that is to be done and save thy precious breath for hereafter.

9. This, also, is an abomination: Thou shalt not depart and leave the dirty work for someone else to do.

10. If thou thinkest that thy aftercalls can be made by telephone or by proxy, thou hast another think coming. Beware—lest thy foot slip, for it is well and firmly shod, but look better to thy tongue, for verily it is in a slick place.

A STUDY IN FEAR

Walter De Cuff lay on his humble cot. For five hours he had been peacefully sleeping. Suddenly, at three o'clock in the morning, a dark figure opened the door and entered the room. It was his roommate. Walter half opened his eyes. His roommate did not know he was awake. Silently Walter watched him walk over to the dresser, stand for a moment in thought, and then pick up a glistening object. Silently Walter watched him slink out of the room.

Walter, now fully awake, sat up. He heard his roommate's footsteps receding down the hall; he heard the steps turn in at the bathroom door. A puzzled look came over Walter's face. His hand shook as he reached toward the wall to steady himself. His nerves were badly shaken, and he knew it. Straining his ears, he heard a trickle of water. This was too much. He trembled from head to foot as the horrid thought tortured him. He opened his mouth, but fear paralyzed his vocal chords. He struggled. At last he found his voice.

"'Jake,'" he called, "'are you sure you have your own toothbrush?"

LOVE ARE DUMB

He asked her on the back porch,
On a moonlit starry night,
Alas, he was excited,
And did not get it right:

"You cannot live without I
And each other must us have we.
So are you tell I will me
If us me marry won't she?"

The poor girl was dumbfounded,
And knew not what to say,
But opened up her mouth
And poured forth words this way.

"Oh dear boy, how me love us
And me too love I we,
But you we I are never
Is able can us marry.

"Me are a husband has got,
Him is I much do loves,
Alas, I is not are you have I,
Nor can it ever was."

CRADDOCK CLOTHING CO.
605 Locust St. Bankers Trust Bldg.

The Freshman’s Alphabet
A is for Adipose, which they tell us means fat;
B is for Butcher—he majors in that.
C is for Ceci, so vague and minute;
D is for the Dermis that covers your snout.
E is for Enzyme, and also for Eyes;
F is for Furuncles—Boils in disguise.
G is for Globules, soft, round and bright;
H is for Hydrogen, I know that’s all right.
I is for Idiots, of which there are several;
J is for Jaundice, yellow and febrile.
K is for Keeley’s, a cure once sublime;
L is for Livers, that work all the time.
M is for Measles, Mucosa and Mumps;
N is for Neurotics, they’re down in the dumps.
O is for Osmosis, which means to go through;
P is for Pernicious, the Devil’s own due.
Q is for Quacks, the curse of Creation;
R is for Reflex, subject of Johnson’s oration.
S is for Saerum, with Coccyx below;
T is for Tabs, Thrombosis and Toe.
U is for Uvula, highly inflamed;
V is for Vomit and Varicose Veins.
W is for Wasserman, Worms, Warts and Wens;
X is for X-ray, a camera sans lens.
Y is for Yaws, a framboolial sore;
Z is for Zygote—There ain’t any more.

Dirty Work at the Crossroads

T HE night was chilly and damp. The mist hung over the peaceful valley around the ITS house like an old shawl over a young cabbage plant. Not a sound marred the serene silence save for the low, contented hum of the Ford Plant as it continued its merciless grinding to complete the week’s quota of tangible regrets.

A long, tall shadow comes striding through the gloom like a grim spectre of a forgotten past. As he (for it is a man) nears the ITS house he slightly quickens his step, doubtless thinking of the cheerful warmth within and contemplating a short nap in front of the glowing hearth, and a sigh escapes his blue lips as he starts up the walk for he has been on an extended basketball trip and shows the marks of sleeplessness and fatigue.

As he mounts the steps, a placard confronts him and he mutters a curse through clenched teeth as he reads the dreaded sign, "QUARANTINE." A pang of homesickness assails him and he slowly walks towards the garage wherein is housed his powerful "Dodge Sport" touring car. Determining to call on one of his many feminine admirers and seek solace from the touch of a gentle hand and a sympathetic and understanding heart.

Backed out of the garage, he drives slowly around the block to that classic beauchery so dear to all bohemian Stillites. 'Ye West End Coffee Shoppe,' to partake of nourishing vials to further sustain him on his journey.

