A.O.A. Begins Over-All Campaign

Dr. Golden Pledges Support of State Society For National Campaign

Dr. Mary E. Golden, Chairman of the Campaign Committee of the Des Moines Still College Foundation, Member of the Board of Trustees of the A.O.A., and President of the State Society of Osteopathic Physicians and Surgeons of Iowa, expressed enthusiasm for the National Campaign of the A.O.A. Dr. Golden respects both the efforts and intention of the National Association and promises to rally the support of her constituents behind this gigantic effort.

She urges each physician to purse carefully the literature recently released from the office of Dr. Tilley and support generously the nationally planned, overall campaign. Said Dr. Golden, "Osteopathic education is not a College affair, nor an A.O.A. affair; it is the heart and soul of each one of us. Today is the most crucial period of osteopathic education in the history of our profession. We must all support our colleges now. Tomorrow, yes—tomorrow may be too late."

Dr. McGill Suddenly Stricken III

Dr. R. O. McGill, Director of the Obstetrical Clinic, was recently forced to leave that position for a short time because of an acute attack of appendicitis. Dr. McGill is recovering rapidly under excellent care at the Des Moines General Hospital.

Gives Active Support To College Drives

On January 18, Dr. R. McFarlane Tilley, Chairman of the National Board of Sponsors of the National Osteopathic Progress and Public Service Fund, announced: "The beginning of the Fund drive which was for the expansion of all of the approved Osteopathic colleges and hospitals affiliated for teaching."

Dr. Tilley adds, "The profession and its colleges are now united in one great movement. We, therefore, urge you to give all that you can at once to the college of your choice or to the National (Overall) Fund!"

Concluding his letter to the profession, Dr. Tilley cautions, "Remember! This is the greatest challenge ever faced by Osteopathy, and each of us must do his part."

The College Campaigns

Five of the Osteopathic Colleges in June, 1943, embarked upon individual campaigns, each with a specific goal in mind. These campaigns have been successful. The Osteopathic Profession has rallied behind the cause of education in grand style. Now the five colleges who are completing their alumni campaigns and are about to embark on public campaigns are joined by the sixth approved college, in Kirkville. Simultaneously with the College Campaigns

Campaign Contributions Continue for Fund

Dr. Mary E. Golden, Chairman of the Campaign Committee of the Des Moines Still College Osteopathic Foundation, expresses gratitude for the continued new pledges. Recent new names which have been added to the list of Contributors are:

- Dr. Calvin J. Haupt of Orlando, Florida
- Dr. E. S. Honsinger, Ames, Iowa
- Dr. E. H. Lodish, Detroit, Michigan
- Dr. A. P. Warthman, Detroit, Michigan
- Dr. Reginald Platt, Houston, Texas

These men are all members of the 500 Club, who have contributed from $500 to $1000 to the Educational Fund.
Faculty response to the change has been very favorable. In changing from the program which required meeting classes each day to three days per week and moving courses back toward the freshman year, it is obvious that there must be sacrifices on the part of the Staff, even to the point of duplicating courses during the transition. Faculty members have been most cooperative in facilitating the change. Adjustment to such a drastic change supports our contention that we have a live-wire group who are anxious to make the most of educational opportunities for the students.

Students

Students, faced with an increasing amount of work, feel that the change is in the right direction. Fully informed, they have made the adjustment to the revised system without a murmur. Student complaints, Chief complaints among those which were voiced pertain not to the expansion of the curriculum, but to problems with part-time work. They have sought, and are succeeding, in avoiding this change. Their attitude is most commendable.

OVER-ALL CAMPAIGN

The annual Essay Prize Contest sponsored by the Des Moines Hospital Training School will be held in the fall. Prizes amounting to $50 will be awarded for first, second, and third places. Submissions must be postmarked no later than September 15th.

Hovis Heads Detroit Osteopathic Physicians

Dr. J. Charles Hovis, of Highland Park, is newly-elected president of the Wayne County Association of Physicians and Surgeons of Osteopathic Medicine, Inc. It was announced this week, following the annual meeting of the Association for the election of officers.

Other appointments are Dr. Neil R. Kitchen, vice president; Dr. Thomas E. Jackson, secretary; Dr. N. N. Munroe, treasurer, with Dr. Harry F. Stimson, retiring president, Dr. Robert K. Homan, president of the state association, Dr. W. L. Bradford and Dr. W. H. Baker to the Board of Trustees.

Dr. Hovis, who has been in practice fourteen years, is a senior member of the surgical staff of the Detroit Osteopathic hospital, where he served his internship, is chairman for the Convention of the American College of Osteopathic Surgeons to be held in Detroit next October; is a member of the North End Lions Club; Zion Lodge No. 1 Masonic Order, and an honorary member of Sigma Sigma Phi.

Polk Group Joins Wilden In Preparation Parleys

The Polk County Osteopathic Society voted without objection at their January 14 meeting to meet monthly with the Wilden Hospital Staff for a series of lectures on War Medicine. The program came from Dr. Verne Wilson, co-founder of the Wilden Hospital. The program, in the hands of Dr. John Woods, is undertaken for the purpose of familiarizing the hospital staff with physical and mental ailments which may be expected among the men who are helping returning from active service.

After approval by the executive committee of the Polk County Society, the members present cast a unanimous vote for inclusion of their society in the conferences.

This Month Buy Bonds

The proposal came from Dr. Verne Wilson, co-founder of the Wilden Hospital. The program, in the hands of Dr. John Woods, is undertaken for the purpose of familiarizing the hospital staff with physical and mental ailments which may be expected among the men who are helping returning from active service.

After approval by the executive committee of the Polk County Society, the members present cast a unanimous vote for inclusion of their society in the conferences.

Osteopathy Without Limitation

A Message of Thanks to
The Alumni Association

The Des Moines Still College of Osteopathy has advanced sufficiently during the past two years that it has surprised even itself. Advances have been made in scholarship, in osteopathic requirements, student demeanor, seriousness of purpose, program for expansion, national and international endorsement of the library, faculty organization and enthusiasm, laboratory plan and equipment, relationship to the public, and in many ways so subtle that they escape description.

Progress does not just happen. Without a driving force progress cannot take place. There has been cooperation beyond expectations by students, faculty, college officials and friends of Osteopathy. The driving force has been alumni organization.

The group of alumni who formed, in 1935, the National Alumni Association could hardly have suspected that their labors would bear so richly of educational progress. The many and vast improvements in the college which we have brought about are examples of the possibilities of a group of alumni who are alumnus or associate of the College.

The driving force has been alumni organization.

Individual members of the Foundation maintain a keen and active interest in the disposal of these funds. They were contributed with the clear understanding that they were for immediate disbursement, and the Foundation is using extraordinary caution to be certain that these Alumni funds are spent wisely.

Overall Plan

In appreciation of the great amount of time and energy which the Des Moines group has spent, individually and collectively, for College advancement no alumnus or associate of the College can deny them the credit which is due. Every alumnus of the Des Moines College owes each one a debt of gratitude.

Any group of equal size can do as great service to the College, to Osteopathy and to themselves as this group has done. We therefore urge you individually to organize booster clubs wherever you may be. The Alumni association can be a hundred times stronger than it is at present. The surface has just been scratched in manifestation of loyalty, activity and support for the college. Alumni are only now beginning to realize that they are the College. The College will develop and expand only inssofar as alumni exert themselves. There can be no hocus-pocus about it. The College cannot rise in educational circles without outside support. There will be no outside support until you, personally, have supported. The driving force of a group of fifteen alumni, with the support of a fourth of the alumni body, has given to the Des Moines Still College ONE OF THE FINEST INSTRUCTIONAL LABORATORIES IN THE MIDDLE WEST. What has been combined and unified efforts of all the alumni be able to accomplish! The possibilities are limitless.

Osteopathy and your College are driving forward and upward in a sweep that cannot be stopped—except by its own associates, except by you.

Clinical Hospital

“What about the Clinical Hospital? I thought that this campaign was for a Clinical Hospital? When do you plan to start building?” No, alumni, the Clinical Hospital is not forgotten. Plans for the Hospital are quite as alive as ever. The revised College curriculum taken into account the hospital (could it not even be stated, therefore, that the revised curriculum is a part of the hospital? In the original budget $150,000 was allotted for the hospital; repeatedly plans have been stated to include a public campaign. Neither proposal is stated to include a public campaign. Each Osteopathic Physician, the driving force, has been most courteous and helpful in placing with the college ex-sponsibly to the College Library a number of valuable periodicals. Dr. Jeannette Dean-Throckmorton, Head Librarian of the State Medical Library, has extended to the College Library a most invaluable service in placing at our disposal a large number of periodicals to which the State Medical Library subscribes. Dr. Throckmorton has at all times been most courteous and helpful to osteopathic students and practitioners. The College expresses to her and her staff deepest gratitude for past assistance as well as this most recent gesture of cooperation.

The journals, which are loaned for a two week period as soon as they are received by the State Medical Library, are listed below:

American Journal of Anatomy
American Journal of Hygiene

Dr. M. B. Landis Reports Favorably from Superior

Dr. M. B. Landis, formerly Instructor and Director of the Obstetrics Clinic at the Des Moines College of Osteopathy, has returned from his practice in Superior, Wisconsin. Dr. Landis and Dr. Ed Mossman, 1943 graduate, conduct a general practice jointly in that city.

The LOG BOOK joins their former colleagues and friends of Des Moines in wishing them continued success.

State Medical Library Extends Loan Service To College Library

Dr. Jeannette Dean-Throckmorton, Head Librarian of the State Medical Library, has extended to the College Library a most invaluable service in placing at our disposal a large number of periodicals to which the State Medical Library subscribes. **The New Class**

Periodically faculty members must answer a hundred times the registration, and afterward as well, “How does the new Class look?”. In past years, the answer is now given in terms of numbers. Since the outbreak of the war, however, numbers have continually dropped with each new registration period. The answer is as follows:

The New Class

This first important business meeting of the semester was held at Dr. Sloan’s office, January 12, 1944. Under his auspices installation of new officers occurred as follows:

Leo Luke, President; Roy Bubeck, Vice President; James Woodmansee, Chapter Historian; H. W. Mascall, Chapter Secretary; C. F. Christianson, Chapter Historian; John Slater, Chapter Treasurer.

Of course the meeting ended with a work night discussion of office technique and management as directed by Dr. D. Sloan.

The new officers began to make plans for the new calendar immediately.

A meeting was held January 19th Dr. Raymond B. Kales office. The meeting proved instructive and interesting due to the great job of remodeling that has been done. Still College has become a place that is no longer a burden.

In the three plants is to be held in the very near future. These men are Merle Morey, John Snyder and Robert Penney.

A work night with Dr. Della Caldwell demonstrating and explaining osteopathic technique is planned for the next regular meeting of the fraternity. We would like to have as guests all of the new members of the student body.

We are happy to say that our recent graduates in December are all happily engaged in their respective hospital as interns: Dr. David Heffen, Madison St. Hospital, Seattle, Washington; Dr. Marvin Hodson, Dayton Osteopathic Hospital, Dayton, Ohio; Dr. Eugene Sheidahl, Des Moines General Hospital.

Plans are already under way for general house improvements which we hope will be completed for the party which is planned for the near future for the entire student body and faculty.

--- G. B.

**Correction**

The December issue of the LOG BOOK inadvertently stated that the Sigma Sigma Alpha was given “outstanding service to the Des Moines College” was given to Dr. Robert Patton. Actually Dr. Tyrus Peace, now of Red Oak, Iowa, was the recipient.

**Many Graduates Obtain Iowa License**

Dr. D. E. Hannan, Secretary of the Iowa State Board of Osteopathic Examiners, announces that the Board has granted licenses to the following, who completed examinations before the board on December 6-7-8, 1943:

- Dr. Raymond Pinckah, Des Moines, Iowa
- Dr. Mary L. Hodson, Des Moines, Iowa
- Dr. Mary L. Klesner, Grand Rapids, Michigan
- Dr. Carl C. Waterbury, Des Moines, Iowa
- Dr. John P. Rounce, Sidney, Montana
- Dr. Robert L. Gustafson, Red Oak, Iowa
- Dr. Earl H. Laughlin, Kircsenville, Missouri
- Dr. Kenneth B. Riggle, Des Moines, Iowa
- Dr. Thomas P. McWilliams, Des Moines, Iowa
- Dr. Kikuo G. Shimoda, Seattle, Washington
- Dr. Mahito Uba, Los Angeles, California
- Dr. Robert A. Heffen, Des Moines, Iowa
- Dr. Gerald A. Diederoff, Des Moines, Iowa
- Dr. Shuichi Ahramasoh, Des Moines, Iowa
- Dr. Thomas C. Price, New York, N. Y.
- Dr. Tyrus Peace, Long Island, N. Y.
- Dr. Harry L. Nelson, Hutchinson, Kansas

**Pearson Reproves Navy’s Anti-Osteopathy Stand**

Starting off the New Year by going to bat for Osteopathy, Drew Pearson, in his column Washington Merry - Go Round, blasted the Navy in the following article:

**No Navy Osteopaths**

“The ‘flu has been epidemic partly because there aren’t enough doctors to care for the civilian. This shortage of doctors could be somewhat relieved, however, if the services would commission osteopathic physicians instead of medical doctors, whose duties range from dumping bed pans to cleaning floors.

“Actually, congress has already ruled for commissioning osteopaths in the Navy, but the American Medical Association has put such pressure on Navy Surgeon General Ross T. McIntire that the will of congress has been eluded and osteopaths are still being used frequently as orderlies.

“More than a year ago, congress authorized the commissioning osteopathy graduates. But no action from the Navy yet. (Pearson’s bold-face.)

“Admiral McIntire contends that osteopaths are not qualified for general practice. The osteopaths contend that they are. Meanwhile Admiral McIntire continues to use, with his No. One patient, F.D.R., a mild form of osteopathy which he calls physiotherapy. At every Navy clay, McIntire’s assistant, George Fox, stimulates the president’s circulation with a therapeutic massage.”

**GLANTZ (Continued From Page 1)**

Fifty guests present. Faculty, for a friendly atmosphere for the dance held at the Mainliner Club as entertainment. Plans for the next regular meeting of the fraternity are very busy with their internal affairs.

**The LOG BOOK**

At the close of last semester Psi Sigma Alpha was privileged to honor the following men for maintaining high scholastic averages: Paul Stien for maintaining the highest average during his freshman year, and Herbert Harris for the highest average maintained throughout his freshman and sophomore years. At the senior banquet Carl Waterbury was awarded the certificate for the graduating senior who obtained the highest average for all four years in Still College. Eakle has also been admitted to the Psi Sigma Alpha plaque which hangs in the clinic waiting room.

As we came back to the old college on January 12, 1944, we felt a deep sense of gratitude to the alumni and faculty members for the great job of remodeling that has been done. Still College has indeed become symbolic of the rapidly advancing profession of which it is such a vital part.

Many Graduates Obtain Iowa License

Dr. D. E. Hannan, Secretary of the Iowa State Board of Osteopathic Examiners, announces that the Board has granted licenses to the following, who completed examinations before the board on December 6-7-8, 1943:

- Dr. Raymond Pinckah, Des Moines, Iowa
- Dr. Mary L. Hodson, Des Moines, Iowa
- Dr. Mary L. Klesner, Grand Rapids, Michigan
- Dr. Carl C. Waterbury, Des Moines, Iowa

- Dr. Thomas C. Price, New York, N. Y.
- Dr. Tyrus Peace, Long Island, N. Y.
- Dr. Harry L. Nelson, Hutchinson, Kansas

**NOTICE**

If and when you change your address, please notify the Log Book promptly.

**GLANTZ (Continued From Page 1)**

Interest in student welfare and college progress, earned for him promotion to Assistant Professorship. His earnest application, efficient and lucid lecture manner and his subtle but omnipresent sense of humor rate him as one of the brightest men in the medical school.

