FOREWORD

WHEN the hair turns gray and the eyes grow dim; when our work in alleviating the sufferings of humanity is accomplished, then may we look back upon the formative period spent in the halls of our Alma Mater and say, "I have done my best." If this effort to build a means of remembering those days, does it's work successfully, then our labors have not been in vain.

THE EDITORS.
DEDICATION

To

DR. JOHN M. WOODS

We respectfully and lovingly dedicate this Stillonian for his unceasing efforts in the work of advancing the school, the Therapeutics, and the Science.

At this strategic point Mrs. Robinson and her very able assistant, Miss Crawford, dole out the Treatment Tickets, the mail from home; when, as and if there be any, and once in a while sell a stamp for one of those requests to the folks for some of that necessary evil, money.

In the inner "sanctum sanctorum" Mrs. Robinson holds forth on her throne giving out at times information regarding conditions, failures and time credit.

Without this office, the college would be like a ship without a rudder. It and its force are very much integral parts of the machinery of our institution. Through this office the business of the various clinics is carried on and kept straight, and very ably, too.

**Clinic Assistants**

**General**
- R. A. Lypp
- C. C. Auseon

**Gynecology**
- Lilian B. Tracey

**Obstetrics**
- J. E. Shaffer
- H. H. Jennings
- J. F. Martin

THE STUDENT BODY

The students of D. M. S. C. O. form a representative group, coming as they do from all parts of the United States, twenty-five states being represented, and some from England, Canada, Sweden and even Czechoslovakia. All walks of life are represented but a majority of the students have attended some college or university before entering D. M. S. C. O. We are proud of our student body and know that our graduates will be the equals educationally of the proponents of other modes of the healing art.

A table showing the enrollment of D. M. S. C. O. by States might be of interest and is as follows:

SENIOR CLASS HISTORY

LONG ago Shakespeare, master psychologist, said, "There comes a tide in the affairs of men, which, taken at the flood, leads on to Fortune."

It might seem that, looking on over the centuries, he foresaw the approach of September, 1925, for then began the Tide for the most August Seniors of 1929.

Pausing briefly to recall the first of the long four years now passed: with what reverence and indeed awe, did we admire and envy the upper classmen nobly practicing our Profession, listening avidly to the words of wisdom so carelessly bandied about in their frequent gatherings. How eagerly our worthy class yearned for the thrill of such power of knowledge, what marvelous feats of skill became our goal. To think that in only four more years we too might achieve such heights whence we might propound wisdom with all the weight of finished Technicians.

In fact, it would appear, that since knowledge is power, we Freshmen would move the Universe, and that, shortly.

After the usual dire pronouncements of our hated oppressors, the Sophomores, the first of our semiannual skirmishes with Mrs. Robinson, a smile from the genial Rosemary and a costly visit to our ever-present Book-Store Bandit, about fifty young men and women were safely launched on the Still College voyage, a non-stop cruise to Success, or what have you.
Our class, in the immemorial manner of Homo Sap, inevitably began the attraction of like to like, until presently there emerged from the mass three groups bound by the ties of common tastes. Those who expect to study, those who do study and the others, a peculiar but true situation.

The months go on, a few drop overboard. The rest, settled for the long grind, carry on, until under the skillful hands of our faculty we disembark. Achievement infinite, a full fourth of the knowledge of the ages absorbed, digested, forgotten.

As Sophs, realizing the subjugation of the Fresh a paramount necessity, our efforts still remain green in memories. A tribute to thoroughness is the present Junior Class. The important business of the year thus successfully carried to completion, the unsatisfiable thirst must be assuaged; more knowledge and still more.

Ambitions nearly realized, locations now looked for, the burden of nearly two years' training heavily weighting drooping heads. No time now to be lost in equipping the ideal office in the ideal location. And so we part again the proud possessors of practically all knowledge.

Juniors now. Indeed we have chosen the propitious years to spend in Still. Secret plans long hoped for by our Faculty have reached their culmination in a fine, new College building, worthy the name, a credit to the Profession.

Alackaday, enthusiasm wanes, no patients yet await the supreme benefits of our skill. Will we ever reach the goal? Shall not our perseverance be ultimately rewarded? Poor suffering humanity so long awaiting us!

Eureka! The first patient! What tender care; what difference that a score of Doctors had failed here. Ah, the symptoms, aye, there's the ''rub''. What is it? Strange, with all our erudition the thing eludes us. Treatment, how, why, what and what for?

The inevitable visit to our staunch advisors, the Faculty. Failure stark and dismal. Where indeed is this acquired, long gloated over wisdom?

Seniors—Freshmen, allies, bound by the ties of realization that all knowledge is not ours.

A truer and riper ability now, unashamed to confess ignorance, at last at the beginning of the long search for the phantom, Perfection.

Wearyed from efforts, futile, yet spurred on by the grim Spectre, State Boards. Uncertain as to future, but facing it as bravely as may be.

Friends parting, long associations severed. Sadness.

Still College Faculty and Friends, we honor and salute you!

CLASS HISTORY

DURING the latter part of January, 1926, eleven young people, four ladies and seven men, appeared at the portals of old Still College on Locust Street. Having heard and seen much of the wonderful science of Osteopathy, and the wonders it had done for suffering humanity, they determined to delve into the depths of its mysteries and prepare themselves that they might do their share toward alleviating the pains of the ill. With high ideals in mind they set out to accomplish what proved to be a long and arduous task.

After the first few weeks of fright and mystification all were established and beginning to burn the midnight oil. Most of them soon had affiliated with some fraternity or sorority.

Toward the end of the first semester several became deflated in purse or spirits and awaited impatiently for the close of school, though most of them were becoming a part of the college.

The following Fall, four men failed to return. Two needed more money and did return to the following class. The other two chose a different field. In January two new members joined the ranks. At the beginning of the next term another failed to appear, this time a young lady, but the ranks were filled by the entrance of several others. The following semester another girl dropped out, thus leaving only five of the original members. These, however, promised to finish the course. At present there are twelve in this group.

The outstanding social event took place on December 14, 1928. It was a private party and all present had a hilarious time. One of the co-eds failed to attend and will always regret missing the "One Big Party."

It won't be long now.

CLASS HISTORY

In the month of September, 1926, there came to the halls of D. M. S. C. O., a group of young men and women in search of higher learning, representing a large number of states, from Oregon to Maine.

So began the freshman year of the class of '30 with 36 members, that year being filled to overflowing by the learning of a new philosophy and language. During the first semester things were especially interesting because of the edicts issued by the mighty and cruel Sophs, intended to instill into the Fresh greater reverence and respect for the upper classmen and the school. The Sophs were very enthusiastic and playful, even resorting to the crashing down of a door at midnight, to get a poor helpless freshman. The yoke was gently but firmly cast off when the first year men defeated their tormentors in the annual pushball contest on Homecoming Day. The leadership of the class was first bestowed upon Skinner and then upon Taylor.

The Sophomore year began with a renewed determination, especially because the board of trustees of the school had, through their untiring efforts, acquired a beautiful new school building. As usual Fate had decreed that some of the original class should never return, and still others be temporarily detained. During that year, the Sophomores gave their support to buying the projectcope equipment for the school and were quite active in student and fraternity affairs. Weir was president during the first semester, Johnson during the second.

The Class of '30 entered its Junior year with even greater enthusiasm than previously, because theories and sciences studied in the first two years were to be put into actual use. Several members were appointed to the Stillonian staff, and others were identified in various student activities. The Annual Junior Prom was a notable social function of the spring term, in paying final respects to the graduating seniors. The class presidency was held by Clark and Frye successively.

Such is, in brief, the log of the Class of '30, as it continues on, striving to be an asset to its Alma Mater and the profession at large.

THE STUDENT BODY
STILLONIAN DAY

ALMOST constantly from the beginning of the school year to its close we hear many things about the new STILLONIAN. What it will be, about the subscriptions, snapshots, jokes, fraternity activities, and everything in general pertaining to its completion. At times this becomes monotonous and extremely burdensome, but when all the material mentioned is compiled and the book goes to press we look with great anticipation to the day we can get the book for our own inspection.

Friday, May 18, 1928, was set aside for this great day of expectation. The assembly was turned over to the STILLONIAN staff, who had charge of the various exercises and the passing out of the books.

In the afternoon the faculty baseball team played the victors of the Fraternity-Nonfraternity series, who were, by the way, the boys of the Iota Tau Sigma house. This event is always of great interest to the onlookers. This is one chance for the students to "show up" the faculty.

At 8:30 p.m. the Stillonian dance, sponsored by the Sigma Sigma Phi, was held at the Hoyt Sherman Place. The music was rendered by the "Romance," who also played at the annual Junior-Senior Prom at the Commodore Hotel.