Coming out, he looks like a new man, for the black coffee had set the blood pulsating through his veins with an unwonted vigor, and the brightness of his eye and the elasticity of his supporters gave the lie to his depressed and footsore state.
Upon coming to his car he found, much to his astonishment and chagrin, that someone had stealthily removed his side curtain as he dozed over his second cup of coffee, and the rain, which was now beginning to fall in large quantities, had already imparted a sogginess to the moiree upholstering. Noting that a car of about the same vintage was commanding a position just posterior to his own, and was fully equipped with the curtain so essential to the bodily comfort of the driver, he immediately concluded that the owner was doubtless the perpetrator of this dastardly and heinous crime. Deciding at all costs to thwart the owner of the other car in this nefarious plot, he stealthily started his car and drove it silently (as possible) around the corner. Tethering it safely to a convenient water plug, he flitted from shadow to shadow, like unto a bit of flotsam on an angry sea, until he was in position to secure his curtain and still command a view of the door of the Shoppe. Deftly loosening the patent fastener, it was short work to speedily return to his motor and transfer the enclosure to empty space. Once more he drove on into the storm towards his former destination. I could not follow him on this momentous trip and recount all the details but that does not belong to this story.

Upon arising next morning (though not addicted to boasting) he could not refrain from telling the boys of the manner in which he had matched wits with one who was doubtless a power in the underworld. The plausibility of his story being doubted (though also not prone to jest nor speak in lighter vein), he was constrained to take the boys to the garage and prove the veracity of the unlikely tale.

Reaching the garage, he swept open the door and with an all-embracing gesture, bade the boys look. A rousing laugh shook the very rafters of the building as they gazed upon the mud-bespattered vehicle, for—THE CAR BEHIND HAD BEEN HIS OWN!
I cannot sing the old songs
I dare not sing the new
For how in heck can a feller sing
When a feller has to chew?

ERNITE PARLANE
"D'ja take in the big wrassel?"
"Yeah."
"Whoa drag?"
"Smokin' ginche, sure throws a steamin' heele."
"Nasty line."
"Oh daddy—and the music was positively dirty."
"Uh-huh."
"And the punch was stinko-blotto."
"Ja get soiled."
"Gosh, I was obblute' damaged."
"I be expected, old dear."
"They throw a snotty party."
"Yeah."

Dentist: Pardon me, Miss, just a moment, I must have a drill.
Patient: Less Patient: For heaven's sake, can't I have my tooth filled without a rehearsal?

THE CATASTROPHE

He sat with his hands gripping the steering wheel tightly—so tightly that his knuckles were whitened as the blood was driven toward his wrists. He saw that it was unavoidable; he tried ineffectively to scream, but the sound was smothered in his throat. Then, as he glanced up and saw that they would inevitably come together, he released his hold on the wheel, hid his face in his arms and waited for it to happen.

It was thus his roommate found him—his head in his arms and his face drawn and white with the effects of the experience he had just undergone.

"'Look at the other ear," the victim cried hoarsely.

And his roommate looked.

With an air of disgust he turned to his broken pal.

"'Say, George, didn't you know that girl you were rushing 'necked' 'em all? A little clinch like she's pulling now ought not to worry you.'"

Our co-ed friend says that the height of curiosity is paying $1,000 to see your appendix.

The Cat with Nine Tails

BACK in the beautiful Ohio Valley, where the mills belch forth their flames and soot, where all men are steel workers, and corn licker is the accepted beverage, the most fickle cat in all the realms of catland, no longer awaits the return of its owner and master.

It seems (according to "AB") that early in life this protege of the feline species was taught to inject its aqua from the hydrant in the white and spotless kitchen sink. So thorough was this training that in a very short lapse of time that kitty could not be forced to tongue its water from a receptacle as all common cats do. No, sir. Waterlessness before that. All went well until one day by mistake or jest the hot-water faucet was turned on, instead of the cold, and when said pussy climbed up to the oasis to get its refreshing sip it severely burned the contents of its entire buccal cavity. And lo and behold, now before ever a drop of water touches its tongue the temperature of it must first be ascertained by the sleek paw of the most educated and prized cat in that whole town.

But even educated and cared-for cats have their troubles and, according to rumor during the master's last sojourn home, the temperature dropped to a frigid point, freezing every water pipe in the town. Plumbers seldom work but never during the Christmas Holidays. What was the cat to do? Even with its reputed nine lives, it could not be expected to live without water while waiting for action from lazy, indolent plumbers. But not a drop could it be forced to take from a common receptacle, even after the most tactile pleading of its master and trainer. As a result, on the ninth day, with the pipes still frozen, the

But even educated and cared-for cats have their troubles and, according to rumor during the master's last sojourn home, the temperature dropped to a frigid point, freezing every water pipe in the town. Plumbers seldom work but never during the Christmas Holidays. What was the cat to do? Even with its reputed nine lives, it could not be expected to live without water while waiting for action from lazy, indolent plumbers. But not a drop could it be forced to take from a common receptacle, even after the most tactile pleading of its master and trainer. As a result, on the ninth day, with the pipes still frozen, the
lazy plumbers still refusing to work, and every means of tender force having been used by the loving master, kitty peacefully laid down and died of thirst—dreaming pleasantly of Niagara Falls.