“After Hours”

Dr. Glantz cannot admit that he has one hobby. It seems to me that I enjoy everything I do.” He gets particular enjoyment, however, in the use of language. His training in Latin and Greek, he feels, has given him greater satisfaction than any nonprofessional phase of his work. He reads freely French, Spanish and German, but characteristically, again, claims to be “rusty” in these respects. The Doctor is no DENIAL, though, of the fact that he is vitally interested in Osteopathy and Medical Sciences. The College feels a pride and good fortune in its association with Dr. Glantz; the LOG BOOK is grateful for the opportunity of passing along to its readers these few items regarding Dr. Glantz.

**THE LOG BOOK**

This first important business meeting of the semester was held at Dr. Sloan’s office, January 12, 1944. Under his auspices installation of new officers occurred as follows:

Leo Luke, President; Roy Bubeck, Vice President; James Woodmansee, Chapter Historian; H. W. Mascall, Chapter Secretary; C. F. Christianson, Chapter Historian; John Slater, Chapter Treasurer.

Of course the meeting ended with a work night discussion of office technique and management as directed by Dr. D. Sloan.

Young, Bubeck Named For Graduation Honors

Prof. H. W. Merrill, Chmn. of the Committee on Scholastic Standing, announced this week that Don Young and Roy Bubeck will be graduated in May with distinction. Basis for the selection, as defined by the rules for comprehensive examinations at the Des Moines College is "accomplishments in the two-year course, and a 110 to 1 ratio, general scholarship during the four years, clinical aptitude, original investigations and personality."

Mr. Young and Mr. Bubeck are the fifth and sixth men in the history of our institution to receive this high honor. The Des MOINES STILL COLLEGE LOG BOOK commends them for the industry and scholarship which have thus been culminated. The faculty, college officials and fellow students in the college congratulate these young men and wish them the finest success in their postgraduate plans.

Dr. Arthur D. Becker
Guest Lecturer at California College

Dr. Arthur D. Becker, former president of the Des Moines Still College of Osteopathy, has accepted an invitation to appear as guest lecturer at the California College of Osteopathic Physicians and Surgeons in Los Angeles.

Dr. Becker will lecture during February and March on the subjects "Osteopathic Basic Principles and Their Application in Practice," "General Diagnosis," and "Cardiology."

The LOG BOOK wishes for Dr. and Mrs. Becker a pleasant sojourn in California, and hopes that they will find opportunity to visit Des Moines on their return to Lake Orion in April.

Stano, Former Student, Now Flying Lieutenant

Eugene Stano, who was enrolled for 4 B in February 1939 at the Des Moines Still College, was graduated with class 44 B on February 8 at Brooks Field, Texas. Mr. Stano is now a Lieutenant in the Air Corps of the U.S. Army. We congratulate Lt. Stano on the successful completion of this phase of his training.

Lt. Stano plans to return to Des Moines to complete his studies leading to the degree D.O. after the war.

A.O.A. Pres. Bailey Calls
Emergency Conference

Representatives of the divisional societies of Osteopathy in the United States and Canada have been called to Chicago by Dr. Walter E. Bailey, President of the A.O.A., for a special session February 18-20 on matters vital to the profession.

Representing Iowa are Dr. Mary E. Gomer, President of the Iowa Society of Osteopathic Physicians and Surgeons and Trustee of the A.O.A. Dr. J. K. Johnson, Jr., President of the Iowa Society, and Mr. Dwight S. James, Secretary of the Iowa State Society. Dr. J. P. Schwartz, President of the Des Moines College, represents its interests at the meeting.

Agenda

Items for consideration at this special session are Federal Legislation on which Dr. Swope and Mr. Lawrence Courney will present a Washington report. Position of the Osteopathic Profession with regard to the Army, Navy and U.S. Public Health Service will be discussed, as well as the status of the ambiguous Murray-Wagner-Dingell Bill.

Discussions of State legislation will be led by Dr. James Watson of Ohio and Dr. John Wood of Michigan. The profession is becoming increasingly aware of the acuity of this problem.

Dr. Tilley, Chairman of the Overall Campaign Committee, will stress the importance of the National Campaign and pointed out ways of providing a more successful campaign in the several states. Mr. Harry E. Caylor, Campaign Counsellor, will offer a detailed analysis of the problems facing the divisional societies with respect to the campaign and offered a concrete program of procedure.

Details of the Conference will be reported in the March issue of the LOG BOOK.

Another aspect of this significant influence is discussed on page 3 of this issue. Watch the March issue for conclusions and programs which will be the outcome of the meetings, nation-wide conclave of osteopathic leaders. Prepare to cooperate with the leaders of your district society in bringing all the problems outlined to a successful, osteopathically favorable conclusion.

STUDENTS IN PROFESSIONAL SCHOOLS.—A registrant who is in training and preparation as a medical, dental, veterinary, or osteopathic student in a recognized medical school, dental school, school of veterinary medicine, or school of osteopathy . . . . . . should be considered for occupational deferment during the period of such professional course, provided he is a full-time student in good standing, and if:

(a) He continues to maintain good standing in such course of study, and

(b) It is certified by the institution that he is competent and gives promise of the successful completion of such course of study and acquiring the necessary degree of training, qualification, or skill to become a recognized medical doctor, dentist, doctor of veterinary medicine, or osteopath.

2. UNDERGRADUATE PREPROFESSIONAL STUDENTS.—A student in premedical preclinical, preVeterinary, preosteopathic, and pretheological fields should be considered for occupational deferment if he is a full-time student in good standing in a recognized college or university, and if it is certified:

(a) By the institution that he is pursuing a course of study in one of these preprofessional fields and if he continues his progress he will complete such preprofessional course of study within 24 months from the date of certification;

(b) By a recognized medical, dental, veterinary, or theological school that he is accepted for admission and will be admitted to undertake professional studies upon completion of his preprofessional work; and

(c) By the National Roster of Scientific and Specialized Personnel of the War Manpower Commission that the certification of the institution as to his course of study and competence, and as to his prospective date of completion is correct to the best of its knowledge and belief, and that his deferment, if granted, will be within the quota for such preprofessional students.

3. INTERNES.—A registrant who has completed his professional training and preparation as a medical doctor, dentist, or osteopath and who is undertaking further studies in a hospital or institution giving a recognized internship should be considered for occupational deferment so long as he continues such internship but for a period not to exceed nine months.

D. Opportunity to Engage in Profession:

When a registrant has completed his training and preparation in a recognized college or university, or his internship, and has acquired a high degree of training, qualification, or skill, such registrant should then be given the opportunity to become engaged in the practice of his profession in war production or in support of the war effort. In many instances following graduation from a recognized college or university, or the completion of his internship, a certain period of time will be required in the placing of such persons in war production or in support of the war effort. When a registrant has been deferred as a necessary man in order to complete his training and preparation, his deferment should continue until he has had an opportunity to put his
Two Young Sailors
Look to the Future

Dr. J. P. Schwartz, Pres.
Des Moines Still College
Des Moines, Iowa

My dear Father:

We were pretty small the last time you saw us. However, we have grown to man-size, and we decide to follow Dad’s footsteps.

We have completed pre-
medicines at Bates College, Lewiston, Maine, lacking organic chemistry. This credit will be completed at the time of my discharge from the Navy. Consider my brother and I registered as soon as the War is over, as freshmen at Still College. My brother has taken identical courses.

Enclosed, — dollars that I wish to contribute towards educational fund. It’s not much, but then a sailor doesn’t get much either.

With best wishes.

Sincerely yours,
Herbert Parisi,
S2/c, USNR

Dr. Sonesen Enters Perry Practice

Dr. Marshall Sonesen, House Physician at the Des Moines General Hospital for the past year, has entered practice in Perry, Iowa, with Dr. Hannum, Secretary of the Iowa Osteopathic Examination Board.

Dr. Sonesen is a graduate of the Chicago College of Osteopathy, class of June, 1941. He was selected for the Des Moines General internship for his outstanding scholarship, professional bearing and keen interest in the science of Osteopathy. His internship, beginning February, 1942, included a wide filed of hospital duties. With the establishment of externships at the College, Dr. Sonesen was appointed instructor for the seniors. His patience and painstaking care with the successive groups earned for him a host of loyal friends among the recent graduates.

Upon completion of his internship in February, 1943, Dr. Sonesen was appointed House Physician at the Des Moines General Hospital, which has been released from this post in order that he may begin practice in Perry. Best wishes for continued success at this location are extended by the LOG BOOK for the Hospital and College Staffs, as well as for the recent alumni that he has proteges during externships.

A Dangerous Philosophy

The OSTEOPATHIC PROFESSION for January, 1944, carries a vital reminder to Osteopathic Physicians in the way of an article under the above title by Dr. Charles Kaufman of Danbury, Connecticut.

Dr. Kaufman states that “there is a dangerous philosophical conception which is eating away at our osteopathic foundations and which will destroy our identity, ruin our colleges and make futile the efforts of many years.

“It is the conception of the two professions (osteopathic and medical) getting together on a broad platform for public health.

Dr. Kaufman has succinctly stated a problem which is facing the osteopathic profession of today and needs urgent attention. Unfortunately he finds it a problem which can be handled by a “board” or a “committee”. It must be met by every osteopathic physician in the degree D.O. The solution of the problem involves a thorough comprehension of the osteopathic principle, osteopathic philosophy and the application of osteopathic technique.

Underlying the whole osteopathic philosophy is the understanding of the factors which promote health in order that deviations from the normal condition may be remedied by conscious—usually by removal or desensitization. Osteopathic principle contends that the body can, if given the opportunity, protect itself against biological, physical or chemical enemies. It is the duty of the physician to aid the body in this fight—not to hinder it by masking its own abilities behind a screen of foreign chemicals.

Dr. Kaufman uses a term for such an approach to treatment which is striking in its simplicity and accuracy. Those who resort to chemotherapy before it is urgently necessary, or because they through their negligence make it necessary, are designated “health morticians.” He continues, “the glamour of relieving pain with a hypnotic or with last minute surgery so convincing that it under-shines the patient, nonspectacular work of the osteopathic physician who is ever alert to see where he can, by mechanical defect, prevent the ill of mankind from reaching the sulpha or surgical stage.”

“We must not despair to alling humanity. However, if called too late, we might utilize the method of a health mortician. Our profession is that we must adapt to develop the mental processes of a health mortician. No physician would go into partnership with another unless he has confidence in the position of one who would remain a member of the osteopathic profession and at the same time be a health mortician is equally incongruous.”
The Log Book

Osteopathy Without Limitation

The Overall Campaign

President Walter E. Bailey has called a special emergency meeting of all divisional societies of the Osteopathic Profession for February 18-20. Many topics of vital importance to the profession will be discussed by the professional leaders. All these problems have a bearing on the vital and immediate importance of the National Overall Campaign in charge of Dr. Tilley and his committee.

The very fact that Dr. Bailey has seen fit to call this national conference is evidence of the urgent necessity for supporting the National Campaign. If you have neglected to contribute to the individual College campaigns thus far consider utilizing this opportunity — the National Overall Campaign — to make amends for your previous negligence.

Bear in mind that the Osteopathic Profession is going forward rapidly. It has made its most recent strides with your financial and spiritual aid. The progress thus far made is an indication of what can be done with your continued support. Give now to the Overall Campaign.

Until that day shall come when the Osteopathic institutions receive State financial support, it is going to be the burden of the Osteopathic Profession to carry these institutions forward. The profession will write the decrepit institutions, but it will readily support progressive concerns. Put yourself into the position for continuing, public aid. Give Now.

In the January issue of THE LOG BOOK the suggestion was made that $100 a year clubs be formed by alumni throughout the country for the Des Moines College. We reiterate that request. Organize now for the future. Such organization, should, in fact insures tremendously the returns from the nationally sponsored drive.

Remember! Organize Now and set for yourself a project of Osteopathic advancement. The alumni must continue the Osteopathic advancements which have led, within the past year, to federal appropriations for naval and U. S. Public Health Service Commissions, favorable Selective Service Bulletins, inclusion in the federal movement for care of service men’s wives and favorable state legislation.

Lt. Gurka Reports on Varied Army Duties

Lt. J. Philip Gurka, graduate of the Des Moines College in 1939, removed from the combat area in Sicily to an unnamed English town tells of a great variety of interesting new responsibilities. He is prosecuting attorney on a Court Martial Board and is also called upon to investigate prospective young men in his regiment. Of three such cases, thus far investigated, circumstances are pertinent to two of interest in the marriage. Gurka continues, “My latest and best job is Acting Physician, when the two staff doctors are unavailable.” Mute, if not stated, approval has been given for Osteopathic methods of care by the staff physicians and the Regimental Commander. Gurka confides, perhaps with his tongue in his cheek, that he has had responsibility for the care of the Regimental Commander!

Among the most interesting features of Dr. Gurka’s letter (to Mrs. K. M. Robinson) was the statement that he had written a letter reprimanding his rep representative at home for failure to support one of the Osteopathic Bills before Congress. (How many of our readers at home found themselves too busy to do likewise!). He received a courteous letter in reply, inviting Dr. Gurka to know more about Osteopathy. Needless to add, Lt. Gurka is having his representative’s education improved with the assistance of the central office of the A.O.A.

There is a vital lesson demonstrated in the interest which Dr. Gurka has thus demonstrated in his profession. If all Osteopathic Physicians were as keenly enthusiastic and clever as this man at the fighting front, Dr. Gurka and the host of other D.O.’s and students would certainly return to a stronger and sounder Osteopathic Profession.

Correction

Dr. K. B. Riggle (stated in the January LOG BOOK to have received his license to practice Osteopathy) has completed requirements for his surgery license. Dr. Riggle has entered practice, following a year’s surgical assistantship with Dr. Graney, in the office of Dr. Dan Toriello and Dr. J. R. McNerney, Liberty Building, Des Moines.

Dr. Hatchitt plans to open offices on the Des Moines east side later in the spring.

Dr. Tyrus C. Peace, stated in the January LOG BOOK to be practicing in Red Oak, Iowa, actually is practicing in Redfield, Iowa.

Wilden Hospital to Start Expansion Program

Dr. Verne Wilson and Dr. A. W. Dennis announce the beginning of expansion of their hospital at Capitol and E. 14th Streets. The Wilden Hospital at present has been approved by the A.O.A., and has a capacity of 29 adult beds and 9 bassinets. Expansion will provide for 25 additional adult beds and 5 bassinets. Other items involved in the hospital enlargement will include a complete radiological unit, X-ray unit, basement devoted to staff quarters, including accommodations for internes.

Simultaneously with the proposed physical expansion, internal reorganization of the hospital is announced. The staff is made up of 28 members; the Hospital Corporation is composed of three members; a lay manager has been engaged for administration of the hospital business. The Executive Board of the Hospital is to consist of two members elected by the hospital staff, two members elected by the Hospital Corporation and five lay members. Personnel of the Executive Board will be an named March 1.

History

The hospital was founded by Dr. Verne Wilson and Dr. A. W. Dennis in the spring of 1940. The organization is a charter member of the Iowa Osteopathic Hospital Association. It is equipped to perform general and minor surgery, obstetrics and roentgenographic service, as well as care for the usual conditions which must resort to hospitalization.

Following a policy of courtesy and generosity, the local profession the Wilden Institution has grown rapidly. In July, 1943, the co-founders of the hospital celebrated the first birthday of the organization. A party for staff members and their wives was held at the wilden Club in Des Moines. The celebration was a genuine success and the staff approached the new year with increased vigor.

Monthly staff meetings are held. The staff will be joined by the Polk County Osteopathic Association for the next several meetings to deal with problems of physical and mental injuries of service men. The program is in charge of Dr. John Woods.