Everybody had a very pleasant day as it was practically the last day of classes until the new semester began in September. It also marked the completion of the activities of the Senior class with the exception of Commencement, May 24. Happy day!
The Assemblies at Still College have for some time been improving at a very rapid rate. Last year Mrs. Innes, our genial Director of Laboratories, announced that all the material necessary for a real Assembly was to be had right here in our own student body. This has been well proven.

Starting in September with the introduction of the faculty to the new students, to the last Assembly of the school year which was in charge of the graduating class, ample proof has been offered that this period of relaxation is one of the most popular with the student body.

A great variety of material was displayed to everyone's satisfaction. This variety was composed of such important factors as our own well balanced Band, ably directed by Dr. "Virg" Halladay; the school orchestra of five pieces; individuals with talents such as dancing, singing and playing.

An assembly of great interest was that when each new member of the new Freshman Class introduced himself and told which was his native state. The representatives from Ohio as usual received a mammoth ovation.

We have been favored by having several members of high standing of the American Osteopathic Association appear before us and give us words of cheer and information. Among these were Dr. D. L. Clark, President of A.O.A., and Dr. C. N. Clark, Business Manager of the A.O.A.

At several Assemblies we have been privileged to hear such outstanding members of the clergy as Rev. E. G. Williams, of the Westminster Presbyterian Church, and Rev. C. E. Rash, of the Federated Church.

As a departure from the everyday routine Dr. Spring invited Pilot Anderson from the Air Mail Field to tell of some of his experiences. Pilot Anderson took us to the heights and returned us safely to earth again.

Unquestionably Assemblies at Still College this past year have been of the type that will last long in our memories.
THE Log Book is a four page paper published bimonthly by D. M. S. C. O. and sent gratis to the entire profession. It would be impossible to state the contents of it in the space allowed here. But grossly it is a means of communication between the student, faculty, and profession.

It has proven itself beneficial as a means of enlightening the student doctors with practical advice from both the field physicians and the faculty. The Log Book also keeps the alumni in closer touch with the social, fraternal, and school activities.

Much credit for this publication's success is due its editor, Raymond Kale, who so willingly and efficiently constructed its columns. We regret that we will not have Ray with us next year.
OUR annual Homecoming, an important event, was staged on Thanksgiving Day, November 29, 1928. A varied program was planned for the Kirksville aggregation and for our Alumni. The profession at large was invited to inspect our new building at any time during the day and many took time from the other parts of the program to take advantage of this invitation.

Sigma Sigma Phi offered a Loving Cup for the most original and uniquely decorated fraternity house. Competition was keen and the results were three well decorated houses. The judges were unanimous in their decision and the Atlas Club was awarded the cup, and well deserved it.

Following the luncheons sponsored by the various fraternities for their alumni and visitors, everyone's mind turned to the clash between the Pirates and the Rams which was called at 2:30 p.m. Avenging last year's defeat, the Rams pounded their way to a 21 to 0 victory over the Pirates. The Rams' very apparent superiority, along with the efforts of Jupiter Pluvius, made our efforts to gain futile.

Regardless of the outcome of the battle in the mud, the best of sportsmanship was shown at the banquet given by the trustees of the College to the teams and their coaches. Music was rendered by the D.M.S.C.O. band, under the direction of Dr. Virg Halladay. Speeches were forthcoming from President C. W. Johnson, Dean J. P. Schwartz, Coach Sutton and Coach Meyers of Kirksville.

The last scene was held at the Cotillion Ballroom where a dance, sponsored by the "S" Club, closed the day's activities. It was here that the cup for the best decorated fraternity house was awarded. After the singing of the Still College song and the playing of "Home, Sweet Home," the curtain was lowered to the final words, "What a day!"
SIGMA SIGMA PHI HONOR AWARDS

EVERY educational institution has within it an organization to help to inspire its students to do more and better work. Such is the case at Still College, Sigma Sigma Phi being the organization.

In its capacity as an honorary fraternity, Sigma Sigma Phi presents a medal for Service to one member of each graduating class, for rendering the most service to the school and to the profession while yet a student.

The award for Service in the Class of May, 1928, was to Dr. G. O. Smith, and in the Class of January, 1929, to Dr. R. A. Lyppps. Both recipients were well deserving of the honor.

The Sigma Sigma Phi medal for Proficiency in the Practice of the Science of Osteopathy, like the medal for Service, is awarded to one member of each graduating class. Besides the qualifications for proficiency the recipients must have spent their entire four years in Des Moines Still College of Osteopathy. This honor was bestowed upon Dr. H. A. MacNaughton from the Class of May, 1928, and upon Dr. J. R. Shaffer from the Class of January, 1929.
THE TREND TO OSTEOPATHY

WHAT an interesting character the present day Osteopathic student is. He is in the midst of a busy world full of opportunities and many occupational choices. Fifteen hundred young men and women have chosen Osteopathy as their vocation, and are now gaining the knowledge of the science in seven colleges scattered over the country. Osteopathy is only fifty years old, and there are now eight thousand practitioners in the field. This phenomenal rise has been made possible by successfully treating the public over this period.

Why are there fifteen hundred students studying Osteopathy? Of course many young men and women go away to school because it is customary at the present age. It is true however, that only a few students are studying this new healing science for that reason, there are more fundamental factors.

Parental influence has persuaded some to study Osteopathy. Surely when a loved one has been saved it is natural that the parents feel profoundly that here is something upon which they are willing to have either son or daughter stake their future. Indeed marvelous results, as well as sentiment has brought students to the profession. Good work on the part of the field physician often awakens the high school student to the possibilities for a future occupation, and many of the college students have entered the schools on their own volition.

There is however, a greater reason why we have a rapid trend to Osteopathy. Happily there is an inherent altruistic nature in those who are doctors. The greatest joy of living comes in serving others, of having made some one else happy and comfortable. There is no other field of endeavor that surpasses the healing art in this respect.

There is an inherent characteristic of individuals that manifests itself in the desire to accomplish great deeds, and it matters not in what enterprise one is. Great structures rising into the skies are really monuments of engineering skill in which many factors are involved, and which require the keenest of thinking. Money, fame and a host of other factors are secondary. Accomplishment is the motive of all men in doing great things. So, too, the Osteopathic students realize early in their work that they are master builders, not of marvelous skyscrapers, but of worn out and dilapidated bodies. A sick body made well again is the greatest monument of achievement, surpassing the great steel structures which have only age as their ailment. Human ills are mystifying, and require the greatest of care.

Standing alone fifty years ago with the courage of his convictions firmly established, the "Old Doctor" began the new science which is now accepted by the civilized world. The more that is learned of him, the deeper it is felt that to carry on his work is our principal duty, and the main reason why we are Osteopathic students.
THE BAND

As for the success of the D.M.S.C.O. band this year, there is no argument to the statement, "it was the best band we ever had in school." Under the direction of Dr. H. V. Halladay we were able to do some very fine work. Dr. Halladay found it quite difficult to arrange his program for band meetings but did it with willingness. The students also had to rearrange their time in order to rehearse. However, the entertainment offered the school by the band as well as each individual member, makes each one fully repaid for this inconvenience.

Dr. Halladay and Dr. Johnson made possible the purchase of the bass drum, and the school as a whole contributed money to buy the bass horn, without which important items the band would have been an impossibility.

With this equipment, plus a good library of music, it is very evident we will have a band next year which will even surpass this year's.

On behalf of the band, I wish to thank the faculty and students for the appreciation they showed the band by their hearty ovations, which were given on the several appearances. In addition to this Dr. Halladay deserves a great deal of credit as he acted as conductor par excellence.
THE Panhellenic Council, formed in September, 1924, for the purpose of bringing the fraternal organizations together in perfect organization, as well as to bring harmony throughout the student body, has been performing its function well. Each semester, each fraternity elects one representative who holds office on the Council for one year, thus each fraternity has at all times two members. The goodfellowship brought about by the monthly meetings is noteworthy.

During the past semester, Still Square of National Square and Compass, the Masonic fraternity of Still College, was admitted to full representation on the Council, thus making the Panhellenic Council truly representative.

THE DES MOINES GENERAL HOSPITAL

The Des Moines General Hospital, located at East Twelfth and Des Moines Streets, is ideally situated close by the Iowa State Capitol and Historical buildings overlooking the spacious Capitol Extension grounds. The site and building formerly belonged to the Adventists and was operated as the Iowa Sanitarium. Appropriate changes were made in the building in order that the scope of the building, as an Osteopathic institution, might be broadened.