That brings me back to where my story started. Which all goes to prove that the world is just as full of pervarietators now, as it was 2,600 years ago.

ARE YOU AWARE THAT—

Worn-out mattresses make an inferior grade of pie crust?

Live polecats are not often worn around the neck?

The people of Switzerland seldom mix beans with their coffee?

Decapitation frequently causes death?

It is an unusual custom to sleep with a hyena?

Few dentists advocate the chewing of flatirons as a dental aid?

Nine out of ten will probably see nothing to laugh at in the preceding wise cracks?

It must take a lot of dough to run some of these big bakeries.

Quality Merchandise

is made for those who appreciate the extravagance of cheap items.

We invite your patronage, guaranteeing satisfactory service, standard quality and full value.

THE STANDARD CHEMICAL COMPANY

Des Moines, Iowa
From a Freshman’s Notebook

The Brain—Def.: The top floor apartment in the Human Block, known as the Cranium and kept by the Sarah Sisters—Sarah Brum and Sarah Bellum—assisted by Medulla Oblongata. All three are nervous and are always confined to their cells. The Brain is done in Gray and White and furnished with light and heat, hot or cold water if desired, with regular connections with the outside world by way of the Spinal Circuit.

Gout—The undesirable seion of High Living which frequents the lowest joints, and is mentioned only in the Invalid’s Foot Notes.

The Prize Boner of the Year

Sherwood Nye in Gyn: “Doctor Johnson, is sterility hereditary?”

Dr. Steffen: “What is broken compensation, Ross?”
Rob Ross: “When you don’t get the money.”

“You know, I think George is the most efficient man I know.”
“How’s that?”
“In order to save on his laundry bill he hides his socks in the pocket of his pajamas.”

Little Benny had a fit,
In fact, it was a benefit.
His mother didn’t notice it;
It didn’t hurt the child a bit—

“But I’ll be a cold day when I marry you.”
“All right, make it the thirty-second of December.”

DUTCH FOLK SONG

Albino pimento shampoo
Vanilla militia prunella
Implacable wholesale kazoo
Hereafter, or rafter, Othello.
Andante, where’s Santy’s goatee?
Avernum won’t spurn us, hurrah!
Je n’ai pas un mouchoir, tee-hee,
Prosaic Hebraic papa.

Bo: Why does Jones keep staring at his plate all of the time?
Hunk: Doctor’s orders.
Bo: What!
Hunk: Yeah, the doctor told Jones to watch his diet.

Dr. Halladay: I call my eight o’clock Anatomy the Pullman class—three sleepers and an observation section.
Dr. Steffen: Very apt. I call my nine o’clock Path the pony express.

She: Is my nose shiny, dearie?
Him: No, but your right knee is dusty.

The height of painlessness is a splinter in a wooden leg.

Prof.: This is the third time that you have looked on Smith’s paper.
Stude: Yes, sir, he doesn’t write very plainly.

I WONDER

I wonder if bacteria
Have any sex appeal,
Or are subject to hysteria.
I wonder if bacteria
(Scarlet fever or diphtheria)
Ever tried a kiss to steal,
I wonder if bacteria
Have any sex appeal.

ENGRAVERS  ELECTROTYPERS
In Parting

We have endeavored to make this, the third volume of The Stillonian, truly representative of Des Moines Still College. We have tried to make it correct in every detail.

We hope that even though some of the sections may displease you, some typographical errors cause you momentary displeasure, or there are some omissions which you consider inexcusable, if you are pleased with it as a whole, if the changes have improved it, and if the good results exceed the blunders, then we will have fulfilled our mission.

The members of the staff have been loyal in their work and have spent many a sleepless night, and many a long day, collecting the items so that you might have a more representative book. The student body and the Faculty have given us their heartiest cooperation. It has indeed, been a privilege and a pleasant task to edit and build this Stillonian amidst such surroundings.

F. Don Baylor, Editor.
E. Deane Elsea, Business Manager.

The Stillonian, the year book of D.M.S.C.O., is published by the Student body. It is a memorial to them and is representative of their love and loyalty to their school.

Unaided and without resource, except that which they make for themselves, the staff selected entirely from the student body, has made possible this publication. No truer devotion to their Alma Mater could be better demonstrated than the compiling of this beautiful book.