Student Privileges

Although the Wilden Hospital is not officially connected with the Des Moines College of Osteopathy, they have generously accepted student requests to observe surgery and other hospital procedures. Students interested should contact Dr. Wilson, Dr. Dennis or Dr. Isobaker, for information regarding this privilege any particular day.

The Wilden Hospital helps to fill a need for Osteopathic hospitalization in Des Moines and vicinity. The LOG BOOK expresses for the large Wilden fol-lowing in Des Moines and vicinity the best for continued success and osteopathic progress.

Staff

Staff members of the Wilden Hospital, numbering 28, are as follows: Dr. Verne Wilson, Dr. A. W. Dennis, Dr. J. R. McNerney, Dr. Paul Park, Dr. J. A. Mattern, Dr. Robert Bachman (Honorary), Dr. Howard Griswold, Dr. G. P. Leininger, Dr. Thomas Griffith, Dr. George Marston, Dr. D. E. Sloan, Dr. Beryl Freeman, Dr. Fred Campbell, Dr. Dan Torelli, Dr. Clayton Meyer, Dr. D. V. Goode, Dr. Byron E. Law-cock, Dr. John Woods, Dr. K. B. Riggle, Dr. A. W. Dennis, Dr. Lester Fagen, Dr. Robert Fagen, Dr. J. R. McNeerney, Dr. Larry Barquist, Dr. Earl O. Sargent, Dr. Ray Lamb and Dr. Benny Devine.

Chief of Staff is Dr. Benny Devine; Secretary, Dr. D. E. Sloan; other members of the staff board are: Drs. Verne Wilson, Fred Campbell, D. V. Goode, Robert Fagen and Harry Barquist.

Dean Owen in Boston

Before Massachusetts Approving Authority

Dr. O. E. Owen, Dean of the Des Moines College, represented the College before the Massachusetts Approving Authority, following application for recognition by that state.

The hearing before the Massachusetts Board constitutes an “inspection” of the college and its facilities, examining its qualifications for training physicians.

Report on the hearing will be made in March.

Seniors Complete Tough Week of Examinations

The long-suffering seniors completed, under Dr. Paul O’Shae’s their Qualifying Examinations. Qualifying Examinations as a prerequisite for graduation are a uniform part of the osteopathic curriculum. Coming in the semester prior to graduation, they serve the two-fold purpose of a resume of college training and preparation for State Board examinations.

Students completing this milestone at the Des Moines College are: Leo Luka, Earl Small, James Woodward, Roy Bubock, Don Young, Gerard Zander, Charles Goff, Ray Sweeney. These men will be graduated in May.

**NOTICE**

If you change your address, please notify the Log Book promptly.
A regular business meeting was held, on February 27, at the home of H. Roy Emmins. The calendar for the present semester was given serious consideration with due emphasis on their social and educational aspects. The I.T.S. smoker was held at Benson's and proved to be an enjoyable one. The fraternity members and guests attended. Mr. Roy Bubeck acted as toastmaster, and the program was interesting, brief and informal. A practical work night was enjoyed Tuesday, February 1, at the home of C. P. Christenson. The program of the evening consisted of a circumscription performed by Dr. Robert Hatchett. Following was an informative discussion of cranial technique — its history, and application by Dr. Paul Kimberly. All members and guests were impressed with the clarity and manner of presentation. Refreshments were served and the meeting adjourned after a stimulating discussion on experiences of the doctors present.

C. P. C.

The officers of Psi Sigma Alpha under the direction of President Don Young met at a dinner meeting at Bebe's Restaurant to outline Gamma Chapter's program for the ensuing semester. A series of dinner meetings with the local alumni as guests and speakers were planned twice monthly. The other officers for the new semester are: Lester Raub, Vice President; Roy Bubeck, Secretary-Treasurer; and Herb Harris, Corresponding Secretary. The chapter's new pledges are Hoy Eakle and Fred Lowrie.

We would like to thank the alumni of Gamma Chapter who responded so well to the letters sent out by the chapter encouraging their contributions to the Progress Fund for their fine cooperation. Let's remember that the progress made thus far is only the beginning. Can we count on you brothers who have not sent in your pledges? Gamma Chapter will appreciate it, the Progress Fund Committee will appreciate it, and most of all, the future students of our own Still College will be eternally grateful to you all.

—H. H.

professional training and skill to use in the best interest of the nation. Accordingly, following graduation in most of these professions following an internship, a registrant should be considered for further occupational deferment for a period not to exceed 30 days, in order that he may have an opportunity to engage in his profession in war production or in support of the war effort. Persons graduating in medicine, dentistry, veterinary medicine, or osteopathy are required to pass a State examination before they will be licensed to practice their profession and, accordingly, to permit the completion of such examination registrants who are graduates in medicine, dentistry, veterinary medicine, or osteopathy should be considered for further occupational deferment for a period of not to exceed 60 days following their graduation. Consideration for further occupational deferment, as provided above, should be made for failure to obtain the necessary training or in the case of persons graduating in medicine, dentistry, veterinary medicine or osteopathy, after the taking of the State examination, only if during such period the registrant is making an honest and diligent effort to become engaged in his profession in war production or in support of the war effort.

E. Determination and Certification of Quotas:

2. STUDENT QUOTA PREPROFESSIONAL FIELDS.—A national quota has been established for students who may be occupationally deferred at any one time by reason of pursuing course of study in premedicine, pre dentistry, pre veterinary medicine, pre osteopathy, and prepharmacy. This quota provides:

(a) That the total number of preprofessional students, occupationally deferred at any one time does not exceed 50 percent of the total average number of students in schools of medicine, dentistry, veterinary medicine, osteopathy, or pharmacy, respectively, in the years 1938-39 and 1939-40, and

(b) The total number of students occupationally deferred at any one time who have been accepted for admission by such school does not exceed that part of the capacity of such school available for civilian students in the entering classes for which such students have been accepted.

3. FUNCTION OF THE NATIONAL ROSTER.—The National Roster of Scientific and Specialized Personnel of the War Manpower Commission will certify to requests for occupational deferment of students under this bulletin as follows:

(b) Request for occupational deferment of a registrant in . . .

Determination and Certification of Quotas:

(a) That the total number of preprofessional students, occupationally deferred at any one time does not exceed 50 percent of the total average number of students in schools of medicine, dentistry, veterinary medicine, osteopathy, or pharmacy, respectively, in the years 1938-39 and 1939-40, and

(b) The total number of students occupationally deferred at any one time who have been accepted for admission by such school does not exceed that part of the capacity of such school available for civilian students in the entering classes for which such students have been accepted.

3. Function of the National Roster.—The National Roster of Scientific and Specialized Personnel of the War Manpower Commission will certify to requests for occupational deferment of students under this bulletin as follows:

(b) Request for occupational deferment of a registrant in . . .

If the National Roster cannot truthfully make such certification, it will not certify to the request. The National Roster will return the request for occupational deferment of students, whether certified to or not, to the institution which prepared the request.

4. Requests for Student Deferment.—The institution in which the registrant is a student will file requests for occupational deferment of such student with the local board as follows:

(a) For a student who has reached his 18th birthday but has not reached his twenty-second birthday, in duplicate on DSS Form 42 Special, and

(b) For a student who is 22 years of age or older, on DSS Form 42:

The Calvaria Chapter of the Log Book has found itself functioning as strong as ever. We were all very overjoyed in returning to school after the holidays and found numerous changes taking place in the school. On January 9 an election was held with Fraternity members elected to office, as follows:

President, Gerard Zauder; Vice-president, Milton Miller; Treasurer, Tobias Shild; Secretary, William H. Kimble.

February 20, we will initiate into our fraternity the following pledges: Alfred Baskin, Robert Bub, Dick Logan.

The Fraternity has been contemplating the purchase or rental of a fraternity house to build closer friendship and cooperation, and we hope to give you more news concerning this project in the near future.
Foundation O.K.'s New Hospital Construction for June

Dr. R. Dean Schick
Added to Faculty

President J. P. Schwartz announced recently the addition of Dr. R. Dean Schick to the staff of the Des Moines Still College. Dr. Schick is at present Assistant Professor of Animal Biology at the University of Oklahoma. He will join the Des Moines staff in June as Assistant Professor of Physiology, in charge of the courses in Physiology and Neurology.

Professional Qualifications
Dr. Schick is a native of Michigan and received his B.A., M.S. and Ph.D. degrees from the University of Michigan in 1922, 1923 and 1942 respectively. While at the University of Michigan he served as teaching assistant in the Department of Zoology from 1934 to 1936. From 1937 to 1941 he held a graduate Teaching Fellowship in the same department. Upon completion of his work at the University of Michigan he accepted an Instructorship in the Department of Physiology of the Ohio State University Medical School. Dr. Schick left this position at the end of the 1942 scholastic year to accept his present position at the University of Oklahoma, as Assistant Professor in the Department of Animal Biology. At Oklahoma Dr. Schick (Continued on Page 3)

Drs. Deitrich, Clark on Iowa Academy Program

Dr. L. A. Deitrich, Assistant Professor of Therapeutics, and Dr. Hugh Clark, Professor of Physiology, will present papers in mid-April on the programs of the Iowa Academy of Science. The meetings are held annually at a College within the state, and are attended by representative men of the several branches of science from the colleges and other laboratories of Iowa. The session for 1944 will be held in Cedar Falls, Iowa.

Dr. Deitrich will present a critique of the behavior of cerebrospinal fluid with practical considerations. Dr. Clark will report on an embryological problem, particularly with reference to the embryological approach to interrelationships between animals.

The Executive Committee of the Des Moines Still College Osteopathic Foundation met on Friday night and unanimously favored immediate construction of the teaching clinical hospital. Earliest date feasible, allowing for necessary preparation for the gigantic task, is June. The Committee, consisting of Mr. J. J. Neuhlin, President; Dr. Ruth Paul, Secretary; Mr. Nelse Hansen, Treasurer; Dr. Paul Park and Dr. J. P. Schwartz, President of the Des Moines Still College, authorized Wetherell and Harrison, Architects, to proceed with constructional details of the project.

Hospital Purpose
The Hospital is designed for instruction of approximately 75 upper class students of the college in the course of their undergraduate curriculum, and approximately 50 graduate students seeking training in specialized fields. Throughout both planning and planning of the Hospital, the Foundation has been alert to the necessity of instruction of graduates. Graduate instruction will not be limited to surgery alone, but will include Obstetrics, Gynecology, Pediatrics, Ophthalmology and Optometry, Otolaryngology, Laboratory Diagnosis, Roentgenology, Manipulative and Operative Orthopedics and Pre-and postoperative care of the Surgical Patient.

It is the intention of the Foundation that the Hospital be staffed by the most talented men which can be secured from the Profession. It is their further intention that, insofar as possible the alumni be repaid in professional training for the splendid support which has come from them for the Osteopathic Progress Fund. The need for this College service to alumni has long been recognized; the means for extending the service were not available.

At the outset, the hospital will consist of approximately 50 teaching beds and 25 private beds. Provision is made in architectural planning for expansion as needs demand at a later date.

The present space available for Hospital construction is on Sixth Avenue, a half-block north of the College Hospital site. The present College building is roughly five times the size of the present College building.

Proposed New Teaching Clinical Hospital

Detroit, Michigan
February 20, 1944
Dr. J. P. Schwartz, Pres.
Des Moines Still College
Des Moines, Iowa
Dear Dr. Schwartz:

Some time ago Phi Sigma Alpha Beta Chapter there requested contributions to the hospital building fund. At that time necessary expenses consumed the small interim salary. However, some time ago I sold a pint of blood to the hospital for $25.00 and am enclosing herewith the cash.

It's not much I know in comparison to what others are giving, but it really is in relation to my financial earning capacity at this time. It is interesting to know the Iowa Osteopathic Program is taking good strides forward.

Most sincerely,
(Signed)
Bertrand R. Adams, D.O.

Editor's Note.—On second thought, no comment is needed.
Dr. Laycock Active in Professional Meetings

Dr. Byron E. Laycock, Professor of Osteopathic Principles and Technique at the Des Moines Still College of Osteopathy, has been appointed by Dr. J. K. Johnson, Jr., Program Chairman, to head the Section on Technique at the annual War Health Conference of the State Society of Osteopathic Physicians and Surgeons. The meeting of the State Society will be held in May, and more details of the meetings will be given in the April issue of THE LOG BOOK.

Dr. Laycock will also appear on the program of the Child's Health Conference in Kansas City, April 12-15. Topics for Dr. Laycock's presentations in Kansas City have not been announced.

The Polk County (Iowa) Society was so enthusiastic about Prof. Laycock's discussion of "Chronicx and Rheobase in the Lesion Area," that he has been requested to appear again, for the second time within a year. He will address that Society in April.

Over-all Plan

Visualization of the College future on the basis of improvements completed and planned for the immediate future is projected as a goal, aims toward the establishment of the Des Moines Still College as a leading medical center in the Middle West. The College instructional staff is doubled, and Hospital personnel, in order that highly trained men will be available for instruction, and also to provide each man with sufficient time to accomplish the much needed osteopathic research. There can be no question that such a plan must eventually be put in force. There is a scarcity of investigative work from Osteopathic Colleges, and there are virtually no up-to-date textbooks for osteopathic instruction. There are no textbooks in either basic sciences or clinical application, written from an osteopathic viewpoint, which are used as standard texts. These faults can be corrected but only by securing a staff large enough that each man will have time free of instructional duties sufficient to promote his special interests.

Clinical data resulting from osteopathic care of a great variety of diseases must be accumulated and assembled. These things can be done only when the clinical staff is large enough to enable the staff members to organize these items.

The Hospital must be organized and a staff created such that it can offer to graduates, as well as undergraduate, the best in specialized, as well as general hospital training.

These goals are within easy reach, if the Osteopathic Profession, the alumni of the Des Moines Still College, want them. They cannot come tomorrow, they must be patiently planned and loyally executed. Response to the College campaign and to the Over-all campaign gives every indication that these projects can be completed in a matter of a few years. Every member of the Osteopathic Profession must, however, sincerely want to produce a center of learning, with his Alma Mater as nucleus. Every one must be vitally concerned about the welfare of the Profession, of his College, of himself.

Emergency Conference Great Success

Dr. Johnson Organizes For Iowa Campaign

Dr. J. K. Johnson, Jr., of Jefferson Director of the Iowa Program of the Over-all Campaign, has announced his selection of district captains who will act as aids in bringing the Over-all Campaign to a successful completion. District Captains for Iowa are as follows:

No. 1. Dr. Byron Wayland, Cedar Rapids
No. 2. Dr. Ronald Woods, Shelby
No. 3. Not appointed
No. 4. Dr. Alan Neuman
No. 5. Dr. Harold Summers, Hawarden
No. 6. Dr. Harry A. Barst, Des Moines

Dr. Johnson called a meeting of the Iowa Society in Des Moines for the purpose of selecting the Iowa District Officers. The meeting was attended also by Dr. Mary E. Golden, President of the Iowa Society, and by Dr. Charles G. Nunn, Chairman of the Des Moines Still College Osteopathic Foundation, and by Mr. Dwight Herrick, Secretary of the Iowa Society. The duties of the campaign workers were pointed out, and each District Captain felt enthusiastic in this new project.

The group feels that the Over-all Campaign will not be easy from the point of transportation, but feels that the Iowa profession is sufficiently aware of the dangers of procrastination and negligence that they will support to a man, the A.O.A. effort to aid the Colleges and therefore the profession.

Why an Over-all Campaign

The Over-all Campaign, carried out through State Directors and District Officers of the Osteopathic Physicians and Surgeons, is intended to reach every physician, acquaint him with the facts of professional need and allow him to participate in the educational progress which is sweeping the Osteopathic Profession throughout the country. You may contribute to the College of your choice or to the Over-all Fund which will be divided equally among the Colleges. Be certain that you have done your utmost for the plan you think best.