The hospital is controlled by a board of trustees which include Doctors J. P. Schwartz, J. L. Schwartz, H. J. Marshall and F. J. Treenery, the first three of whom serve as president, treasurer, and secretary, respectively.

The equipment of the institution is such as to avail its services to the profession in the broadest possible manner. The laboratories, X-ray and physiotherapy departments are under the supervision of Dr. B. L. Cash. Blood chemistry, urine analysis, serum reactions, basal metabolism and many other procedures fall under the daily routine of the laboratory. The physiotherapy department is equipped to do radiation by X-ray, Ultra Violet, Infra Red and Diathermitization. This department also has sixty milligrams of radium and is prepared to do both deep and superficial application.

Possibly the most outstanding link between the school and the Hospital is the extensive surgical clinics held three days a week. The students assist in much of the minor surgery and witness the major operations. Over 2,000 cases were operated in the clinic last year, of which 125 were major operations.

The cooperation between the school and the hospital makes it possible for the student to learn to feel at home in the operating room as well as to grasp the principles of sterile technic, anaesthesia, and all types of operative surgery as well as the numerous other procedures that make up the daily routine of a busy hospital.
THE general clinic at Des Moines Still College of Osteopathy is one of the strongest links in its chain of instruction. Each individual student has ample opportunity to observe the progress and treatment of a multitude of diverse types of human disorders, as well as to actually administer the treatment himself.

Beginning with the Junior "A" term the student is required to attend clinic. From time to time he is assigned patients for whose treatment he is responsible. The college laboratory is equipped with special benches and equipment with which the student may carry on any laboratory work deemed necessary in the management and diagnoses of the cases under his care. Six hundred treatments are required for the student to give during his last three semesters of school life. It is quite evident from this that the upper classmen are individually busy with a well-supervised practice so that by the time their required treatments are obtained they have obtained a high degree of proficiency as Osteopathic Physicians.

As well as the general clinic there are the specialized clinics. Among these are, gynecologic, obstetric, surgical, and eye, ear, nose and throat clinics. Of these the Obstetric and Surgical clinics are the biggest.

During the school term of 1928-1929 over 900 patients were examined in the school clinics and received treatment from students. This figure speaks for itself in demonstrating the wealth of material presented to our students in the way of clinical work. Many of the students have far surpassed the amount of treatments required by the school. This is one of the reasons that Des Moines Still College graduates make proficient and dependable physicians.
OF THE specialized clinics the obstetrical clinic is probably the most noteworthy. For the year of 1928-1929 more than 200 cases were handled in this department. Upon registration the case is assigned to a senior student who manages it throughout its entire course. In this department the college requires the student to make a minimum of two deliveries and to have been in attendance at an additional six cases.

During the past year, the following students have held the position of Assistant O. B. Clinician: J. R. Shaffer, H. H. Jennings, J. F. Martin, H. J. Johnson, Jr., N. B. Welch.
The General Clinics of Des Moines Still College are under the direct supervision of Dr. C. W. Johnson and Dr. H. V. Halladay. These two men are well known in their respective fields throughout the Osteopathic, and even in the Medical Profession.

The Clinic patients are examined by the following:

Dr. C. W. Johnson..................Neurology and Gynecology
Dr. H. V. Halladay........................Orthopedics
Dr. Robert B. Bachman....................Obstetrics
Dr. Mary Golden............................Pediatrics
Dr. H. J. Marshall........................Eye, Ear, Nose and Throat
Dr. J. P. Schwartz......................Urology, Proctology and Surgery
Dr. J. E. Cochran........................Proctology
Dr. C. I. Groff..............................Podiatry
Dr. B. L. Cash..............................X-Radiance
Mrs. Z. A. Innes............................Laboratories

The College furnishes a room on the fifth floor of the building for four students who are on duty at all times between the hours of 5:00 P. M. and 8:00 A. M. on week days, and at all hours on Sundays and holidays for the purpose of answering any emergency telephone calls. These calls are usually obstetrical cases being reported. It is then the duty of the aides to call the O. B. crews together.
OF THE specialized clinics the obstetrical clinic is probably the most noteworthy. For the year of 1928-1929 more than 200 cases were handled in this department. Upon registration the case is assigned to a senior student who manages it throughout its entire course. In this department the college requires the student to make a minimum of two deliveries and to have been in attendance at an additional six cases.

During the past year, the following students have held the position of Assistant O. B. Clinician: J. R. Shaffer, H. H. Jennings, J. F. Martin, H. J. Johnson, Jr., N. B. Welch.
THE General Clinics of Des Moines Still College are under the direct supervision of Dr. C. W. Johnson and Dr. H. V. Halladay. These two men are well known in their respective fields throughout the Osteopathic, and even in the Medical Profession.

The Clinic patients are examined by the following:

Dr. C. W. Johnson…………………………Neurology and Gynecology
Dr. H. V. Halladay…………………………Orthopaedics
Dr. Robert B. Bachman…………………………Obstetrics
Dr. Mary Golden…………………………Pediatrics
Dr. H. J. Marshall…………………………Eye, Ear, Nose and Throat
Dr. J. P. Schwartz…………………………Urology, Proctology and Surgery
Dr. J. E. Cochran…………………………Proctology
Dr. C. I. Groff…………………………Podiatry
Dr. B. L. Cash…………………………X-Radience
Mrs. Z. A. Innes…………………………Laboratories

The College furnishes a room on the fifth floor of the building for four students who are on duty at all times between the hours of 5:00 P. M. and 8:00 A. M. on week days, and at all hours on Sundays and holidays for the purpose of answering any emergency telephone calls. These calls are usually obstetrical cases being reported. It is then the duty of the aides to call the O. B. crews together.
I have only one word to say
To this class so young and so fair,
I have only one word to say
And that one word is "Beware."

Down in the dungeons below
Is a dreadful, direful lair,
Where a terrible dragon is crouched,
Oh, my dear young friends, beware.

A dragon of ghastly white,
With one rolling, fiery eye,
That eats young students alive,
Friends, are you prepared to die?

Sharpen the sword of your wits,
Make your shield of attention bright,
So shall you pass to the depths of that lair
Armed and apparelled for fight.

And when, the agony o'er,
You rise to the upper air,
With a shining "100" on your shield,
And your record writ large and fair,

You shall hear, if you listen close,
The dragon's low, baffled moan
As it crouches again at the door of the lair,
And waits—alone—alone

For other young victims of wrath
Who will come, as you came, to the fray,
And using their armor of youth and of bluff
Make, as you made, a good get-away.
LABORATORIES

IN LINE with the forward looking policy of the institution, the laboratories are fitted up to give the student the maximum amount of practical work. The Chemical Laboratory, on the first floor, provides room for sixty students to work simultaneously, with individual, acid-proof desk, locker, running water, reagents and equipment. In the same room is desk space and equipment for the use of upper classmen, so that they may do all necessary laboratory work for their clinic patients. Emphasis is placed on the advantage of making urinalyses, blood counts, etc., in these cases for the purpose of confirming diagnosis.

Adjoining the Laboratory is a large, light supply room with ample reserve supplies and desks for special work. Demonstration lectures are given in the large pit, where a desk with water and gas is installed.

On the fifth floor are two large rooms where microscopic work is done. Here each student is provided with an up-to-date microscope, and the lighting arrangements are such that work can be carried on regardless of the time of day or weather conditions. About three thousand new histological and pathological slides, comprising fifty varieties of tissue, have been added to the supply this year, so that each student can retain his slide until he has studied it thoroughly.

Laboratories in Inorganic, Organic and Physiological Chemistry and Laboratory Diagnosis are conducted by the Laboratory Director, Mrs. Z. A. Innes. Pathology and Biology by Dr. W. J. Nowlin, Histology by Miss Ava Johnson, and Bacteriology by Miss Johnson and Mrs. Innes jointly.

The Anatomy Laboratory, in charge of Dr. H. V. Halladay, has ample material at all times, and dissection is one of the most satisfactory courses given.

Thanks to the enterprise of two of our students, Mr. Fred Martin and Mr. W. E. Madsen, a room has been fitted up for the use of the Projectoscopes donated by the students last year. Mr. Martin prepared both wall and portable screens for showing the slides and Mr. Madsen built light-proof screens for the windows. The Faculty are taking full advantage of the help thus available for making clear obscure points.

Under the system installed by Mrs. Innes the students are trained from the beginning to keep their laboratory desks and surroundings clean and in order. Such work along this line as cannot be handled by the students is taken care of by a small but efficient laboratory force. During the fall semester this year the work was in charge of Mr. Victor Reeder, with Mr. Howard Cook as assistant. For the spring semester, Mr. Cook was in charge, assisted by Mr. Lane Moore.
There was a time in the history of the college that the dissection room was far from a busy place. Bodies were hard to get and it was difficult to furnish the student with the amount of work along this line that was required by the state. Such is not the case at the present time. Anyone glancing into the laboratory now will see a full quota of bodies and the tanks in the storage room contain an overflow of material to be used by the next class.

