DOCTOR OF PODIATRIC MEDICINE
Des Moines University’s Doctor of Podiatric Medicine Program offers you the top advantages in medical education: expert, “open-door” faculty; a rigorous curriculum; state-of-the-art facilities; a collaborative and diverse research enterprise; and a collegial, supportive community of students and faculty engaged in learning and service.

Doctors of podiatric medicine (D.P.M.s) provide treatment for the foot, ankle and lower limb in surgery, sports medicine, pediatrics, biomechanics, trauma and wound care. Lower-limb health directly affects the health and function of the rest of the body, so D.P.M.s have a high impact on their patients’ quality of life. They enjoy close relationships with patients in a profession that’s flexible, family- and lifestyle-friendly and in demand.

THE BEST PREPARATION FOR A GREAT CAREER

100% residency placement rate

94% First-time pass rate for national board exam, Part 1

94% First-time pass rate for national board exam, Part 2

LEARN FROM THE BEST
Faculty in DMU’s College of Podiatric Medicine and Surgery (CPMS) are nationally recognized experts with broad clinical expertise, diverse patient care and research endeavors. CPMS was the first podiatric medical school to be affiliated with an academic health center, which offers students in all eight DMU graduate medical and health sciences programs great resources and opportunities to learn from each other.

EXCEPTIONAL EDUCATION
CPMS prepares excellent podiatric physicians through an integrated program of didactic, laboratory and clinical experiences. Students take their first-year basic science courses with students in DMU’s College of Osteopathic Medicine. As they progress, CPMS students focus more on the lower limb and physical diagnoses skills. They learn to apply principles of evidence-based medicine to individual patient care. High student outcomes in board exam scores, exam pass

HANDS-ON, RELEVANT AND REAL-WORLD: DMU’S D.P.M. PROGRAM WILL PREPARE YOU FOR A REWARDING CAREER.
rates and residency placement are among the results of the program.

**DIVERSIFY YOUR DEGREE**

DMU offers many ways to maximize your time in medical school. Students and faculty conduct research on a variety of topics and frequently present at state, regional and national conferences. The Global Health Program offers short-term service trips, internships and rotations at sites around the world. You also can combine your D.P.M. degree with a master’s degree in health care administration, public health, anatomy or biomedical sciences. This option expands students’ knowledge, skills and leadership abilities, enhancing their patient care and career opportunities.

**INNOVATIVE TEACHING**

- You will develop clinical, communication and interprofessional teamwork skills in DMU’s Simulation Center. It combines real-world clinical scenarios with lifelike, high-fidelity mannequins and equipment, allowing students to perform hands-on assessments and procedures.
  - The **Standardized Performance Assessment Lab (SPAL)** enables students to interact with and examine people trained to portray a variety of medical conditions. Students review videos of their patient encounters and learn from evaluations by faculty and “patients.”
  - The **Surgery Skills Center** includes simulation model labs, a computer lab, an operating room lab, laparoscopic and other special equipment. Students train in suturing, surgical instrumentation, dissection, intravenous insertions and other clinical and surgical procedures.
  - Clinical students learn how to use ultrasound technology, beginning in their first year, in anatomy and clinical medicine/diagnoses courses.
  - In the **anatomy lab**, students dissect and analyze cadavers at 43 stations, each equipped with a 40-inch flat screen monitor, connected to an iPad that offers instructions linked to anatomical images online.
  - Third-year D.P.M. students are immersed in patient care in the **DMU Foot and Ankle Clinic**, part of the DMU Clinic on campus, and with other podiatric physicians in central Iowa. These rotations maximize students’ skills and experiences in basic podiatric medicine, podiatric radiology, podiatric surgery and podiatric orthopedics and biomechanics. In addition, third-year students complete clinical rotations in internal medicine supplemented by an emergency medicine simulation rotation, vascular surgery, orthopedics and wound management.
  - Fourth-year students participate in **clerkship rotations that lead to residency opportunities** as well as other medical specialty clinical rotations.
Your ultimate goal is to become an exceptionally well-prepared health care professional. At DMU, you will learn with faculty and students who all share a common focus on medicine and the health sciences. You will become ready for both autonomous and interprofessional practice in providing the highest quality of care.

As a student, you will enjoy the amenities and affordability of Iowa’s capital, Des Moines. Learn more at www.catchdesmoines.com.