New Policy Initiated In Faculty Meetings

In addition to the discussion of routine business during the faculty meetings, an innovation will be made in the March meeting. Following the business meeting, each member of the faculty will present his views and continuing monthly thereafter will include the presentation of a scientific paper by a member of the faculty.

Osteopathy Without Limitation

$100-a-Year Club

Your editor was recently asked, "What is this $100-a-year Club?" Simply stated, the $100-a-year Club is an organization designed to enlist the needed support of alumni of Des Moines Still College of Osteopathy and friends of the College.

"But why is it necessary to have a $100-a-year Club after inaugurating the "$20-a-Year Club," "$5-a-Year Club," and "Progress Fund?"" The expansion program of the College and proceeds from the National (Overseas) and Alumni of Des Moines Still College Club is an organization designed to avoid duplication of effort, stationery and officers, it has been suggested that the Still College Club be used for the organization of the $100-a-year Club. (A report of the activities of the Still College Club to date will be found on page 26.)

The foregoing has been intended as a means of acquaintance of the alumni with problems of their College. Inquiries and reactions will be appreciated.

Still College Club

Financial Report

The Still College Club ($1-a-month Club) was established by the Public Relations Committee of the National Alumni Association, has a fluctuating membership of some 200 therefore it presents the following financial report of the Club since its inception.

Total Income ....... $3,042.10
Expenditures ...... 2,810.73
Operating Expense 260.12
Library, Periodicals 1,116.78
Books, Cataloguing 914.03
Lots for Hospital 512.68
Cash on Hand ....... 231.47

Dr. Philip Reames Joins Compton Hospital Staff

Dr. Philip Reames, graduate of the Des Moines Still College in 1942, and assistant in the department of anatomy of that institution for 25 years, has become associated with Drs. Heacock, Cobb and Myers of the Compton Hospital, Compton, California. He has completed graduate work at the College of Osteopathic Physicians and Surgeons in Los Angeles and successfully completed requirements for his license to do Major Surgery. The LOG BOOK expresses confidence in Dr. Reames' successful practice at Persia, Iowa, and extends to him kindred regards.

Dr. Chandler's Daughter Passes Away

Friends of Dr. and Mrs. W. P. Chandler, Jr., of Persia, Iowa, were grieved at the news that their daughter, Grace, was grieved at the news that their daughter, Grace, passed away on February 27. Miss Chandler was eleven years of age. Her body was transported to Wyandham, Maine, for burial.

Dr. Chandler is a graduate of the Des Moines College in 1920. He was engaged in youth programs. He also has made many clay and plaster models for the demonstration of anatomical structures and pathological units of larger organs.

Dr. Schick will head the Department of Physiology, replacing in that capacity, Dr. Hugh Clark who has been Chairman of the Physiology Department since 1939. His duties will include both lecture and laboratory work. He has already made preparations for enrolling the course and for the addition of equipment, both lecture and laboratory work and especially prepared equipment of his own devising for demonstrations and research. Before joining the staff of the College of Osteopathy, he studied sexology, endocrinology, and physiology, his specialty, Dr. Schick has also a cordial respect for the principles and philosophy of osteopathy.

Professional Associations

For Dr. Schick's keen appreciation of biological problems he was elected to the Phi Sigma, honorary biological society, and maintains active membership in that group. He is also a member of the select honorary, scientific society, Sigma Xi, to which he was admitted for his investigations on reproductive phenomena. 

The Des Moines Still College of Osteopathy is extremely fortunate in securing the valuable services of Dr. Schick for its Basic Science work. The LOG BOOK is proud to extend to Dr. Schick and his family a most cordial welcome to Des Moines.
The Calvaria Chapter of the Lambda Omicron Gamma Fraternity has issued its 1937-38 booklet, outlining its plans for the coming year. New members are being initiated and membership is open to all women who have completed two years of college work.

The chapter plans to hold a dinner meeting on the second Wednesday of each month, with the location announced in the booklet. The meetings will be open to all women interested in the fraternity, and the chapter welcomes new members.

Dr. W. L. Crews recently left his Redfield, Iowa, practice to join his brother, Dr. T. D. Crews, in Gonzales, Texas. On February 13 their Hospital and Clinic was opened for inspection.

The new hospital is located in a former residence which has undergone extensive remodeling and renovation. Offices, examining rooms and reception rooms are located on the first floor. Nine hospital beds are located on the second floor, as well as a sound-proof nursery. The hospital is equipped with metal bassinets and an incubator contributed by babies delivered by Dr. Crews during his Iowa practice.

The hospital features inlaid linoleum throughout, venetian blinds, a modern and well-lighted operating room, fluorescent lights and other thoroughly up-to-date equipment.

Both Dr. T. D. and W. L. Crews are graduates of Des Moines Still College of Osteopathy and both were initiates of the Gamma Chapter of Phi Sigma Gamma fraternity, as were many of the active alumni of the college.

The chapter is looking forward to the social events to come, attended by about a party planned by the Fraternity, and a dance to be held in the spring season.

The fraternity welcomes Marion Thompson, our newest pledge.

Dr. R. MacFarlane Tilley, Overall Campaign Chairman, offered advice to the several states. Dr. Tilley cannot be given here of the method of utilizing campaign funds, but suffice it to say that 200 non-collegiate delegates to the conference felt more than confident that the purposes for the several campaigns were being amply fulfilled. (Watch the next FORUM for details from each college on additions completed, additions contracted for, and additions projected by the several colleges.)

Iowa Delegation

Cognizant of the professional crisis at hand, the Iowa Delegation of the State Society of Iowa and the Des Moines Still College were well represented.

The Iowa delegates included Dr. Mary E. Golden, President of the State Society, J. K. Johnson, Jr., James, Vice President, and Mr. Dwight S. Murring, Secretary. Representatives of the college were Dr. J. P. Schwartz, President and Dr. G. F. Otter, Dean. Dr. Theodore Tuckes of Davenport was an additional Iowa representative.

State Chairmen

To date, the following state chairmen of the overall campaign have been appointed:

- Canada—Dr. E. S. Detwiler, London, Ontario
- Arizona—Dr. J. K. Johnson, Jr., Phoenix
- Massachusetts—Dr. H. E. Beasley, Barnstable
- Michigan—Dr. W. P. Buer, Detroit
- Minnesota—Dr. C. C. Lucas, Ann Arbor
- New Hampshire—Dr. O. M. Houghton, Salt Lake City
- New Jersey—Dr. D. E. Weiss, Princeton
- Oklahoma—Dr. W. E. Pettit, Oklahoma City
- Pennsylvania—Dr. H. C. Orth, Lewiston
- South Dakota—Dr. C. W. Millard, Sioux Falls
- Tennessee—Dr. James Winn, Nashville
- Texas—Dr. C. F. Sparks, Dallas
- Utah—Dr. A. K. Williams, Salt Lake City
- Virginia—Dr. H. S. Lieberg, Richmond
- Washington—Dr. C. H. Baker, Seattle
- West Virginia—Dr. J. H. Stimpson, Morgantown
- Wisconsin—Dr. L. S. Harned, Madison
- Wyoming—Dr. B. Traux, Cheyenne

If and when you change your address, please notify the Log Book promptly.
Program Arranged for Week of Graduation

Final examinations will be held May 11 and May 12. Sophomore comprehensive examinations will be held May 4, May 11 and May 12. Graduating seniors, having completed requirements in the preceding examinations and guests, will be given an opportunity to take final examinations at the end of their last semester.

Senior Dinner

The College gives a farewell banquet for each graduating class. In accordance with custom, the banquet will be held at Younkers Tea Room, the Thursday prior to Commencement day. The time is Thursday, May 11 at 6:30 p.m. Dr. Schwartz, as president of the College will act as toastmaster. Speakers at the banquet will include Dean Owen, Leo Luka as president of the Class and the faculty adviser to the class.

Commencement

Commencement exercises will be held Friday evening in St. John's Lutheran Church in Des Moines, at 8:00 o'clock. At that time Judge Joseph E. Meyer will address the Class and the faculty adviser to the class. The class is extremely fortunate in acquiring Judge Meyer as (Continued on Page 2)

WPB Releases Pencillin For Few Sulfra-Resistant Venereal Cases

In the interest of prevention of venereal disease by treatment of venereal gonorrhoea, patients, who may act as carriers of the disease, the WPB has released a limited amount of penicillin for civilian use through U. S. Public Health Service.

Three penicillin stations have been established in Iowa—Mercy Hospital in Sioux City, Broadlawns General Hospital in Des Moines and University Hospital in Iowa City. Application for penicillin administration should be made to directors of these institutions.

Treatment provided is free for cases accepted. However it is emphasized that only a limited number of cases can be accepted. In those instances where the drug has been used it has proved highly successful. Supplies of penicillin and its administration are made available through the Lanham fund.

Dr. W. D. Blackwood of Hartshorne, Oklahoma, who had previously made a substantial pledge to support osteopathic progress, was not extending that support. Dr. Blackwood is sufficiently impressed with the need for urological training and the importance of Urology in diagnosis that he says, "I will, in addition to my previous contributions, make a substantial contribution toward the purchase or furnishing of equipment for this department (Urology), if and when the department is established and space available."

The College appreciates the perspicacity of Dr. Blackwood in emphasizing this field of specialization, and sincerely appreciates his pledge to put his convictions into practice. (It will be recalled by readers of the LOG BOOK that Dr. James E. Dunham of Mansfield, Ohio, pledged a department of Otolaryngology. The college is genuinely grateful to its alumni for this progressive spirit in the expansion of the teaching Clinical Hospital.)

Foundation Purchases Additional 6th Ave. Lots

Mr. Nelse Hansen, Treasurer of the Des Moines Still College Osteopathic Foundation, was successful in obtaining three lots adjacent to former holdings in the 800 block on Sixth Avenue in Des Moines. The Foundation now has title to approximately a 300 foot frontage on Sixth Avenue, ample for the needs of the teaching clinical hospital and affiliated units.

Mr. Hansen deserves a great deal of credit for his successful efforts in acquiring this property.

Mrs. Elmets Donates To Progress Fund

Mrs. Will Elmets of Des Moines, desirous of furthering the cause of osteopathic education and equipment of the Des Moines College, presented a check for $100 to Dr. J. P. Schwartz. Since that time the project has not been extended to the laity, Mrs. Elmets' interest in osteopathic development is particularly noteworthy.
Dr. Campbell Presents
First Aid to Seniors

Dr. F. D. Campbell was appointed by Harry F. Wheaton, Director of First Aid and Water Safety for Polk County, to present the regular and advanced courses in Red Cross First Aid to Seniors at the Des Moines Still College. Classes met three nights weekly for the regular course and the advanced course, which was completed March 31. The instruction was given by a Red Cross representative, Mr. Wheeler Van Steinburg, from St. Louis upon completion of the course.

Dr. Campbell has earned the tenor solist with the choir.

The class is offered in alternate semesters.

Dr. Campbell has earned the tenor solist with the choir.

The class is offered in alternate semesters.

Post-Graduate

Plans of Seniors

Tentatively the seniors who will be graduated in May have decided on the following courses:

Don Young—Internship at Detroit hospitals.

Earl Small—Internship at Portland (Me.) Osteopathic Hospital.

Roy Bubeck—Internship at Art Center Hospital, Detroit.

Gerard Zauder—Internship at Art Center Hospital, Detroit.

Raymond Otten—Internship at Massachusetts Osteopathic Hospital.

Leo Luka—Practice in Des Moines.

James Woodmansee—Practice in West Virginia.

Walter Goff—Practice in West Virginia.

Detroit Hospitals Seek
Seniors for Internships

Dr. Don Wicke Stationed
At Santa Monica Calif.

Dr. Don Wicke, graduate of the Des Moines Still College in 1939, left his Ohio practice before Pearl Harbor to enlist in the RCAF. After the Pearl Harbor attack, when the United States entered the war, he was transferred to the U.S. Air Force. He has been a pilot in the Air Force for more than two years and recently was stationed at Santa Monica.
One Treatment a Week?
If the average physician were asked to
answer the question "Would your standard of living be impaired if you gave one treat-
ment less per week?", he would almost unani-
mously answer that it was not impair-
ing. Many physicians, however, reduce this amount of the fee for one treatment per week.

Why, then, not put that fee bene-
fit the Osteopathic profession? A very simple calculation will tell you the number of treat-
ments they gave in the past week. There can be no question that the average Osteopathic Physician would not suffer if his income were reduced by the amount of the fee for one treatment per week.

Dr. Wilbur Bohm, Department of Physical Education and Athletics of the State College of Washington, has inspected the college library and has made many suggestions to the college library and has made many suggestions to the College Library a copy of an exhaus-
tive treatise on "TRAINING AND CONDITIONING PRAC-
tices of College and University Basket Ball Coaches and Trainers."

Dr. Bohm has done a painstaking and masterful compilation on the topic above, principally through the use of questionnaires and observations in the fields of diet, methods of preparation for food of athletes, period of training previous to the athletic season, length of workouts, number of workouts per week, shower temperature, massage, treatment of pulled muscles and other soft tissue injuries, type of therapy used and length of time of application of several therapeutic measures.

Dr. Bohm is grateful to Dr. Bohm for an
installation of Lab.
Furniture Completed; Visitors Impressed
After a four months siege of remodeling and inspection of the laboratories, the new floor plan of osteopathic progress has been nearly completed. The College library and its continued pro-

National Overall Campaign in Full Swing
The Overall Campaign for funds sponsored by the A.O.
and under the guidance of Dr. MacFarlane Tilley, General Chairman, and Mr. Harry E. Caple, Chairman of the Finan-
cial Department, is reaching into every part of the United States. Latest report in-
dicates that more than 40 states have sent contributions to the Fund. Coverage in those states is, however, very incomplete and the total is expected to increase rapidly within the next two weeks.

Washington
Leading the parade of sponsors of Osteopathic Progress at the State of Washington, whose
initial contribution to the Fund was more than $9,000 contributed by 18 doctors, Washington also
claims the distinction of sending the largest single pledge—$2500 from Dr. Everett W. Pruitt of Seattle.

With the interest shown by other states in carrying forward the policy of Osteopathic Progress, however, Washington may well look to its laurels! After almost a year of campaigning the Osteopathic Profession shows a new enthusiasm. Get on the bandwagon—GIVE TO THE OVERALL OR TO THE COL-
lege of your choice.
THE LOG BOOK

O. W. C. C.

Our Bunco Party held on March 24 was quite a success. Over 200 tickets were sold and we especially want to commend Homer and Laura Allhouse and Helen Sherwood for doing such a good job on this. We also want to thank all the other club members for the fine cooperation both in selling tickets and serving on the various committees. Most of the crowd had never played Bunco before but found it to be a lot of fun. The door prize, won by Trudy Hoffman, was a gift certificate from Youngers amounting to $5.00, and prizes of $2.00 each for high man and lady were won by Professor Merrill and Helen Sherwood. Gerry Zauder won the bobble prize! The club decided to donate $50.00 to the new clinical hospital and most of this contribution was made up of proceeds from the Bunco Party.

Our last meeting was held at the home of Alko Kuramoto with Tama Shimeda acting as co-hostess. After the business meeting, Dr. Owen showed pictures of his travels. They were very interesting and we certainly enjoyed them.

The next meeting will be the senior banquet and all members will be informed soon as to the time and place.

—M. R.

ΦΣΓ

Phi Sigma Gamma voted a donation of twenty-five dollars to the Foundation. As a result of the Round Robin Bowling Tournament we wish to boast of our victory over the ΤΣ and Atlas.

Plans have been laid to give a party to initiate the new semester. Tentative plans include invitations to the faculty and student body as a whole. This will take place the first week of the new semester.

ATLAS CLUB

On April 8th members of the Atlas Club and their wives enjoyed a dinner at the Y.M.C.A. The Atlas wives prepared and prepared the dinner. Our better halves were enlightened concerning the duties of a doctor's wife in an excellent speech by Dr. Leininger.