According to the present schedule each student dissects a lateral half of the body and is required to put in 250 hours in this work. During the regular college year the class meets at three o'clock and is given a lecture on the day's work. This consists of directions as to how the work shall proceed together with the main practical points to be brought out. Students are cautioned against working too fast, for the one thing that may mean success or failure in practice may be overlooked if any part of the work is neglected.

A note book is required of each student, questions being furnished and the answers supplied as the dissection proceeds. Final grades are awarded on the basis of attendance, class of work, note book and final examination.

Dr. Halladay is in direct charge of the laboratory and is assisted by prosectors who have completed the work and show a deep interest in the laboratory. During the past year one hundred forty-eight students have completed their laboratory work in this department.
ATHLETES -
PIRATE ACTION
COACH FRANK R. SUTTON received his A.B. degree from Marietta College in 1915 and his Master’s degree the year following. While in college he majored in Chemistry, the subject he has taught at Still College during the past six years. During his college years he participated in four years of football, three years of basketball, three years of baseball and one year of track.

After leaving Marietta, he was Coach of Athletics at Marietta High School until 1921. On September 1, 1922, he was appointed Director of Athletics at Still College and has held this position ever since.

Our teams have won and our teams have lost under the reign of our coach, but whether they won or lost, they showed the ideals of sportsmanship that he had instilled into them.

Coach Sutton has enjoyed a successful athletic season this past year due to his untiring efforts and the entire cooperation of his men.
COACH SUTTON

COACH FRANK R. SUTTON received his A.B. degree from Marietta College in 1915 and his Master's degree the year following. While in college he majored in Chemistry, the subject he has taught at Still College during the past six years. During his college years he participated in four years of football, three years of basketball, three years of baseball and one year of track.

After leaving Marietta, he was Coach of Athletics at Marietta High School until 1921. On September 1, 1922, he was appointed Director of Athletics at Still College and has held this position ever since.

Our teams have won and our teams have lost under the reign of our coach, but whether they won or lost, they showed the ideals of sportsmanship that he had instilled into them.

Coach Sutton has enjoyed a successful athletic season this past year due to his untiring efforts and the entire cooperation of his men.
1928 GRIDIRON RECORD

The largest squad in the history of Still College turned out for football when Coach Sutton issued the first call on September 10th. About 50 men gathered at the old West High Stadium and went through the limbering up of the first night’s drill.

The return of so many of the members of last season’s varsity and a large amount of material from the Freshman Class gave hopes that the team would be able to come out on the long end of the hardest schedule that the coach had ever booked.

The time was short and Coach Sutton drove his men hard in preparation for the Parsons game only two weeks away. The Pirates journeyed to Parsons by bus and opened the season in a drizzling rain.

The game proved to be a battle of punting and line plunging and ended in a scoreless tie. Captain Shaw opened the game by kicking off to the Parsons 25 yard line. Parsons immediately punted and a fumble by Cronan nearly spelled disaster. The Pirates started a line plunging attack late in the second quarter and brought the ball to the five yard line as the half ended. The second half was a repetition of the first and the game ended with Parsons in possession of the ball on their own 35 yard line.
A two hundred mile trip to Midland College at Fremont, Nebraska, the following week-end proved to be too much of a trip for the squad and they went down to a 25 to 14 defeat. The game proved to be more thrilling than the score would indicate. The lead see-sawed back and forth until the last quarter. Entering the last quarter one point behind, Midland completed a 50 yard pass over the goal line for a touchdown and a few minutes later Brown intercepted a Pirate pass and sprinted 60 yards for the final counter. Hyink bucked the line for the Pirates' first counter and passed to Lang for the second.

Having an open date the following week Coach Sutton drove his men hard in preparation for the game with Penn Normal. The work proved of value and the Pirates pulled the biggest upset of the season by defeating the former Nebraska Conference champions 16 to 12. This was the first home game of the season and the boys were on their toes, taking advantage of every break. The Bobcats' counters came in the first period by an 18 yard pass and in the final quarter by a line plunge through the center of the line after carrying the ball down to the two yard line from midfield by a series of line plunges and end runs. The Pirates made their counters in the second and fourth quarters. The first came when Shaw carried the ball through the center from the three yard line. Hyink's toe added the extra point. Hyink also added three more points in the same period by a dropkick from the 25 yard line. The final goal was chalked up in the last period after Lindbloom recovered a Bobcat fumble on their own 20 yard line. Hyink immediately went around his own left end for the touchdown.

The Pirates made it two in a row the following week-end by taking Trinity into camp to the tune of 13 to 0. Both teams battled on even terms for the first three periods, neither team being able to gain consistently. The last quarter found the Pirates in the fighting period which resulted in the marking up of two counters after marches down the field.
The Pirates proved they were no mud-hens by going down to defeat at the hand of Columbus College. Columbus presented a well balanced team which took advantage of every break enabling them to push over two touchdowns. The Pirates were overanxious and penalties robbed them of touchdowns twice when they were within the shadow of the goal. The game ended with the score at 13 to 0.
The mud again spelled disaster the following week when Buena Vista defeated the Pirates by a 6 to 0 score. The contest was played in a drizzling rain and on a field resembling a sea of mud much more than a gridiron. The Beavers counted late in the second quarter and that was the beginning and ending of the scoring activities for the day. The Pirates pushed the ball down to the 11 yard line late in the final period but were unable to put it across.
Back on a dry field once more the following week the Pirates defeated Iowa Wesleyan 13 to 0. It was the first setback for the Methodists in five starts.

The Pirates scored in the first quarter on a surprise pass from the 35 yard line, Hyink passing to Shaffer. The second marker came in the third quarter when Hyink carried and put the oval across from the seven yard line.

The student body was worked up for the grand climax on Thanksgiving Day, but alas, in the first place the weather man ordered a cold, raw day with a slight mist in the air which developed into a rain by the time the game had gotten under way. The Pirate aggregation put up a stiff battle but went down to defeat, 21 to 0, at the hands of a much smoother and faster team.

The Rams got into scoring position as the first quarter ended and scored on the second play in the succeeding period. The second touchdown was the result of an 80 yard run by a Ram after securong a punt on his own 20 yard line. The final marker was made by the aerial route in the third period. The Pirates rallied in the last quarter but were unable to penetrate the Kirksville defense.

So ended a successful football season, particularly considering the unusually stiff schedule, which proved to be our last. So mote it be.
THE Still College Pirates enjoyed a successful basketball season, winning eight and losing four games. A grand total of 394 points was amassed against a total of 369 for their opponents. No team on the schedule was able to get more than an even break with the Pirates, South Dakota U., Western Union and Kirksville achieving this success.

The team made two road trips, both of which were successful. On the northern trip, Buena Vista, Western Union and South Dakota U. were encountered and the first two named were conquered.

The season was brought to a grand climax by a return engagement of two games at Kirksville, in which the Pirates avenged the two defeats administered to them earlier in the season. Both games were close throughout and the first was forced to an overtime period before the Pirates gained the victory.

It would be hard to pick out an individual star of the season. Captain Davis and Fred Benz were the chief point getters but were ably assisted by Jagnow, Hyink and Lang.

With the loss of Captain Davis only, from this year's squad, a most successful season should be enjoyed next year.

CAPTAIN HAROLD DAVIS  (Davey)

Drawing to a close a brilliant career, a fast floor man, accurate shot and a fighter. We will miss him next year.

FRED BENZ  (Freddie)

We will have the follow-up shot Freddie with us two more years. He is an all around man and played every position on the team this year.

CLYDE HYINK

A first year man who fitted right into the shoes vacated by Red Smith last year. Clyde worked well with the boys and is a good shot.

R. E. JAGNAW

Another first year man who will be of great aid for the next year. He delights in taking the ball off the bank board for a follow-up shot.

RALPH LANG

One of the best guards to ever wear a Still uniform. Red has one more year and will be in there fighting all the time.
Herbert Murray

Another first year man but one with plenty of pep and go. Herb should make a real Pirate next year.

Paul Wynn

With this year's experience Joe should be a contender for a regular berth next year. He is fast and a good floor man.

Raymond Lamb

Faithful to the end. Always out for practice and ready to step in when needed. Ray should be a regular next year.

Gordon Dubois

Duey was out of school the first semester but made up for lost time when he returned. He is a fighter and watches his man like a hawk.
THE Sigma Sigma Phi Baseball Trophy moved into the Iota Tau Sigma house for the year succeeding the series of games, after resting in the arms of the Non-Frats for two consecutive years.

The Atlas Club defeated the Phi Sigma Gamma nine in the opening game, 12 to 3. The second game proved to be an exciting affair between the Non-Frats and Iota Tau Sigma and ended in a deadlock of 3 to 3 after six innings of play.

The I. T. S. nine next met the boys from Phi Sigma Gamma and had little trouble defeating them 13 to 3. They next met the Non-Frats in another game and defeated them, 9 to 0. The following day the Atlas and I. T. S. nines clashed and Bob Ross pulled an iron man stunt by pitching his team to two shut-out victories on consecutive days, the Iota Tau Sigma aggregation thereby winning the championship undefeated.

Ross, Hovis, Smith, Lang and Cudden were the outstanding stars for the championship team.

The game between the Non-Frats and the Atlas Club was postponed on account of weather conditions so the result of the season found the I. T. S. in first place, the Atlas and the Non-Frats tied for second and the P. S. G. in the cellar with no games won.
FOR the second consecutive year, Willard Hydeman won the Halladay Golf Trophy. The Tournament was played on the Waveland Course and proved to contain many exciting matches. Hydeman and Rose reached the finals by defeating Spaulding and Dubois. Hydeman had very little trouble defeating Rose in the finals.

After much delay, due to climatic conditions, the Tennis Tournament got under way with twenty-eight entrants. Harvey, St. Amant, Shaw and Ward were left at the semi-finals after some hard fought matches. Harvey and Shaw won the right to play in the finals by defeating Ward and St. Amant.

The final result was that J. D. Harvey won over D. N. Shaw and is the possessor of the Schwartz Tennis Medal.
MESSAGE TO ALUMNI

Dear Alumni:

Once again, after a lapse of a few years, there is incorporated in the STILLIONIAN an Alumni Department. In our opinion, a big part of any Year Book is this division, giving a more or less complete and accurate directory of men and women who owe allegiance to our Alma Mater, Still College.

It is the hope of the Staff of the 1929 STILLIONIAN that this will become a permanent part of all STILLIONIANS in the future.

We also know that the following Directory contains many inaccuracies, in names and in addresses, but if you who are out in the field, though busy, will send in any corrections that are necessary, the list of Alumni in the next Year Book will be better and correct.

Particularly because of the fact that Des Moines is the site of the National Convention of the American Osteopathic Association this year, we hope that this Alumni Directory will receive your approval and also the necessary corrections.

Au revoir until we see you at the Convention.

THE STAFF.
[It is hoped that this directory will be a regular feature of THE STILLIONIAN. It is incomplete and contains many inaccuracies. With these faults eliminated, the directory should prove of value to those in the field. To this end the staff requests your co-operation. Will every Alumnus help by sending in his name, address, and year of graduation?]

A DES MOINES SKYLINE
AOA Convention
1929
CONVENTION CITY
14th Annual Meeting of the American Osteopathic Society of Ophthalmology and Otolaryngology

JUNE 11, 12, 13, 14 AND 15
HOTEL FORT DES MOINES, DES MOINES, IOWA

Tuesday, June 11

Special Examination Clinics at Hotel
8:00 a.m. to 12:00 p.m.

Room 1. T. J. Ruddy.
   Assistant W. W. Howard, Alternate S. G. Biddle.
Room 2. C. C. Reid.
Room 3. Charles M. LaRue,
   Assistant Wm. H. Schultz, Alternate W. V. Goodfellow.
Room 4. J. D. Edwards.
Room 5. Case Histories.
Room 6. 12:30 LUNCHEON. MEETING OF BOARD OF TRUSTEES.
   3:00 to 5:00 p.m.

   Assistant J. H. Bailey, Alternate W. O. Meñaria.
Room 2. John Deason.
   Assistant Eva W. Magoon, Alternate P. F. Kani.
Room 3. L. S. Larimore.
   Assistant Y. Castillo, Alternate L. V. Cradit.
Room 4. A. C. Hardy.
   Assistant P. D. Schoonmaker, Alternate C. A. Blind.
Room 5. Case Histories.
   6:30 P.M. DINNER. MEETING. PROFESSIONAL PROBLEMS.

Wednesday, June 12

Surgical Clinics at Hospital
7:00 to 9:00 a.m. Operations

Room 1. J. D. Edwards, Table A.
   A. C. Hardy, Table B.
Room 2. J. M. Watters, Chair 1.
Room 3. C. Paul Snyder, Chair A.
   C. B. Ewing, Chair B.

Examination Clinics at Hotel
7:00 to 9:00 a.m.

Room 1. T. J. Ruddy.
Room 2. C. C. Reid.
Room 3. Charles M. LaRue.
Room 4. W. V. Goodfellow.

Assembly Clinic

Examination, Diagnosis, Prognosis, Treatment.
9:00 Convention called to order, announcements.
9:10 President's Address, E. C. Braun.
9:30 Personal Clinic—T. J. Ruddy.
10:15 Personal Clinic—Charles M. LaRue.
11:00 Personal Clinic—Stanley M. Hunter.
11:45 Personal Clinic—L. S. Larimore.
12:30 LUNCH.

Didactic and Lecture Program, Research Day
1:30 Electric Coagulation of Tonsils—John H. Bailey.
2:00 Questions and discussion.
3:00 Questions and discussion.
3:15 Cataracts—T. J. Ruddy.
3:45 Questions and discussion.
4:00 Mastoiditis—Kent L. Seaman.
4:30 Technic.
OPEN FORUM, Presided over by A. C. Hardy.
Sitting with the chairman will be: C. Paul Snyder, T. J. Ruddy, J. D. Edwards, Chas. M. LaRue, L. S. Larimore, J. M. Watters, E. C. Brann, J. H. Bailey, W. V. Goodfellow.

Members will have the privilege of asking any question bearing on the Eye, Ear, Nose, and Throat and calling on one or all of this group to answer. Anyone present will have the privilege of discussing any topic brought up. Here are some subjects suggested:

1. How best anaesthetize a nose for operation on septum, turbinates or sinuses?
2. What do with an ear that continues to discharge and remains stuffy after all ordinary methods have failed?
3. Diagnosis of fluid in the middle ear.
4. Why not remove acute tonsils even in quinsy?
5. Tonsil removal by electricity.
6. Headaches of nasal origin.
7. Cooperative work.

Thursday, June 13

Surgical Clinics at Hospital
7:00 to 9:00 a.m. Operations

Room 1. Charles M. LaRue, Table A.
Room 2. T. J. Ruddy, Chair A.
Room 3. L. S. Larimore, Chair A.
J. M. Watters, Chair B.

Special Examination Clinics at Hotel
7:00 to 9:00 a.m.

Room 1. W. W. Howard.
Room 2. C. B. Ewing.
Room 3. C. Paul Snyder.
Room 4. J. D. Edwards.

Assembly Clinic

Examination, Diagnosis, Prognosis, and Treatment

9:30 Personal Clinic—E. C. Brann.
9:45 Personal Clinic—C. G. Reid.
10:30 Personal Clinic—J. D. Edwards.
11:15 Personal Clinic—A. C. Hardy.
12:30 LUNCH.

Didactic and Lecture Program

1:30 Interesting Mastoid Case Histories—Illustrations—Charles A. Blind.
2:30 Operative Procedures in Mastoiditis and Complications—Lantern Slides—L. S. Larimore.
2:30 Lymphatic Pumps—G. V. Webster.
3:30 Diagnosis and Treatment of Sphenopalatine Ganglion Neureses—Channing B. Ewing.
4:00 The Development of the Nasal Accessory Sinuses—E. C. Brann.
4:30 Ethology and Conservative Treatment of Acute Maxillary Sinuses—H. R. Holloway.
4:50 Rhinitis—Charles M. LaRue.
5:20 Announcements.

EVENING

Public Welfare Program

7:30 Conservation of the Eyes of School Children—T. J. Ruddy.
7:45 The Relation of Tonsils and Adenoids to the Health of the School Child—C. C. Reid.
8:00 The Body as a Universe—W. Curtis Brigham.
8:15 Dietetic Problems of School Children—George V. Webster.

Friday, June 14

7:00 to 9:00 a.m. Operations

Surgical Clinics at Hospital

Room 1. Channing B. Ewing, Table A.
Room 2. T. J. Ruddy, Chair A.
Room 3. Stanely M. Hunter, Chair A.
J. D. Edwards, Chair B.
Special Examination Clinics at Hotel

Room 1. S. G. Biddle.
Room 2. W. J. Siemens.