At our last meeting, alumnus Dr. Dietrich described the handling of fracture cases in the office and illustrated his talk with X-ray films from his own orthopedic cases.

Our Senior Banquet will be at the Knollwood Hotel on April 27 and will honor the graduating brothers Walter Goff and Don Young. Atlas alumni are cordially invited.

The recently elected officers for next semester are: Noble Skull, Lester Raub; Occipital, Scott Heatherington; Pylorus, Fred Lowrie; Styloid, Don Mack; Sacrum, Francis Ayres. A formal meeting and practical work might be held on Monday, May 1, at the home of brother Scott Heatherington.

—L. R.

Correction Regarding Enrollment Dates

The last issue of the FORUM listed the next class entering the Des Moines Still College Osteopathic Pathway as of October 9. We wish to call attention to the fact that the next date of registration is May 15.

O.W.C.C. and P.S.G.

Make Gifts to Foundation

The Osteopathic Women's College Club, composed of wives of students of the College, realized approximately $50.00 from a Bunco party held at the PSG fraternity house March 24. President Ann Merrill of that group has expressed the desire to contribute this fund "to purchase something that will be of value to the new hospital."

The PSG fraternity, contributing $25.00 to the Foundation, have specified that the money should be applied toward exhaust fans for the laboratory.

Both Foundation and College officials are grateful for the sincerity of purpose and interest which both organizations have shown toward development of the College and Hospital as efficient teaching units.

Dr. Jack Price Opens New Mexico Hospital

Dr. Jack Price, 1943 graduate, reports that he has opened a small hospital, "Price Hospital" in Hobbs, New Mexico. Dr. Price reports very enthusiastically about Osteopathy in New Mexico and points out two splendid openings in that state.

Eunice and Lovington, New Mexico, are without Osteopathic Physicians or Medical Physicians and a doctor in either town would serve a large area in a rich oil country.

We wish every success to Dr. Price in his new enterprise and express the hope that he is successful in attracting colleagues to his state.

Birth

A daughter, Mary Janet, was born March 17, 1944, at Swollum Hospital, Storm Lake, Iowa, to Dr. and Mrs. T. J. Schloff.

War Service Conference

If we don't hang together we'll surely hang separately. Learn what your profession is doing legislatively, both Federal and state. Attend the closed sessions of the A.O.A. War Service Conference in Chicago this summer and find out for yourself.

Dr. Maclntire Leaves Boston, South Dakota, Seeks Replacement

Dr. D. W. Maclntire writes that he is leaving his practice in Bismarck, S. D., to go to another city. Since Osteopathy has been firmly established in this community and the nearest doctor is 50 miles away, he is anxious that a recent graduate apply in Bismarck. Cordial support is given by the Commercial Club of the town and practice rights are unrestricted except as regards major surgery.

Dr. Maclntire points out that South Dakota is one of four states which have an Osteopathic Physician on the State Board of Health. Moreover, in South Dakota "any public health program sponsored by or using public funds (Federal or State) cannot be administered in a manner discriminating against any school of practice, and granting the patient free choice of doctors under such a program."

Dr. Maclntire states that there are many other excellent locations in western South Dakota.

Foundation Reports

Campaign Total

Figures released by Dr. Mary E. Golden, Chairman of the Campaign Committee of the Des Moines Still College Osteopathic Foundation, show that the total pledged to the campaign is now in excess of $110,000. Of that amount $64,000 has been paid in cash or in U. S. War Bonds.

Dr. John S. Anderson, Mrs. Johnson See College Progress

Dr. John S. Anderson, River Falls, Wisconsin, paid a visit to the Des Moines College for the express purpose of inspecting the remodeled laboratories and the new dormitory. Dr. Anderson feels that he can become a better salesman for Des Moines and for Osteopathy, now that he has seen the progress.

Confident that both the College administration and the Des Moines State College Osteopathic Foundation have acted wisely and rapidly in the laboratory expansion program, Dr. Anderson was especially interested in the improvements which had been made. There is little question in his mind that the rejuvenated Basic Science Department will speak for themselves before any investigating body.

Mrs. Delbert Johnson, visiting from South Dakota, served as emissary for her husband to view personally changes made at the College. Her newly formed impressiveness of the present College promises a glowing report to the Washington group and renewed enthusiasm for Osteopathic Progress in education from that state.
Dr. Golden Honored By State Society

Dr. Mary E. Golden, retiring president of the Iowa Society of Osteopathic Physicians and Surgeons was presented with a plaque in honor of her two years' tenure of office in the State Society.

While Dr. Golden was president of the State Society she led the group ably in many causes for the benefit of the public health and the protection and advancement of her profession. The society has continued its cooperation with state agencies responsible for venereal disease control and for the control of infectious diseases by preventive means among school children. Dr. Golden was instrumental in acquiring Red Cross First Aid training for physicians in Iowa and neighboring states and for instituting the Red Cross program in the senior curriculum of the College. As a result more than a hundred physicians have taken the regular, advanced and instructor's course in First Aid and have taught, probably thousands of civilians the elements of emergency protection of themselves and fellow citizens.

Under the leadership of Dr. Golden the Iowa Physicians have cooperated in the administration of obstetrical care for the wives of service men and supported the appropriation bill in the U. S. Congress allowing funds for commissions in the Navy, and U. S. Public Health Service.

Dr. Golden has also provided leadership in the matter of campaigning for funds among the alumni for the Osteopathic Progress Fund at a great personal sacrifice of energy for the permanent benefit of the Osteopathic Profession. Though Dr. Golden retires from the presidency of her State Society, she retains a sincere interest in all professional affairs and community projects. In the words of Arthur Brayton, Secretary of the Des Moines Convention Bureau, "Dr. Golden is really a golden asset to the community."

Have You Made Arrangements to Attend the Chicago War Health Conference

Combined Curriculum Plan Adopted by Iowa Wesleyan

In a bulletin issued recently by Iowa Wesleyan College, Mt. Pleasant, Iowa, a combined curriculum plan has been announced by that institution in cooperation with the Osteopathic College. The bulletin describes the method of meeting the minimum preosteopathic requirements in two years and the special program arranged whereby a student may take three years of work at Iowa Wesleyan and receive a B.A. or B.S. degree and satisfactory completion of the requirements for a D.O. These bulletins are available by request from the Public Relations office of Iowa Wesleyan College.

The plan for combined curriculum has been studied for some time by Dr. Niles and Dr. R. N. MacBain, President of the American Association of Osteopathic Colleges, and Dr. R. C. McLaughan, Executive Secretary of the A.O.A. The program as worked out to the mutual satisfaction of both groups is presented in the special bulletin of Iowa Wesleyan.

Although such arrangements have previously been made in the case of individuals, Iowa Wesleyan is the first institution which has openly advertised such a program for the mutual benefit of the liberal arts college and the osteopathic college.

(Continued on Page Four)

Dr. Stanley Niles Visits Des Moines College

Dr. Stanley B. Niles, President of the Iowa Wesleyan College, visited at length with President Clark and Dean Owen of the Des Moines Still College of Osteopathy, after a sight-seeing tour through the building. Dr. Niles, in Des Moines on business of his College, seemed well-pleased with the physical plant of the College and discussed various problems of education, particularly of the postwar era, with the Des Moines College officials.

Iowa Wesleyan College has been through the years a "pioneer" college, and with an executive such as Dr. Niles there is adequate assurance that this spirit will continue. It is most pleasant from the point of view of the osteopathic college in Des Moines to have the friendly cooperation of a sister college of Iowa.

Dr. Schwartz Resigns as President

Dr. J. P. Schwartz, who resigned from Iowa Wesleyan College administration, after 25 years of service to the College.

At a meeting of the Board of Trustees of the Des Moines Still College of Osteopathy on Wednesday evening, May 3, Dr. J. P. Schwartz offered his resignation from the presidency of the Des Moines College. Pressure of outside work and necessity of a full-time man as leader of the College during these times of rapid advancement were given as the principal reasons for his resignation at this time. In resigning from the presidency, Dr. Schwartz automatically relinquished his seat as member and president of the Board of Trustees. He still retains his position as Chairman of the Department of Surgery, holding the rank of Professor of Surgery.

Friends of the Des Moines College recognize in the loss of Dr. Schwartz the creation of a new and serious problem for the College. Dr. Schwartz has served the College faithfully in the capacity of graduate student and assistant instructor in the basic sciences, Professor of surgery and Dean of the College, and finally as president since 1919.

Kirkville Graduates

Following graduation from the Kirkville College in 1919, he came to Des Moines as a graduate student. He interned for a year at the Des Moines General Hospital under the tutelage of Dr. S. L. Taylor, and was then made House Physician of that institution. For the next five years he held a surgical assistantship to Dr. S. L. Taylor. In 1926 Dr. Schwartz was made Dean of the College and President and Chief Surgeon of the Des Moines General Hospital. He retained his position as Dean of the College until the retirement of Dr. A. D. Becker in 1942, at which time he was elected to the presidency of the institution.

Service

Throughout his association with Osteopathy, Dr. Schwartz has given unstintingly of both time and funds for the progress of the profession. At the Des Moines General Hospital he has maintained a surgical and general hospital training school by way of internships. Since his association with the College as President he has instituted a program of externships for the College seniors. His personal experience and that of his staff have at all time been available for aiding those who seek to learn. Without hesitancy, but also without braggadocio or fanfare, Dr. Schwartz's activities have symbolized sacrifice and altruism for the advancement of the advancement of the profession of Osteopathy.

College Record

During his tenure of office as President of the College, Dr. Schwartz has been a dynamo in the powerplant of educational progress which has served the profession. Among his accomplishments and those in cooperation with the other colleges of osteopathy, (1) He has raised entrance requirements and has raised the scholastic standards within his own institution. (2) He reorganized the faculty on a
Dr. Schwartz

(Continued from Page 1)
workmanlike basis in order to increase the efficiency of his staff for the promulgation of ideas and training in the interest of his profession. He has three faculty members of outstanding ability—Mr. H. W. Merrill in the Department of Bacteriology; Dr. L. A. Deitrich in the Department of Osteopathic Therapeutics; Dr. D. S. Jackman in the Department of Physiology.

(4) He has, by cooperation with the alumni, placed the library of the College on a workable and learned basis. (5) He has reorganized the entire plant of the College, remodeling and equipping the basic science laboratories, as described from time to time in these pages in connection with our progress fund campaign. (6) He has given grudgingly to the College legislation and Selective Service rulings which have been complete to the benefit of the osteopathic profession in Iowa for two years. (7) His relationship with students has been most cordial, and every possible, personal intervention to help with individual problems has been his method of aid. (9) In order to permit student expression of opinion in matters of importance to College development, he created the Student Faculty Council which has for the past two years been a vital phase of College administration.

(10) He has encouraged and actually built an alumni enthusiasm for College activities which has been genuine and perhaps enduring since the origin of the College. (11) For the privilege of participating in this program of progress, for the privilege of devoting his time to college affairs to the detriment of his own practice, for the privilege of steering his institution in the right direction educationally Dr. Schwartz has received no financial compensation. He has received, however, a compensation which few during their lifetime can achieve:—the happiness which comes of devotion to a cause; friendships which have come through his college association; respect of every man who has watched him progress, for he is a true osteopathic enthusiast; admiration of all those whose privilege it has been to work with him. From the beginning throughout his career have carved for Dr. Schwartz an indestructible monument to the history of Osteopathic Progress.

For Your Consideration

Your editor publishes, for what is believed the first time, the ARTICLES OF INCORPORATION OF THE DES MOINES STILL COLLEGE OF OSTEOPATHY, with a statement of proposed amendments. It is the desire of the entire organization that there be perfect understanding between the Des Moines College and the Profession. It is urged that each alumnus and others who are specially interested in the Des Moines College study both the Articles and the amendments which are proposed. Formal action will be taken upon the amendments at the annual meeting of the corporation on June 19, at 8 p.m.

ARTICLES OF INCORPORATION

of the

DES MOINES STILL COLLEGE OF OSTEOPATHY

KNOW ALL MEN BY THESE PRESENTS:

That S. L. Taylor, C. W. Johnson, D. W. Roberts, Henry Mack and D. S. Jackman, being persons of full age and citizens of the State of Iowa, do hereby constitute themselves together for the purpose of forming a Corporation, not for pecuniary profit, to be known as the Des Moines Still College of Osteopathy, under the laws of the State of Iowa, with all powers, rights, privileges and immunities now or hereafter conferred upon such corporation by the laws of the State of Iowa, to that end hereby adopt the following Articles of Incorporation:

ARTICLE I.
The name of this corporation shall be “Des Moines Still College of Osteopathy” and its principal place of business shall be in the city of Des Moines, Iowa.

ARTICLE II.
The corporation shall have the power and the right, and its purpose and object is, to establish, maintain, operate and conduct in the city of Des Moines, Iowa, a college for the instruction and education of persons in the science of Osteopathy, and in such other sciences as may be prescribed in the course of instruction adopted. The corporation may also establish, operate and conduct hospitals for the cure and treatment of persons diseased or injured, and in that connection may establish, conduct, operate and maintain a school or schools for the instruction, education and training of nurses.

ARTICLE III.
The corporation may confer the degree of Doctor of Osteopathy, and such other degrees usually conferred by such institutions and appropriate to its course or courses of instruction.

ARTICLE IV.
The corporation shall own, possess all the powers, rights and privileges now or hereafter conferred by the laws of the State of Iowa upon corporations not for pecuniary profit, and shall endure for a period of fifty years, unless sooner dissolved by a three-fourths vote of all the members thereof, or by an act of the General Assembly of the State of Iowa, by operation of law.

ARTICLE V.
The members of such corporation shall consist of the incorporators above named, Charles D. Finley, J. G. Connolly, and such other persons as the members may associate with them and by a majority vote elect as members. The members may from time to time adopt by-laws inconsistent with these Articles of Incorporation, and may repeal, alter and amend the same at pleasure. A majority of the Board of Trustees shall constitute a quorum for the transaction of any business. Certificate of membership may be issued by each member to such persons requesting membership in the corporation.

Each member shall be entitled to vote at all meetings of members, and such vote may be cast by proxy in writing.*

ARTICLE VI.
The affairs of the corporation shall be managed and conducted by a Board of Trustees composed of not less than seven and not more than twenty-five members of the corporation. The Trustees shall be elected at the annual meeting of the members, and shall hold office for one year and are subject to annual election and to the removal of the Board of Trustees by a majority vote of the Trustees. Each member of the Board of Trustees shall serve without pay.

The Board of Trustees shall meet twice each year, in January and May. Special meetings may be held at other times on the call of the President or any two members. The Trustees shall have power to appoint, employ such instructors and teachers and other persons and employes with such power and duties and at such salaries and compensation as they may fix. Until the first annual meeting of the members, and until their successors

(Continued on Page 3)

Foundation Acquires Two Lots on 6th Ave.

The Des Moines Still College Osteopathic Foundation announces that it has purchased an additional 66 feet frontage on Sixth avenue in Des Moines at 806-808-810 Sixth Ave. As previously, Mr. Neil Green, Secretary of the Foundation, acted for the Foundation in completing the transaction. Mr. Hansen points out that we now have title to a total of 374 feet in the block north of Center street. The lots are 117 feet deep.
Articles of Incorporation

(Continued from Page 2)

are elected and qualified, the Board of Trustees shall consist of S. L. Taylor, C. W. Johnson, D. W. Roberts, Henry Mack, D. S. Jackson, Charles D. Finley and J. G. Connolly.

ARTICLE VII.
The annual meeting of the members shall be held in Des Moines, Iowa, on the first Tuesday after the third Monday in May of each year: Special meetings may be held from time to time upon call of any two members. At special meetings no business shall be transacted except such as may be specified in the notice of the call therefore; and notice of all special meetings shall be given in writing by mailing the same to each member at his postoffice address at least five days prior to the day of meeting, unless all the members shall by written consent of the holders of a majority of the stock in the corporation, duly signed by them, consent to the holding of a special meeting.