Assembly Clinic
Examination, Diagnosis, Prognosis, and Treatment
9:00 Personal Clinic—W. V. Goodfellow.
9:45 Personal Clinic—C. Paul Snyder.
10:15 Personal Clinic—Kent L. Seaman.
11:15 BUSINESS SESSION. ELECTION OF OFFICERS.

Asthma and Hay Fever Symposium
1:30 Call to order and explanations.
1:45 Asthma, Hay Fever and—
the Proctologist—L. J. Bingham.
2:00 the Amoebic Infection—W. C. Brigham.
2:15 the Allergist—Serologist.
2:30 the Gastroenterologist—E. S. Comstock.
2:45 the Cardiologist—A. D. Becker.
3:00 the Lung Specialist—L. S. Chandler.
3:15 the Neurologist—J. Ivan Dufur.
3:30 the Endocrinologist.
3:45 Asthma, Hay Fever caused by other diseases (whooping cough, scarlet fever, diphtheria, influenza, pneumonia, adenoids, mouth breathing)—Phil R. Russell.
4:00 Asthma, Hay Fever and—
the Physiotherapist—C. E. Abegglen.
4:15 the Mechanotherapist—W. V. Webster.
4:30 the Nasal Accessory Sinuses—J. D. Edwards.
4:45 Asthma, Hay Fever as a Toxicosis—C. C. Reid.
6:30 "Ruddy's Evening of Hilarity."

Saturday, June 15
7:00 to 9:00 a.m. Operations

Room 1. Charles M. LaRue, Table A.
C. C. Reid, Table B.
Room 2. L. S. Laramore, Chair 1.
Room 3. J. M. Watters, Chair A.
T. J. Ruddy, Chair B.

Special Examination Clinics at Hotel

Assembly Clinic
Examination, Diagnosis, Prognosis, and Treatment
9:00 Personal Clinic—John H. Bailey.
9:45 Personal Clinic—J. M. Watters.
10:30 Personal Clinic—C. B. Ewing.
11:15 Personal Clinic—W. O. Medaris.

Afternoon
1:30 Osteopathy and the Insurance Problem—E. V. Whitingcr, Vice President Income Securities Corporation.
1:50 Subject to be announced—W. O. Medaris.
2:10 Methods of Exercise to Suggest to the Deaf—Eva W. Magoon.
2:30 Interpretations of Eye Conditions—C. E. Abegglen.
2:50 Osteopathic Treatment of Glaucoma—
3:10 Tonsils and Their Diagnosis—P. P. Kani.
3:30 Zinc Ionization in Pus Ears—L. R. Livingston.
4:00 Throat Surgery—Albert V. Kalt.
6:00 MEETING OF THE BOARD OF TRUSTEES.

Sunday, June 16
TRIP AROUND THE CITY
THE AMERICAN OSTEOPATHIC SOCIETY
OF PROCTOLOGY

J. P. SCHWARTZ, DES MOINES, PROGRAM CHAIRMAN
JUNE 13, 14, 15, 1929

Thursday, June 13

Discussion Will Follow Each Speaker

9:00-10:30—Registration. Payment of dues. Conferences. Get acquainted.
10:00-12:00—Call to order by chairman. Invocation. President's annual address. Appointment of committees. Announcements.
1:30-4:00—Consultation and History, S. V. Robuck, Chicago. Examination with demonstration, J. P. Schwartz, Des Moines. Clinics.

Friday, June 14

9:00-9:30—External Pathology (tabs, acute clots, abscesses, etc.), A. W. Clow, Washington, Ia.
9:30-10:00—Redundant Tissue, R. R. Norwood, Mineral Wells, Texas.
10:30-11:30—Pruritus Ani, Woodhall, Birmingham, Ala.
11:30-12:00—Fissure—Ethyl Chloride, Roy Wolf, Kirksville.
1:30-4:00—Clinics, Drs. Norwood, Woodhall, Wolf.
4:00—Business session.

Saturday, June 15

9:00-10:00—Internal Hemorrhoids (to be supplied).
10:00-10:45—Fistulae, James Cozart, Canonsburg, Pa.
10:45-11:15—Colitis and Colonic Therapy, E. Claude Smith, Topeka.
11:45-12:15—Autointoxication, T. G. Billington, Seminole, Okla.
1:30-2:00—Rectal Reflexes and Neurosis, Howard S. Dean, Denver.
2:00-3:30—The Business Side of Proctology, W. S. Childs, Salina, Kans.
2:30-3:00—Report of committees, election, etc.
3:00-4:00—Clinics, Drs. Schwartz, Clow, Dean.
6:30—Luncheon. After-dinner speeches.
7:30—Business session. Plans for 1930 program.

Clinics will be continued after the three-day session, by competent proctologists during the national meeting, at hours which will not conflict with the national program, but no new clinics will be accepted after the three-day session.
TENTATIVE PROGRAM

Thirty-third Annual Convention of the A. O. A.
Fort Des Moines Hotel, Des Moines, Iowa, June 17-22, 1929
CHESTER H. MORRIS, Chairman

THE CONVENTION PROGRAM

The plan of the general program for the Annual Convention at Des Moines gives a bird's-eye view of what is going on in the different sections of our association. There are fourteen sections in the American Osteopathic Association and the chairman of each will appear on the general program with a message of what that particular section has done, what it is for, and what it will offer during the Convention and during the ensuing year. Each of these men is a leader in his particular field and will not only give you a resume of the work of that section but will present a short scientific paper emphasizing the value of it as an adjunct of osteopathy.

The general program is well balanced and spaced. Each session of the general program will afford valuable material in the scientific papers presented by many of our nationally known osteopathic physicians in addition to those of the sections. The spacing of the general program is such that ample time is given to attend section meetings and to take advantage of their demonstrations, which are in the way of being post-graduate instruction.

The Deans of all of the colleges will be represented on the general program. Each man will bring a message about the particular college he represents. They have been asked to present one or two outstanding features peculiar to their schools. This part of the program should be very interesting as a side-light on the scientific work.

The general program may be a departure from the routine practice of other days, but it is hoped that it will interest even more than those of the past.

CHESTER H. MORRIS,
Chairman.
PHYSICAL THERAPY SECTION
J. E. Matson, Chairman, Minneapolis

Monday, June 17
DISCUSSION WILL FOLLOW EACH PRESENTATION
9:00—OPENING REMARKS AND HISTORY OF PHYSICAL THERAPY............ J. E. Matson, Minneapolis
9:30—ADAPTING PHYSICAL THERAPY TO OSTEOPATHIC PRACTICE.............. M. L. Hartwell, St. St. Joseph, Mo.
10:00—CLASSIFICATION AND USES FOR DIATHERMY IN GENERAL PRACTICE..... C. S. Compton, Cincinno, Mo.; Jas. E. Gray, Newton, In.
10:30—CLASSIFICATION AND USES OF GALVANISM............................ E. H. Eser, Chicago
11:00—CLASSIFICATION AND USES OF ULTRA VIOLET ENERGY................. H. R. Berston, St. Paul
11:30—ULTRA VIOLET IN DEFICIENCY DISEASES............................. O. E. Andrews, Ottawa, Ill.

Clinics.

Tuesday, June 18
9:00—VALUE OF X-RAY IN DIAGNOSIS........................................ Earl B. Hoskins, Chicago
9:30—ZINC IONIZATION IN MIDDLE EAR INFECTION........................... L. R. Livingston, Kansas City
10:00—PHYSICAL THERAPY IN THE CURE OF HYPERSTIFF PROSTATE.......... Jas. E. Gray, Newton, In.; J. E. Matson, Minneapolis
10:30—PHYSICAL THERAPY AS APPLIED TO THE TREATMENT OF THE FEET........ G. T. Groff, Mason City Ia.
11:00—INTESTINAL CONDITIONS TREATED WITH PHYSICAL THERAPY............ Florence L. McCoy, Wichita
11:30—DIATHERMY IN THE TREATMENT AND DIAGNOSIS OF ABDOMINAL AND PELVIC PATHOLOGY..................................................... E. M. Schaeffer, Detroit

Clinics.

Wednesday, June 19
9:00—ULTRA VIOLET IN CHILDREN'S DISEASES............................... F. C. Davis, Tauraw, Okla.
9:30—ULTRA VIOLET IN PREGNANCY.......................................... Mary Lou Logan, Dallas
10:00—VALUE OF AND INDICATIONS FOR X-RAY IN THE TREATMENT OF CERTAIN DISEASED CONDITIONS................................. H. E. Beckett, Lee Angeles
10:30—SURGICAL DIATHERMY OPERATION FOR HEMORRHoids.................... James M. Tyrer, Marion, Ill.
11:00—CAUTERIZATION FOR ENDOCERVICITIS, CYSTIC CERVIX AND EROSIONS...... W. C. Campbell, Mason City, Ia.
11:30—FOCAL INFECTION AND ITS CONTROL WITH GALVANIC AND ULTRA VIOLET................................................................. L. C. Kuehler, Albert Los, Minn.