ARTICLE VIII.
The officers of the Corporation shall consist of a President, a Secretary and a Treasurer. The President and Secretary shall be members of the Board of Trustees. The Treasurer need not be a member of the Corporation or of the Board of Trustees. The officers shall have such powers and perform such duties as may be prescribed by the By-Laws or by resolutions of the Board of Trustees from time to time. They shall be elected annually by the members of the Corporation at their Annual meeting. Until the first annual meeting in May 1912, and until their successors are elected and qualified, S. L. Taylor shall be President, D. S. Jackson, Secretary, and D. W. Roberts, Treasurer of the Corporation.

ARTICLE IX.
The fund of $50,000,000 raised and collected by subscription and donation, designated in the subscriptions thereto as the "Building, Equipment and Endowment Fund of Des Moines Still College of Osteopathy," or as a fund to be used for a plant, equipment and endowment fund of Greater Still College, or so much thereof as may be collected and received, shall constitute a fund to be used only so far as necessary for the purpose of purchasing and acquiring suitable premises and building for college purposes, and the equipment thereof, and the balance thereof remaining after acquiring and equipping its said premises and buildings shall be invested by the Board of Trustees, and the income therefrom only, used for the purpose of paying any deficit in the operating expenses of the college, not including salaries to teachers or officers. Any fund or property received by the corporation by gift, donation or devise shall be held and used by the corporation subject to any restrictions and limitations as to its use as may be imposed in the gift, donation or devise thereof. §

ARTICLE X.
The incorporators and members shall not be personally liable for any of the indebtedness of the corporation, but their property shall be exempt from any liability for any of the debts of the corporation.

ARTICLE XI.
These articles of incorporation may be altered or amended at any annual or special meetings called for that purpose, by a majority vote of its members; provided however, that Article IX and X hereof shall not be amended or changed to alter the limitations imposed upon the use of said fund or to subject members to liability.

Witness our hands this 12th day of September 1911.

*See proposed amendment below.

&*Amended, 1925, so that meeting may be held in June.

§See proposed amendment below.

Proposed Amendments

The Board of Trustees of the Des Moines Still College of Osteopathy recommend the consideration of the following amendments:

ARTICLE V. Amend by adding the following stipulation, "Honorary members of the corporation, without the privilege of voting, may be elected in the same manner as active voting members."

ARTICLE IX. Amend by adding the following: "In the event of dissolution of the corporation, either voluntary or involuntary, its Board of Trustees and the Executive Committee of the American Osteopathic Association shall mutually determine superior management of its assets in such manner as to promote the best interests of the Osteopathic Profession through an educational program, research program or such other means as may be mutually devised."

(Signed) HUGH CLARK, President.

Looking Forward

With the beginning of the summer semester, Des Moines Still College of Osteopathy is moving forward into a new period of educational and professional advancement. A large part of the measure, this is due to the beneficent support of the institution by its alumni and friends. The realization of this ambition is evidenced not only in the form of new physical equipment and added facilities but in the heart of each alumnum who has found it possible to return to his alma mater and sense the new spirit of osteopathic educational progress.

Our college has been fortunate in the choice of strong and far-sighted leaders who have kept the institution abreast with the times, in the names of Dr. S. L. Taylor, Dr. C. W. Johnson, Dr. A. D. Becker and Dr. F. Schwartz. The new President, Dr. Hugh Clark, is no exception, entering his duties with a steadfast resolution to make of Des Moines Still College of Osteopathy an even greater institution, one to which we may all point with pride for having played a part in its advancement.

DR. O. EDWIN OWEN, Dean.

Psi Sigma Alpha Makes Honorary Awards

Psi Sigma Alpha, honorary scholastic society, at the senior banquet, May 11, presented Don Young with a certificate indicative of his high scholastic standing during his four-year osteopathic course. Dr. Young’s average was 91.52. Runner-up was Roy Bubek, with an average of more than 90%. Third was Earl Small whose average was 87.5%. May all three of these young doctors translate their scholastic success into professional success!

At the senior assembly, held May 5, Harry B. Elmeis and H. W. Menell received certificates for maintaining the highest scholastic average during their freshman and sophomore years, respectively.

Birth

Mr. and Mrs. Hoy Eakle announce the birth of a son, David Lee, born May 16. Mr. Eakle is a student at the College.

Notise

If and when you change your address please notify the Log Book promptly.

Acknowledgement

The LOG BOOK wishes, belatedly, to acknowledge the courtesy of CLINICAL OSTEOPATHY for furnishing the cut of Dr. Becker, used in the April issue.
The Senior Banquet given in honor of the graduating members was held on May 4th at the Kirkwood Hotel. Speaker for the evening was Dr. John M. Woods who pointed out the bright and dark spots of homemaking. The following is a list of those graduating:

- Jean Bubeck
- Vera Luka
- Lorna Woodmansee
- Esther Zeuder

We wish to extend our sincere congratulations and best wishes to them. We know that they will continue to attend our meetings as long as they remain in Des Moines. Jean Bubeck, past president of the Club and Lorna Woodmansee has been secretary. Jean Bubeck and Vera Luka served on committees throughout their memberships and we want to thank all of them.

The last meeting was held at the home of Alexandrine Studarum with Doris Martin serving as co-hostess. After the business meeting, we enjoyed a fascinating discussion led by Martha Hatteben on Home Decorating.

The Club will meet on May 16 at the home of Miriam Raub at which time we will offer relief work. Let’s have a good attendance. — M. R.

Gamma Chapter of Psi Sigma Alpha was fortunate in having Dr. Cottrill, national president of the fraternity present as guest speaker and host at the senior banquet held at the Hotel Kirkwood on May 4th. At this time the chapter officers and alumni members welcomed its two graduating members, Don Young and Roy Bubeck. The life membership certificates were presented on behalf of the chapter by Dean Owen with best wishes for their continued success as they leave school to enter their professions. Don Young, outgoing president of the chapter, presented the gavel to Herb Harris, incoming president.

At the senior assembly as is the custom of Psi Sigma Alpha, scholarship awards were made to Harry B. Elmets and H. Waldo Merrill for maintaining the highest average for their freshman and sophomore years respectively.

The Commodore Hotel was the scene of the Iota Tau Sigma seniors’ banquet given to the graduating brothers Roy Bubeck, Leo Luka and James Woodmansee. For Club members and their wives were present.

The speaker of the occasion was Mr. Charles Reid, chief of the Weather Bureau for the State of Iowa.

Our congenial director of the Obstetrics Clinic, Dr. McGill presented the musical touch to the affair by rendering various modern classics on the grand piano. Other highlights of the evening were the interchange of gavels between brother Merrill, our newly elected President, and brother Bubeck, our graduating president. Brother Luka received a gold gavel, which is customary for ITS to present to the graduating member that we have served as president of the fraternity. Brother Bubeck was honored for graduating with distinction.

We extend best wishes and continued progress in Osteopathy to Dr. Luka, Dr. Bubeck and Dr. Woodmansee.

Dr. Laycock worked all Thursday night and “most of Friday night too.” Fortunately only two were killed, one adult and one child.

State Convention a Marked Success

The 46th annual convention of the Iowa Society of Osteopathic Physicians and Surgeons was a thoroughly successful meeting. Approximately 100 members registered for the meetings, and approximately 90 guests additional attended. It can be said that keen interest in the splendidly arranged program was in evidence throughout the two-day session.

New Officers

The new slate of officer of the Iowa Society is as follows:

- President—Dr. J. K. Johnson, of Jefferson
- Vice-President—Dr. G. A. Whetstone, of Des Moines
- Secretary-Treasurer—Mrs. T. Schild, of Davenport
- Second Vice-President—Mrs. R. R. Weast, of Des Moines
- Trustees—Howard Storer, of Davenport; Dr. Gustavus Tuckes, of Davenport

Drs. MacBain and McCaughan were elected the following officers.

- President—Dr. H. C. Laycock, of Des Moines
- Vice-President—Dr. Anna Sloan, of Des Moines
- Secretary-Treasurer—Dr. L. D. Cash, of Des Moines

Combined Curriculum

(Continued from Page 1) osteopathic colleges. A great deal of personal commendation is due Drs. MacBain and McCaughan for their fine work in bringing this program to successful completion. It should also be understood that the osteopathic profession owes an obligation to both Iowa Wesleyan and its alma mater in aiding the execution of this splendid program.

Iowa Wesleyan College already outstrips all other Iowa Colleges in the number of graduates which they send into graduate and professional work. Osteopathic physicians can give them aid in maintaining this distinction by following the example of the Iowa Wesleyan. Iowa Wesleyan is a teaching institution; it is proud of its record in this field; its staff includes some of the finest teachers this College level which may be had in the United States. Iowa Wesleyan has “specialized” in pre-medical and nurses’ training, and now gives to osteopathy the advantages of its years of experience in premedical training. Their remarkable method for obtaining a bachelor’s degree in three years for osteopathic students is a pioneering effort in this respect. Their particular interest is the development of a pediatric clinic and ward in the proposed teaching clinical hospital. Details of their plans will be published at a later date.

Welcome to Newly Enrolled Students

Ten students have come to Des Moines for training in the Science of Osteopathy. Of the new enrollees, eight are freshmen and two are upper classmen. The new students are:

- Miss Shirley Talbott, Moravia, Iowa
- Miss Lennert Lorentson, Thiel River Falls, Minn.
- Norman Helchebeek, Louisville, Ky.
- Frederick Martin, Murray, Iowa
- Donald Hamilton, Pontiac, Michigan
- W. A. Flannery, Columbus, Ohio
- Solomon Leibel, Youngstown, Ohio
- Homer Elliott, Ames, Iowa
- Miss Therese Palmer, Chicago, Illinois
- Louis Picker, Chicago, Illinois

It is a pleasure to welcome these students to the Fellowship of the College. We wish to offer them all the advantages of the pursuit of their chosen profession at our college. The college wishes for each one the finest success and a most pleasant relationship throughout their stay in Des Moines. Good luck to all!
Dr. John Woods to Head Polk County Society

At a meeting of the Polk County Osteopathic Society, May 23, Dr. John M. Woods was elected to head the society for the coming year. Dr. Woods has been honored several times in the past with the office of both the Polk County Society and the Sixth District Society of Iowa. In 1938 and 1939 Dr.

New Members Named to Osteopathic Foundation

At the annual meeting of the Des Moines Still College Osteopathic Foundation, held Monday evening, June 5, the following men were elected to membership: Dr. Bruce Farmer, Des Moines; Dr. R. E. Singleton, Clevleod; Dr. J. K. Johnson, Jr., Jefferson, Iowa; Dr. I. F. St. Amant, Detroit; Dr. D. F. Johnson, Seattle; Dr. Howard C. Teepfer, Grantsville, W. Va.

Board of Trustees

Members of the Board of Trustees of the Foundation who have served previously were re-elected by the Board. They are Mr. J. J. Newlin, Mr. Nelse Hansen, Dr. Paul Park and Dr. Ruth Paul. Dr. Hugh Clark is a member of the Board of Trustees by virtue of his position as President of the Des Moines College. It was voted by the group to increase the Board from five to seven members; there are at present, therefore, two vacancies on the Board.

Public Campaign

Among other matters considered at the meeting was the public campaign for funds for the Clinical Hospital. The date has been set for the kick-off—August 29. Intensive campaigning will continue until mid-September. Dr. Mary E. Golden, Chairman of the fund-raising committee, which has done such a magnificent job among the alumni, will continue as chairman of the Public Campaign. Members of the foundation, acting under Dr. Golden's guidance will form a committee of the whole for completing the campaign in the shortest time possible.

J. R. Capps Elected To Board of Trustees

Mr. J. R. Capps, Vice-President of the Central National Bank of Des Moines, was elected to the Board of Trustees of the Des Moines Still College of Osteopathy by the Board of that institution in its annual meeting, Monday evening, June 12.

Mr. Capps is a cordial friend of Osteopathy and of the Des Moines College and is held in the highest regard by Des Moines businessmen. His association with the College Board is anticipated with respect and pleasure.

Annual College Meeting Spirited; Aims Toward Progress, Building

The annual meeting of the Des Moines Still College of Osteopathy, represented by 39 members interested in the future of the Des Moines Still College, considered sympathetically and realistically problems of the College.

Treasurer's Report

Most bleak of the evening's problems was the presentation of the annual auditor's report, showing an operational deficit for the past year. Included in the statement was a reiteration of the indebtedness of the College, in the amount of $75,104.62. It was pointed out that there is but one mortgage against College property, held by the Lincoln National Life Insurance Company of Fort Wayne, Indiana. The debt is being amortized by regular monthly payment from funds of the College treasury. It was added that there are outstanding bills in the amount of less than $300.00.

President's Report

Principal points brought out in the report of the president to the corporation were as follows:

1. For the tremendous show of alumni confidence and enthusiasm the College owes a debt of gratitude. Funds reaching the College through the Osteopathic Foundation and the Board of Trustees of the Des Moines Still College Osteopathic Foundation for improvement of laboratory and clinical facilities, indicate an alumni faith and a Foundation foresight which are commendable. A formal letter of appreciation has been sent to the Foundation.

2. Inspection pressure still exists and the need for continued advancement, particularly in the matter of clinical facilities is most urgent. In order to drive home this point, Dr. Clark pointed out the failure to be accepted by the Massachusetts Approving Authority. There is much work yet to be done.

3. Among the accomplishments of the past year have been:
   (a) Addition of the 3 faculty men, Dr. L. A. Deitrich as a full time man in Anatomy and Therapeutics, by the Board of Trustees of the Des Moines Still College Osteopathic Foundation for improvement of laboratory and clinical facilities, indicate an alumni faith and a Foundation foresight which are commendable. A formal letter of appreciation has been sent to the Foundation.

   (b) Organization, expansion and development of the librarianship, principally through the efforts of the still college club and the Public Relations Committee of the National Alumni Association.

   (c) Establishment of a combined curriculum plan with Iowa Wesleyan College, through the agency of Dr. George Sutton, Dr. R. N. MacBain, Dr. R. C. McCaugn and others of the National Alumni Association. It was pointed out that this privilege is shared with all of the osteopathic Colleges and that several other midwest colleges are currently considering a similar plan.

   (d) Elevation of student standards by installation of 2-year comprehensive examinations and increased interest and pride in the institution of both students and faculty.

   (e) Beginning of research program in the departments of Anatomy and Therapeutics, by Drs. Kimberly and Deitrich. Investigations of both men pertain particularly to cranial technique.

   It was pointed out that, although the past year has been one of the most active in the history of the institution, all affairs have not progressed. Enrollment has declined and probably will not show significant increase until the conclusion of the war. Special plea for assistance in the vocational guidance program was made to each attending member.

Dr. Blackwood Purchases Cystoscope for Clinic

Dr. W. D. Blackwood, Harts-horne, Oklahoma, whose name has previously appeared in these columns in connection with the Osteopathic Progress Fund, has made good his pledge for special equipment for a department of Urology. Factory notice of shipment to the College of a Brown-Buerger Cystoscope with teaching attachment has been given.

The straightforward manner in which Dr. Blackwood has made his promise and proceeded immediately to fulfill it is commendable and encouraging. Many thanks from the Foundation and the College.

Dr. R. O. McGill in the department of obstetrical clinic. Dr. McGill came to the College after completing his internship at the D. M. General Hospital.

**Cranial Technique**

**Case No. 169**

**Male, age 37**

**Complaint:**

Pain present in lower jaw for five days. Pain constant with intermittent spasms which makes eating and speaking difficult.

**Previous Treatment:**

Applied heat which relieved slightly. Had dental examination, with findings negative.

**Findings:**

Pain has localized on the side of the right mandible, at the dental foramen and external rotation of the right temporal bone.

**Treatment:**

Temporal rotation was corrected by the application of cranial technique.

**Results:**

Sharp, stabbing pain stopped immediately. Reports by telephone 5 days later that the pain continued to subside following treatment, and completely disappeared within 24 hours.

**Case No. 272**

**Male, age 7 month**

**Complaint:**

Weeping eczema of the face and scalp with some slight involvement of the lower extremities since the age of 6 weeks. Sonorous breathing.

**History:**

Mother spent a 2 early prenatal session which terminated at 8 months in a 48 hour labor which resulted in the application of forceps to deliver an 8 pound 4 ounce boy. She has been told previously that the forceps were improperly applied and the baby's neck broken. Difficult breathing since birth. Diagnosis of pigeon chest at 4 months and rickets at 6 months.

**Previous Treatment:**

This child has passed through the hands of several medical practitioners and specialists, during which the child was subjected to 67 tests for allergies. The latest treatment therapy used was an extremely obnoxious ointment composed of wax, tar and miscellaneous ingredients.

**Findings:**

Heart rate 120. Lung sound normal. There is present a light depression at the lower end of the sternum and a small groove at the level of the xyphoid. Abdomen negative. Cervical glands palpably enlarged. Pharynx including tonsils negative. Eyes and ears negative. Skin shows evidence of patchy, crusted lesions which are located at the face, scalp and lower extremities. Spinal examination reveals extreme muscle tension and loss of motion which is greatly exaggerated in the lumbar area. The child shows a mild torticollis. The child has the appearance of being normal, healthy and robust, with the exception of the skin lesions indicated.

**Diagnosis:**

Osteopathic lesion pathology predominated by the sphenobasilar torsion and the lumbar lesions indicated.

**Recommended Treatment:**

1. Spinal and cranial manipulation.
2. Use of soap and water on entire skin surface, and the discontinuance of all local medication.
3. The use of a normal dietary intake with no regard for the findings of the previous allergy tests.

**Results:**

At the end of 5 days, the lesions on the face were in the best condition they had been since their onset at 6 weeks of age. On the seventh day the face and scalp broke out into more typical herpes facialis. Treatment was continued on alternate days with a gradual improvement evidenced in the clearing of skin lesions and the increased activity of the child in all ways. Sixteen treatments were administered between February 28 and April 7, at which time the child returned home, and correspondence since that time has indicated that return to good health has been maintained.

—PAUL E. KIMBERLY, D.O.

**Review Foundation**

During the past four years there has been a remarkable interest in College development with the A.O.A. This has been manifested through the initial efforts of a small, but steadily growing group, to build a library project, both the original lots for a hospital site were purchased by small subscriptions. Following their purchase the Des Moines Still College Osteopathic Foundation was formed, and formal presentation of the lots was made by Dr. Fred Campbell to Dr. J. J. Newhill, President of the Foundation, more than a year ago.

**Still College Club**

The same alumni group which initiated the movement toward hospital construction and the creation of the Foundation, later created the Still College Club. With the funds returning through this group and many individual contributions, were made, including principally a redecoration and a systematization of the library facilities.

**Osteopathic Progress Fund**

At the time of completion of the library project, both the Foundation and the College found itself in the midst of a campaign for funds, conducted contem- poraneously with the campaign of other colleges under the name of Osteopathic Progress Fund. This campaign yielded approximately $100,000, and to all intents and purposes was concluded in March, 1944.

**Overall Campaign**

The A.O.A. then began its Overall Campaign with two choices for contribution — (1) Give to the Overall, which will be divided equally among the Colleges, and (2) Give specific College of your choice. At the last report available, the Des Moines College total has been raised to more than $2500.

The Funds which have come to the "Des Moines College" have actually been deposited with the Des Moines Still College Osteopathic Foundation. Improvements made in the College in the field of organization and reequipment of the laboratories have been made with funds donated to the College by the alumni, which is bound by its statement of purpose to benefit the students.

**Prospect**

The history cited above, the alumni support, elevation of standards of entrance by the A.O.A and within the College, enthusiasm among the alumni for college progress, determination to establish a research program, increasing efforts to sell, scientifically, the science of Osteopathy, and the necessity of leading in the field of medical education, rather than follow,—all of these items taken together, WE, AS A PROFESSION, ARE GOING FORWARD. If you have not yet gotten aboard the bandwagon of osteopathic success, NOW IS THE TIME.

Our position at the College is clearly stated by publication of the Articles and By-Laws; cooperation with the faith in us is evidenced by the donation of equipment by the Foundation. More than three hundred osteopathic physicians have expressed faith in us by contributions from $10 to $1600 to aid our progress. The College will justify that faith by actions which shall be for the good of the entire profession. In the future, even more than in the past, the College feels that you will be judged by the excellence of the current instruction. You have aided the College, and the College is acutely aware of its obligations to you as a physician.

**Student-Faculty Council Elects Officers**

The Student-Faculty Council at a recent meeting elected officers for the summer semester. They are as follows: President, J. Scott Heatherington; Vice-President, Dr. L. A. Deitrich; Secretary, Captain M. J.; Treasurer, Dr. Paul E. Kimberly.

The organization is made up of four faculty and four student representatives who are elected by their respective classes. The faculty representatives are appointed by the Dean, each member serving as class advisor to the class with which he is most frequently associated.

**Student-Doctor Party Scheduled for June 23**

The Student Activities Committee of the Faculty has arranged to combine the Freshman Reception, given each semester by the Student Doctor, with an acquainted party for students and profession in Des Moines and subrubs. Dr. Kimberly, Chairman of the group, announced that the date is June 23; the time 9:30 p.m.; the place, the College Auditorium.

The party will serve the purposes of honoring the new students, including upper class transfers, who came to the Des Moines College at the beginning of the May 16 semester, and of acquainting all the college students with each other, their faculty and the alumni and friends of the College. The party will feature dancing, survey of the College for those not familiar with the new developments, and refreshments.

The gathering is sponsored by the College, the Polk County Osteopathic Society and the Public Relations Committee of the National Alumni Association. Everybody is going to be there, so save the date, and get acquainted with our student body and our faculty.

**Alumni Deaths**

**Dr. James O. Humbert**

Dr. James O. Humbert of Minneapolis, graduate of the class of 1926, passed away on May 7, 1944.

**Dr. John Paul Jones**

Dr. John Paul Jones of Buckhannon, West Virginia, and Des Moines, class of 1928, died on April 26, 1944. Dr. Jones was a most active alumnus and active member of both national and divisional osteopathic societies. His loss will be keenly felt by physicians throughout the state of West Virginia as well as by the Des Moines Still College.
Osteopathic physicians in support of the $150,000 initiating our Public Campaign. The $100-a-Year Club will be in the State. Others have shown membership of all the physicians able. One state has set about the medium of the $100-a-Year mark. Scarcely a member of the profession is not actually surprised by the magnificent showing of the osteopathic physicians in support of osteopathic education. Not a member of the profession who has contributed to the Campaign exists who does not feel a greater pride in his profession because of the progress made in his school. Des Moines alumni may be especially proud for the work that has been accomplished. Two faculty members have been added (Dr. R. D. Schick in Physiology and Dr. L. A. Deitch in the Clinic).

The Library has received approximately 200 books, and subscribes to approximately 30 journals which are bound annually. As a result of the improvements made in the library, the State Medical Library regularly loans to the College library 30 journals. A librarian is maintained on duty, full-time.

A G-E Diagnostic x-ray unit has been purchased for the clinic and is slated for delivery this month.

4. Laboratories have been remodeled, reequipped and reorganized.

5. Iowa Wesleyan College has announced a plan for granting a Bachelor’s degree after 3 years work at that institution and completion of the curriculum for the degree D.O. This is almost certainly an outgrowth of our educational expansion, and in itself constitutes one of the principle forms of educational expansion.

6. Third floor would be devoted entirely to beds and necessary utilities. Fourth floor would be devoted to surgery, delivery rooms, nursery and necessary equipment for the staff.

It is understood that these plans are but a working point and do not indicate the final pattern, which may actually be considerably modified from the present proposal. However, work is going ahead rapidly on the project.

BY-LAWS
of the DES MOINES STILL COLLEGE OF OSTEOPATHY

Because of the interest shown in the publication of the Articles of Incorporation of the Des Moines Still College of Osteopathy, the By-Laws are reprinted below.

Duties of the President
It shall be the duty of the President to preside at all meetings of the Corporation, of the Board of Trustees and of the Executive Committee; to announce the business of each meeting; to state properly all questions to be voted upon; to preserve order and decorum and to decide questions of order subject to appeal.
He shall have a vote.
He shall exercise general supervision over the conduct of the College, and in the absence of any officer he shall exercise or direct the duties of that office during such absence. In the absence of the President, his duties shall be assumed by the Dean.

Duties of the Secretary
It shall be the duty of the Secretary to keep record of all meetings, and to have custody of all papers and books belonging to the Corporation not especially under the charge of any other officer.
He shall keep the books of the college.
It shall be the duty of the Secretary or his assistant to receive money for the Clinic and for the infirmary charges, also to issue tickets for these.
It shall be his duty, pursuant to order from the Executive Committee, to purchase the College and to secure Janitor service, coal, water, gas, electricity and laundry are provided for.

Duties of the Treasurer
It shall be the duty of the Treasurer to make out all contracts with the students, to collect all money for the same, to act as custodian of the funds of the Corporation and to deposit same in such bank or banks as may be chosen by the Executive Committee.
He shall keep the books of the Treasurer.
He shall give bond for five thousand dollars ($5000.00) the fee for which shall be paid by the Corporation.
It shall be his duty to collect the endowment fund, to deposit it as provided for and to invest the same or part thereof in such ways as the Executive Committee shall direct.
It shall be his duty to issue checks only on order from the President, or Executive Committee, or endorsed by the President's O. K.; and in the absence of the President, the Secretary shall issue such orders or give his O. K. in payment of all obligations of the Corporation, and if any error be detected in such orders, it shall be his duty to call the attention of the President, or in his absence, the attention of the Secretary to the same, and in case of any disagreement the question shall be referred to the Trustees for settlement. He shall submit to the Executive Committee at the end of each month a report of all money received and disbursed and the balance on hand.

Executive Committee
The Executive Committee of the Corporation shall consist of the President, Dean and Secretary.
It shall be the duty of the Executive Committee to meet once a month at the call of the President; to receive the reports of the Treasurer and Secretary, and to exercise discretionary powers in all matters pertaining to the conduct of the College affairs during the adjournment of the Trustees.

General
All papers and books pertaining to the Corporation shall be kept in the safe at the college. There shall be an Auditing Committee which shall be appointed by the Corporation each year at its annual meeting in May. This Committee shall audit the Treasurer’s books at such times as the Board of Trustees may direct.

Payne is a resident of Des Moines and did her preosteopathic work at the Des Moines College. She has served an internship at the Des Moines College. She has served a full-time instructor on the staff of the College in Oklahoma. Since her graduation from the Des Moines College, Payne is a member of the profession who has contributed to the Campaign.

(Continued from Page 1)

Tentative plans call for a first floor with ambulant clinic and general examination rooms, kitchen, laundry, clinical laboratory, x-ray department, storage, emergency room and waiting room. Second floor would contain general offices, waiting room, staff room and library, internes’ quarters, utility rooms, pediatric ward and hospital beds.

Dr. John Woods

(Continued from Page 1)

mittee and Dr. Luka, a 1944 graduate, is Chairman of the Membership Committee. Dr. Rachel Payne was elected to be Secretary for 1944-45.

Dr. Freeman, 1939 graduate of the Des Moines College, was graduated from Southwestern College, Winfield, Kansas. She received her M.S. degree from the University of Oklahoma, in the Department of Zoology, in 1930. From 1933 to 1939, he was assistant to Dr. Des Moines in 1933, she was on the staff of Okmulgee Junior College in Oklahoma. She has served since her graduation from the Des Moines Still College as a part-time instructor on the staff of the College.

Dr. Rachel Payne is a 1942 graduate of the Des Moines College and since her graduation has been a resident at the Des Moines General Hospital. Dr. Payne is a resident of Des Moines and did her preosteopathic work at the Des Moines College. She is present as an Associate in Radiology at the Des Moines General Hospital.

Dr. Leo Luka was graduated in May, 1944. He has established an office in the Fleming Building in Des Moines. During his student days at the Des Moines College Dr. Luka distinguished himself for his clinical work.

THE LOG BOOK

The main event to be reported on this page came from the Phi Sigma Gamma house. The house has an annual spring formal on the last Saturday of June. This year, the affair was a huge success and a wonderful time was had by all. It was held at 2141 Grand ave. Arnie Lidell and his band furnished the music. We are now looking forward to our fall shuttle.

We are looking forward to a grand year under our new officers. Starting off with the painting of the recreation room in the basement, the house is being brightened up and fixed up so we get time and the money comes in.

Starting right after vacation we are planning to set up a table again and serve meals. It is a big project, but under our president, Mickey Clauing, it is shaping up in grand shape. We have phoned in Drs. Kelly, who was our house mother before, and who some of the alumni may remember, is coming back to cook for us.

—J. S.

O.W.C.C.

On May 18th members of the O.W.C.C. met at the home of Miriam Raub with Gerry Heatherington acting as co-hostess. After the business meeting of the evening was spent making scrapbooks for the children at the hospital, and mending old clothes which they brought to the meeting to be given to the Greek War Relief.

The meeting on June 6th was quite an interesting one as the members were given a demonstration on home nursing by the Red Cross. The remainder of the evening was spent at the home of Laura Alland and Helen Sherwood serving as co-hostess, where we had an business meeting and refreshments followed.

Our picnic this year was held on Sunday, June 18th.

—M. R.

ATLAS CLUB

Atlas initiation ceremonies were held June 5th. The new brothers are Larry Abbott and Marion Thompson. June 9th we held our Freshman Shoker at the King Ying Lou restaurant. Dr. Bachmayer gave us quite an interesting one as the members were given a demonstration on home nursing by the Red Cross. The remainder of the evening was spent at the home of Laura Alland and Helen Sherwood serving as co-hostess, where we had our business meeting and refreshments followed.

Our picnic this year was held on Sunday, June 18th.

This year, the affair was a huge success and a wonderful time was had by all. It was held at 2141 Grand ave. Arnie Lidell and his band furnished the music. We are now looking forward to our fall shuttle.

We are looking forward to a grand year under our new officers. Starting off with the painting of the recreation room in the basement, the house is being brightened up and fixed up so we get time and the money comes in.

Starting right after vacation we are planning to set up a table again and serve meals. It is a big project, but under our president, Mickey Clauing, it is shaping up in grand shape. We have phoned in Drs. Kelly, who was our house mother before, and who some of the alumni may remember, is coming back to cook for us.

—J. S.

O.W.C.C.

On May 18th members of the O.W.C.C. met at the home of Miriam Raub with Gerry Heatherington acting as co-hostess. After the business meeting of the evening was spent making scrapbooks for the children at the hospital, and mending old clothes which they brought to the meeting to be given to the Greek War Relief.

The meeting on June 6th was quite an interesting one as the members were given a demonstration on home nursing by the Red Cross. The remainder of the evening was spent at the home of Laura Alland and Helen Sherwood serving as co-hostess, where we had our business meeting and refreshments followed.

Our picnic this year was held on Sunday, June 18th.

—M. R.
Dr. Schick Accepts Physiology Position

Dr. R. Dean Schick, of Lake Orion, Michigan, has joined the staff of the Des Moines Still College of Osteopathy in the Department of Physiology.

Dr. Schick received his Bachelor’s degree in the University of Michigan, in 1932; his Master’s degree in the same institution in 1933, and his Ph.D. from Michigan in 1932. From 1934 to 1935 he was teaching assistant in the Department of Physiology. From 1935 to 1936 he was teaching assistant in the Department of Zoology and from 1937 to 1941 held a fellowship in the same department. He was on the staff of the Medical School of Ohio State University as instructor in 1941 and 1942. From 1942 to the present he was assistant professor of Animal Biology at the University of Oklahoma in Norman.