Thursday, June 20
9:00—SURGICAL DIATHERMY TONSILECTOMY.................................. J. W. Hawkins, Laverne, Minn.
9:30—ACUTE ABDOMINAL INFECTION CONTROLLED AND CURED BY DIATHERMY AND ULTRA VIOLET......................................................... J. H. Vois, Albert Los, Minn.
10:00—TREATMENT OF ATHLETIC AND ACUTE INJURIES WITH DIATHERMY AND QUARTZ LAMP.............................................................. Wallace F. Kriegbaum, Minneapolis
11:00—RESULTS IN THE TREATMENT OF GALL STONES AND HEPATIC CONGESTIONS WITH DIATHERMY AND ULTRA VIOLET...................... W. W. Shepherdson, Minneapolis

Clinics.
11:30—TABES DORSALIS, RESULTS OBTAINED WITH DIATHERMY AND METALLIC BISMUTH............................................................... Dan Daily, Fremont, Neb.

Organization.
TECHNIC SECTION

Tuesday, June 18

9:00-9:30—Laws of Applied Force .......................................................... J. A. McDonald, Boston
9:30-10:00—Physiological Diagnosis ....................................................... R. R. Peckham, Chicago
10:00-10:30—Osteopathic Diagnosis .......................................................... P. V. Allen, Indianapolis
10:30-11:00—Lesion Pathology ................................................................. John M. Woods, Des Moines
11:00-11:30—Upper Thoracic Region ....................................................... J. O.:i:10 - J. J.:00 - L ES JO N P A' l'HOLOG Y .. ... .. .. .... .. .. .. .... P. Allrn , Tn d i:map o li:is
10:00-10:30—Ribs and Dorsal Area .......................................................... A. D. Becker, Kirksville
10:30-11:00—The Cervico-Dorsal Area ...................................................... A. F. McWilliams, Boston
11:00-11:30—The Thoracic Cage ............................................................. E. D. Heist, Kitchener, Ont.
11:30-12:00—Discussion ...............................................................................

Wednesday, June 19

9:00-9:30—Low Cervical and Upper Dorsal .............................................. Wm. Wood Curtis, Dayton, Ohio
9:30-10:00—The Dorsal Area ........................................................................ Wilbur J. Downing, Chicago
10:00-10:30—Ribs and Dorsal Area .......................................................... A. D. Becker, Kirksville
10:30-11:00—The Cervico-Dorsal Area ...................................................... A. F. McWilliams, Boston
11:00-11:30—The Thoracic Cage ............................................................. E. D. Heist, Kitchener, Ont.
11:30-12:00—Ribs .........................................................................................

Thursday, June 20

9:00-9:30—X-Ray Findings in Chronic Fifth Lumbar Lesions .................. E. R. Hoskins, Chicago
9:30-10:00—Lumbago ................................................................................ E. B. Shain, Chicago
10:00-10:30—Lumbar Lesions .................................................................... C. F. Spring, Des Moines
10:30-11:00—Lumbar and Sacro-Iliacs ....................................................... J. V. McManis, Kirksville

FOOT TECHNIC AND RESEARCH SECTION

T. L. Norrisup, Morristown, N. J., Chairman

The program of the Foot section will include the following speakers—D. L. Clark, Deaver;
H. R. Bynum, Memphis; John M. His, Columbus; C. I. Groff, Des Moines, and Mr. S. J. Brrou-
wer, Milwaukee. Each morning will be devoted to one speaker and followed by clinics or demonstra-
tions. Dr. His will operate a limited number of bunoc cases without charge, except for hospital care. Dr. Groff will have charge of all foot clinics at the conventions and clinic arrange-
ments should be made well in advance. Address Dr. C. I. Groff, Des Moines College of
Osteopathy, 720 Sixth Ave., Des Moines.
HUMOR
PRIZE AWARDS

BOB HERRICK wins first prize in the all school sleeping contest. Out of 798 classes Bob slept through 797. He failed to sleep in one class due to the class being held by Doctor Halladay and it seems as though some visitors had come to hear the eminent doctor lecture. One of these visitors brought a “babe in arms” and Bob was elected to hold it. Now a mere child wouldn’t keep Bob from sleeping but on this particular day it was raining and Bob stayed awake the entire class hour trying to get a seat where the roof didn’t leak. Well, anyway, he won the first prize, which consisted of a genuine REHFUSS TUBE.

The second prize for the all school sleeping contest went to Dusty Dorwart. No doubt he would have taken first prize but he was always unable to awaken in time to get to the next class in time to offer any competition to Herrick, who has a system by which he goes to sleep the minute class begins and awakens when it ends. Dorwart was awarded a solid ivory back scratcher which is entirely automatic.

Honorable mention is given to Musselman (Gladys Cowen pestered him so much that he was unable to give any stiff competition).

John Wigal was entered as a class sleeper but after some investigation it was finally discovered that he was unconscious and never actually sleeping.

Several contestants were eliminated because of snoring.

Parkinson took first place in the dumb question contest by asking Dr. Johnson, “Why does the heart beat and what does it beat?” Dr. Johnson refused to answer this question and threatened to expel Parky. However, after a plea entered by the school Cadavers Parky was allowed to continue classes. He was awarded a false mustache.

Mrs. Nazarene took second prize after asking Dr. Mary Golden if onion juice might be included in the diet of a new born child. She was awarded a walnut rolling pin.

The third prize was awarded without hesitation to Kale who asked Groff if a fracture of the sphenoid bone would cause corns. The answer was funnier than the question, but then we have a special prize for Doc Groff so Kale was awarded a book entitled, “How to Kill Time.”

CLINIC
A ONE ACT PLAY

TIME—2 P. M. (10 after 2 P. M. by the school clock).
PLACE—The usual room.

Prologue—Clinic has begun and a patient is ushered in by the student clinician and Joe Conti who has been assigned to the case. Patient seats herself on the treating table.

Dr. Johnson—Read the case history.
Joe Conti—(Begins reading in a low voice. This was his first patient.)
Granberg (from back of room)—Louder.
Joe—(Gets fussed, turns red and shows other signs of self-consciousness) I haven’t made a urine analysis (he forgot how) but the temperature is normal, her heart is beating—

Dr. Johnson—How do you know her heart is beating?
Conti—I listened to it on my little stethoscope.
Voices from back of room—Louder!
Conti—I listened to it on my little stethoscope.
Same voices—Louder.
Conti—(Getting confused) I listened to her stethoscope with all my heart.
Same voices again—Louder.
Conti—(Getting still more confused) I whistled in her ear with my stethoscope.

Dr. Johnson—Now that we have had the case history let’s inquire into the condition of the central nervous system. (Goes through the motions of eliciting the various reflexes.) Have you had gout, rheumatism, headaches, pain in the back, corns, bunions, scarlet fever, mumps, measles, chicken pox, tuberculosis, coryza, vertigo, toothache (pauses for a breath), meningitis, scurvy, scar ofula, rickets or hay fever?

Patient—Yes, sir.
Dr. Johnson—What is your main trouble now?
Patient—I’m sick.
Joe—Yeah, she’s sick.
Dr. Johnson—(Takes the patient’s pulse, listens to the heart and examines the back.) This is a case of spotted fever.

At this point a loud clank is heard, everyone looks up and it is soon discovered that Conti has fallen unconscious. For those who can’t see the humor in this play I solemnly refer you to Dr. Spring who personally conducted the class in which Joe first heard of spotted fever.

Red O'Connor spent a year and a half trying to decide where our campus was located. After this period of deliberation he finally has come to the conclusion that the school should erect a window box and plant grass in it. A further elaboration of this artificial campus, Red maintains, would be necessary in order to make it collegiate. This elaboration would consist of erecting a sign over the window box bearing the inscription "Keep Off The Grass." Anyway, D.M.S.O.G. has never been bothered with the problems so many institutions have had to face, viz., seeking on the campus.

Andrews and Winters are launching a campaign to install traffic signs at the entrance to the school drug store (thank you, Mr. Pemberton). No doubt it would be of great assistance to those who have a sudden craving for coffee. It might also aid Nelson in navigating the right of way without spilling everybody’s coffee.

It is a well known fact that Dr. Johnson smokes a cabbage leaf known as “Sand Fleas.” Anyway that’s what the name sounds like when he orders them over the counter. At any rate it’s no secret that cabbage grows in the boiler room as a volunteer plant . . . make your own deductions.

After much deliberation and concentration, involving many intricate mathematical formulas, Musselman and Dalrymple have calculated the extra cubic feet of space which will be available to the student body of the school after their graduation.

The other day Fedson was seen setting a mouse trap and placing it in the newly acquired bass horn. It seems that the other day in the midst of a rehearsal a small mouse ran out the mouth piece and was completely devoured by Fedson at about a flat. The mouse wasn’t entirely digested until about the middle of approximately eight bars later and it’s unnecessary to state that the music emitted through its usual channel was somewhat distorted.

It would be interesting to know how much income tax the Book Store Bandit had to pay.

---

The Field in Foot Work Is Open to All Osteopaths

With his expert knowledge of anatomy, the osteopath is particularly qualified to bring relief to those suffering with foot troubles. Again, since a large number of ills have their origin in misalignment in the foot, it is to his further advantage to make foot-work a profitable part of his practice.

Because the principles of osteopathy are carefully adhered to in the design of Cantilever Shoes, the osteopath will find them particularly helpful in the restoration of a feet to normalcy.

CANTILEVER SHOES

In the Cantilever Shoe, the foot will function normally. The bones of the arch are guided to their normal positions; the flexible shank allows freedom for the muscles to exercise and the blood to circulate; the toes have sufficient room; the balance is correctly proportioned; the foot is encouraged to right itself.

An examination of this famous shoe will make you, too, an enthusiastic advocate of it. Any Cantilever dealer will gladly cooperate with you in any case.

WOMEN—MEN—CHILDREN

Cantilever Shoes are sold by agents in all principal cities. If not listed in your telephone book write to

Cantilever Corporation
Brooklyn, N. Y.
FREEDOM, OLD AND NEW

When Freedom from her hidden haunts
Came forth to caper in the breeze,
She didn't dream of flappers pert,
With rolled down socks, and dimpled knees.
She'd never heard of bootleg hooch,
Of modern ills she made no prognosis,
Nor did she even faintly dream
Of meeting shucks with halitosis.
Oh, Freedom she was dignified,
Or so at least I've heard,
And if you didn't watch your step
Her displeasure you incurred.
She had old-fashioned morals
With a lot of excess virtue,
And if you tried to treat her rough
She'd be very sure to hurt you.

Such was Freedom in days of yore,
But such is Freedom, alas, no more.

Now the old girl's hit her stride,
She's found a lot of things to do;
She's bobbed her hair and rolled her socks
And smokes a cigarette or two.
And when you try to date her up
The first thing she will ask,
Now might you have concealed somewhere
A little pocket flask?
And if you find a country lane
Secluded in the gloom,
And stall your car to seek awhile
Beneath the silvery moon,
Then if you cannot do your stuff
In the most modern way,
She checks you off her list, pronto,
And sends you home to stay.

Such is Freedom as she is today,
But she's just as nice as the other way—
—B. E. Scott.
We Invite Your Printing Business

It may be that some of the various stock items sold by us can be used by you. For instance, the use of Scratch Pads sold by us at 15c a pound, will save you more expensive paper. If there were some copper cents laying on your desk you would save them, but every time you waste two of your letter heads you throw a cent away. Scratch pads will save you money.

The use of Telephone Call Pads is inexpensive and provides a systematic office system. The loss of one client through the record of a call not being made might cost more than the pads for years.

These are very small matters, but we are looking to your welfare whether your purchase be large or small. Such stock blanks as we sell are carefully prepared and have been perfected through the experience of the better business places of Des Moines. This includes many items in daily use by professional and business men.

Cuts or other property of customers stored in our fireproof building in indexed drawers, always available. No extra charge for this service.

Our office contains thousands of samples of paper stock and completed jobs of different kinds. Many times when some new piece of printing is being prepared and there is doubt as to the suitable paper to be used, the correct size, proper arrangement, wording or some other matter we are able to be of assistance with samples and suggestions. No extra charge for this service.

In case a price list, program, catalogue, booklet or piece of advertising is contemplated we prepare layouts and blank dummies made up from the paper stock proposed to be used, stitched and trimmed, showing exactly the manner in which the completed work will appear. This shows our customers in advance exactly what they can expect. No extra charge for this service.

You are invited to make use of the superior service we offer, now more complete than ever before. You are assured of our ability to furnish printed matter in which you can take pride and which will reflect prestige at prices you can afford to pay.

A FRESHMAN TREATISE

The editor just cum around and ast me to rite a paper on dye beatus. Well dye beatus is classified under too tipes, viz., In Sipid and Mel Itus. In both tipes theyr is an abnormal quantity of urine. But in dye beatus Mel Itus theyr is a whole lot of sugar in the urine doo to the individuelis not having a paneryas which will metabylese the sugar.

You see the paneryas is surrounded at its head by the gejoonum. Now this gejoonum is a part of the little intestine (In case you dont believe that i refer you two doc Halliday). But that has nothing to do with dye beatus on count of the intestine not being dyrectly connected with this diseasee. However theyr are sum little islands in this paneryas and its on this island that the an internal see creeshun is made which gets into the blud streem and . . . well a guy by the name of Longer Hlung is abot the only person who understands just what does happen when this see creeshun gets into the blud any way sum buddy thot he new enuff abot it that they named thees islands after him i am shure most all of us who can reed has red of the islands of longer hung, anyway them of us who hasnt red of them has herd miss jonson speak abot them in her lectures in his tology.

They is one thing nise abot dye beatus mell Itus and that is that they is a stuff which can be given to individuelis suffering from this terrifick diseasee. it isnown as insulation. i have never tried it on count of never having dye beatus but you can take my wurd for it, its gud.

peepul offen get gang reen which has dye beatus mell itus. Dye beatus insipid requires no explaining on count of its name giving it away. abot the only thing which can be dun in either one is too call a deektor.

Dear Doctors:

You have produced another milestone in the progress of Osteopathy; "The Stillonian." It is written evidence of the increasing standards of the Des Moines Still College of Osteopathy; it demonstrates the loyalty and spirit of the student body and is a monument in remembrance of the Senior Class.

To those who are graduating, we wish you unlimited success. We hope that Osteopathy will be a little better for your presence in it and that you will continue to maintain the principles upon which your alma mater stands.

To the students remaining, let "The Stillonian" and the graduating class be each an incentive to continue along these same footsteps, taking advantage of every opportunity that may fully equip you to be an Osteopathic Physician.

Sincerely and fraternally,

THE TAYLOR CLINIC.
Join the
NATIONAL GUARD
Help to Meet Your School Expenses

The 1st Battalion 168th Infantry is located in Des Moines; and the invitation is
extended to young men of good character to become members in this historic organization.

The National Guard brings together young men from all sections of the city, on a
common basis of equality and under favorable conditions of life; it promotes patriotism
and good citizenship, it develops self-reliance and decision, always teaching loyalty and
respect for constituted authority.

National Guard training includes rifle marksmanship, machine-gunnery, pistol shoot-
ing, outdoor encampments, hikes, map reading and making, communication by means
of the telephone, radio, and signalling; together with other subjects that tend to better
fit you for civil life.

Each National Guard organization meets regularly on a certain designated night
each week for a period of two hours. Uniforms and all necessary equipment are fur-
nished by the government at no expense to the individual members. National Guards-
men are paid for attendance at the drills (or assemblies) of their company; according
to the grade they hold.

The National Guard work takes no more time than a class, or a picture show; and

You Are Paid While You Learn

Come down to the Coliseum Armory any Monday, Tuesday, Wednesday, or Thurs-
day evening, 8 to 10 p.m., or to the Neighborhood House, 513 East 13th St. on Tuesday
evenings, during the same hours, and learn more of this proposition.

Many college men are materially assisting their way through school by membership
in the NATIONAL GUARD.

A VERBAL NIGHTMARE

Inspired by the placard displayed in the window of a plumbing shop, "IRON
SINKS," a humorist stepped inside and told the proprietor that he was well aware
of the fact that "iron sinks," and demanded to know what about it.

But the nimble-witted plumber retaliated:

"Yes and time flies, but wine vaults, sulphur springs, jelly rolls, grass slopes,
music stands, Niagara Falls, moonlight walks, sheep run, vacation trips, mid-
summer sales, weather strips, the ocean waves, avoidupois weights, Autumn
leaves, rubber tires, the organ stops, election returns, and —"

But the joker had bolted. After collecting his thoughts he returned, and
poking his head through the partly opened door he shouted: "Say, you for-
got one thing—marble busts!"