Dr. Schick is a member of Phi Sigma Honorary Biology Society, Sigma Xi Honorary Scientific Society and the Ohio Academy of Science. His research interests have been principally in the field of hormones of reproduction. He plans to continue this work at the Des Moines Still College of Osteopathy. He has earned considerable recognition in the teaching profession for his visual aids in teaching. Most notable among these is a machine shown widely at scientific meetings for demonstration of the correlated action of the several hormones concerned with female physiology.

Dr. Schick is married, age 33, and has three children—Kay, age 9, Denny, age 7, and Derry, age 4.

Osteopathic Teaching Looks to the Future

The present war is providing unparalleled opportunities for the entrance into this country of past and present vectors that have played little or no part in our past medical history.

We must be alert in recognizing these new imported diseases in all of their stages so that they can be treated, isolated, or otherwise controlled in order to minimize their danger to us. For the post-war period we will not only be concerned with the effects of tropical diseases on our own soil, but we will take a leading role in preventive medicine throughout the world. This can mean only one thing—that, beginning now, greater stress must be placed on the numerous subjects of this field by initiating charts and curricula of our osteopathic schools those subjects now neglected and yet so vital for an understanding of post-war diseases. Opportunities for fundamental research must be provided; better training must be developed through increased teaching facilities so that we can more ably fulfill the responsibilities that will come to us as a result of our greater contacts with these less familiar diseases.

Today, when visual and audio-visual teaching aids are definitely coming into their own, this publishing theme appears that no teacher should continue to ignore so forceful a teaching medium to facilitate the learning of the new and vital subjects now being introduced in the field of preventive medicine. This method of teaching is in no sense a radical departure from the accepted and prescribed practices of teaching. Scientifically controlled research and study have revealed the effectiveness of visual and audiovisual teaching in the learning process.

It has been shown by research specialists that students using sound films in natural science learn 27 percent more than those taught by the ordinary classroom methods. Other tests have shown that motion pictures have increased the accumulation of knowledge and ideas as much as 35 percent and retention of this knowledge, as much as 55 percent.

The film, a most valuable scientific aid to teaching, is not intended to do the work of the teacher or the textbook but to make their instruction more efficient.

Our osteopathic colleges, as well as other schools, the teaching art are not availing themselves of the advantages and opportunities which visual and audiovisual instruction has to offer.

Because of the support and interest shown by faculty members of the Des Moines Still College, an attempt has been made, during the past semester, to develop a visual education program in the Department of Preventive Medicine. Greater use of charts, models, slides, still pictures and moving pictures has been under- taken. A dozen new charts and nine dozen new 2 in. x 2 in. slides have recently been pur- (Continued on Page 4)

The War Service Conference

From July 12th to July 18th osteopathic physicians will have a golden opportunity to acquaint themselves with recent advances in their science and with new problems to be faced as members of the Armed Forces are discharged. Special meetings, beginning July 12th, in the various specialties of osteopathy, will provide a 20-ring circus of educational opportunities. Members always well attended have served through the years to promote professional interest through organizational enthusiasm, education and perfection of the individual in his special field.

This year should be the greatest of all conventions because it is a preparation for gigantic post-war problems. Each physician should make a most earnest effort to attend the convention for what may be the last pre-armistice training for the post-war period.

500 and 1000 Clubs Continue to Grow

Contributions continue to pour in through the agency of the Overall Campaign and the Progress Fund Committees. Members of the 500 and 1000 Clubs, not previously published, are listed below. Membership in the 500 Club now stands at 163, and in the 1000 Club at 16.

It is anticipated that the membership in both groups will take a rapid jump during the convention both in new pledges and in additions to former pledges. The plagues for both the 500 Club and the 1000 club will be display at the College booth in the National Convention.

New members are:

Dr. W. D. Andrews (1000)
Dr. Karl V. Ehrich
Dr. A. C. Borchart
Dr. Joseph W. Clark
Dr. Howard Cook
Dr. Donald J. Evans
Dr. J. R. Forbes
Dr. Thomas R. Griffith
Dr. Milton C. Hammer
Dr. Frederick Hecken
Dr. Carl G. Johnson
Dr. J. L. Koch
Dr. E. J. LaChance
Dr. John Q. A. Mattier
Dr. Angela McCready
Dr. W. R. McLaughlin
Dr. Robert G. Mertens
Dr. Lowell T. Morgan

Des Moines College Faculty Entertains Drake Men

Dr. J. B. Shumaker Attends Faculty Meeting of the College improvements by the visitors.

Attending the meeting were Dr. Luther Stokelner, Dean of the College of Liberal Arts; Dr. George Crossen, Dean of the College of Pharmacy; Dr. George C. Huff, Chairman of the Department of Biology and Acting Head of the Graduate Division; Dr. Leland Johnson, Professor, Department of Biology; and Dr. J. B. Shumaker, Professor, Department of Chemistry.

Both the osteopathic group and the Drake group were well pleased with Professor Merrill's discussion of a vital topic, and all were well pleased with the improvements which have been made in the physical plant.

The program, initiating a series of non-business, seminar meetings is an auspicious beginning. Announcement of the next meeting will be made in the August issue of the LOG BOOK.
Mechanics of the Cerebro-Spinal Fluid

Much of the physiology of the cerebro-spinal fluid is as yet unknown. The known facts are not well attached or applied in general practice. The review is presented in the hope that it may refresh the memory, and clarify the symptoms, pathology, and treatment associated with cranial injuries and diseases.

Most of the cerebro-spinal fluid is formed within the lateral ventricles of the brain, by the choroid plexuses. These capillary networks appear to function much the same as the glomeruli of the kidneys, except that the control mechanism differs. The filtrate, which is the cerebro-spinal fluid, normally contains the inorganic salts and the small uncomplexed molecules in approximately the same proportion as the blood serum. A certain amount of protein is normally very minute. When inflamed, the permeability of the filtering membranes increases. This is the case with the glomeruli, proteins and perhaps red blood cells appear in the filtrate.

The amount of filtrate produced depends upon three factors: First, the back-pressure, or the pressure exerted upon the outside of the plexuses by the cerebro-spinal fluid already within the ventricles. When this pressure is abnormally low, large quantities of fluid may be produced. When it is high, little additional fluid is produced. Second, the amount of fluid produced depends upon the state of dilatation of the cerebro-spinal fluid network. Stimulation of the cerebral sympathetics results in constriction, and functional dilatation results in dilatation of the plexuses. Third, the relative concentration of the blood is an important factor. Hypodermosmotic formation of the fluid is increased; in hemo-concentration, formation of the fluid is decreased. These factors are important in the production of meningism of youngsters, and in the treatment of certain types of intracranial hypertension in older persons.

Because most of the cerebro-spinal fluid is produced within the lateral ventricles of the brain, the circulation of the fluid is that of the ventricles. Newly-formed fluid constantly forces the previously formed fluid through the foramina of Munro to the third ventricle, thence through the aqueduct of Sylvius to the fourth ventricle. From here it passes through the foramina of Luschka to the subarachnoid space at the base of the brain. These multiple small openings in the roof of the fourth ventricle may become occluded by a fibrous membrane in meningitis, resulting in a non-communicating hydrocephalus.

The subarachnoid space in the basal regions is somewhat enlarged, forming the so-called basal cisterns. From here the cerebro-spinal fluid flows forward through the subarachnoid space to the arachnoidal granulations and venous sinuses, where it is constantly being absorbed into the blood. Some fluid is probably added, and some is permanently absorbed enroute.

This leaves unexplained the circulation of fluid within the subarachnoid space of the spinal canal. Some fluid is probably absorbed in the capillaries of the spinal cord, and it is undoubtedly absorbed there. But the circulation within the spinal canal is known to be much slower, more stagnant than that of the cranial cavity. In cranial injuries and infections the pressure and cell count of the cerebro-spinal fluid remains elevated long after the cranial fluid has returned to nearly normal.

Functions of the cerebro-spinal fluid:
1. Support of the intracranial and intraspinal structures.
2. Hydrostatic regulation of intracranial and intraspinal blood volume, and subse-
   quent pressure on the venous drainage system.
3. Lubrication between the brain and spinal cord and their bony cavities.
4. Limited protection for intracranial structures.
5. Probable medium for exchange of metabolic materials.
6. Probable means of stabilizing blood volume and venous drainage of the inner ear.

Since very slight strain on the nerves and great vessels of the basilar area of the brain results in pain, support of a nature that does not change appreciably with shift of position is essential for the brain structures. Normally this is achieved by the buoyancy effect of cerebrospinal fluid. Basic weight of the brain is about 1300 grams. It has a specific gravity of about 1.040. Specific gravity of the cerebro-spinal fluid is about 1.007 to 1.038. Hence the buoyant effect of the cerebro-spinal fluid upon the brain is about 1260 grams, leaving slightly more than 40 grams to be supported by the non-fluid structures of the cranium. This major support is unaffected by changes in pressure alone.

The stabilizing effect of the cerebro-spinal fluid upon intracranial blood supply and drainage is commonly overlooked. But it should be apparent if we consider that the cerebro-spinal fluid is a closed cavity. The only functional openings normally present are those formed by the meninges. The cerebro-spinal fluid is a closed cavity by design. The bony walls form a fairly rigid, unyielding structure of essentially unchanging volume. Hence any drop in cerebrospinal fluid volume must be accompanied by an opposite change in cerebrospinal fluid volume. If the amount of cerebro-spinal fluid is increased, blood volume must decrease; if cerebro-spinal fluid is lost, blood volume must increase. Since the cerebral veins are thin walled, without valves, and without support (other than that offered by the terminal blood vessels and the cerebro-spinal fluid) most of the change in blood volume occurs in these vessels. An abnormal drop in cerebro-spinal fluid pressure results in diastension of these vessels. A rise in cerebro-spinal fluid pressure is prevented by partial collapse of these veins. Diastension of the veins may reach a point where tension upon the bony structures causes headache, as in chronic loss of fluid following diagnostic puncture. Collapse of intracranial veins or vessels may extend to the point where cerebral ischemia and fatal brain edema may result. As the cranial cavity decreases in volume, subarachnoidal hemorrhage, or in intracranial infection producing effusions and edema fluid.

Intracranial arterial and venous pressures change rather markedly in a person changes position. In the upright position, venous pressures are low, in the horizontal they are somewhat higher; in the vertical head-down position, intracranial venous pressures are markedly increased. Leveled pressures take place in the arterial system; both are due to the presence or absence of the weight of a column of blood above the pressure point. But intracranial cerebro-spinal fluid pressure appears to parallel these vascular pressures, preventing collapse of the vessels when a person is upright, and preventing distension when he stoops or stands on his head. Stimulation or mechanical compression probably stabilizes the circulation of the inner ear, since an extension of the cerebrospinal fluid labyrinth containing endolymph is cored between the dual layers, thereby effecting a communication of intracranial pressure changes to the inner ear.

Summary
1. Pathological increases in intracranial pressure may disturb normal cerebral circulation. This increased pressure may be relieved therapeutically by brain edema develops by repeated spinal tap and drainage, by intravenous hypertonic solutions, or by hyperventilation.
2. Pathological decrease in intracranial pressure may cause headache. This may result from cranial fracture with loss of cerebro-spinal fluid, or from diagnostic spinal tap. Treatment consists essentially of maintaining the patient in a horizontal position until the break is closed and arachnoid layer is healed. Injection of normal saline into the subarachnoid space in quantity may raise cerebro-spinal fluid pressure to normal or manipulation of the cervical and cranial regions may give immediate relief, but the horizontal position should be maintained until the wound heals.

NOTE: From experiments as yet unpublished it is known that bitemporal pressure, particularly over the region, measurably increases intracranial pressure. Alternate pressure and release probably serves to alter intracranial circulation. Slow drop of cerebro-spinal fluid pressure is probably one of the factors of fatigue.

DES MOINES STILL COLLEGE
OF OSTEOPATHY

Editor - Hugh Clark, Ph.D.

Osteopathic Training For Veterans

The passage of the much discussed G. I. Bill, part of whose features includes a provision for rehabilitation through education, can be of the utmost significance in the development of Osteopathy. According to the bill, later modified, "disabled" veterans may receive, in addition to the basic pension and allotment later modified, "disabled" veteran can be of the utmost significance rehabilitation through education, vocational guidance is not work done by the osteopathic profession in cooperation with vocational rehabilitation offices. The entire concept of vocational guidance is not worked out in detail to handle the large number of men who will be discharged from the Armed Forces at the cessation of hostilities. Currently, however, the problem is being handled by state agencies and the possibilities clarified. More osteopathic effort to help should be pointed out to the state officers. It is much needed. The Office of Rehabilitation for Iowa, Chief Officer of which is Mr. J. C. Johnson. The state or county officer must be notified by catalog, special bulletins and literature of precise plans, of which any member of the committee may apply either to young men or women who have completed preosteopathic requirements, or osteopathic graduates who will be seeking further advanced specialized training, in order to return to their civilian practices.

More will be said on this topic as program of both the government and the osteopathic colleges are completed in detail.

Veterans who consider themselves eligible for education and training under this act those now enrolled in school or college should write either the regional office of the Veterans' Administration located in the territory in which they live expressing a desire to receive a stipend. Without waiting for a reply veterans may continue in the institution in which they are now studying and can not now attending school or college may enroll in an education or training institution which desires them to admit them for the program of courses they wish to pursue.

Student-Faculty Party A Fine Success

The Student-Faculty party was a splendid success, attended by 175 students, faculty and guests in the College Auditorium. The evening became cool enough to enjoy dancing and those who attended were pleased with the program.

At intermission the group was entertained by a song by Dr. Victor England, two vocal numbers by Mr. H. Roy Kusman, a junior student, and piano selections by Dr. R. O. McGill and Mr. Robert Sedar—thus representing the students, faculty and alumni on the program.

The Program was arranged by Dr. P. E. Kimberley, chairman of the Student Activities Committee and his committee, Dr. H. A. Barquist and Dr. J. Q. A. Matterson. The party was specifically planned in advance, arranged in such a manner that alumni might also attend and inspect College improvements. All felt that the entire program was well done and a new sense of pride in their alma mater.

Editorial Champions Osteopathic Commissions

(The following piece is excerpted from the July Forum.)

"Many fine doctors who use only medicine in their practice are glad to take the place in the healing art which medicine cannot supply," says an editorial appearing in the October 13 editorial column of Ohio's Bowling Green Tribune, "and on the other hand, there are in medicine elements which adjustments of the spine and other bones of the body cannot reach with the promptness of drugs. . . ."

"Despite the fact that Congress has enacted laws providing for the commissioning of osteopaths in the Navy, the latter thus far has declined to accept the services of such men. But in the present great war in which the value of first aid by nurses, and by soldiers and sailors trained as personnel, has been recognized, it would seem that the Navy ought to avail itself of proffered services of osteopaths whose technique can reach the farthest of the body. . . ."

"The one thing which Congress has not done is to certify osteopaths for the Armed Forces. The American Osteopathic Association has applied for certification, and the Commissioner for the Armed Forces has been advised that osteopaths can be granted a commission in the Reserve Officers' Training Corps."

The George W. Sutton Scholarship

(Author's statement

A scholarship offer has been made by George W. Sutton, DMS, of Mount Pleasant, Iowa, effective beginning September 12, 1944, for three school years thereafter. The full tuition at Iowa Wesleyan amounting to $248 each school year will be paid. This is restricted to those students who promise beforehand to take the full three-year degree course at Iowa Wesleyan. The young man or woman applying for the scholarship must submit to the selecting committee: 1. A letter of recommendation from his or her high school principal and two other citizens who are not related to him. 2. The necessary information required by the selecting committee concerning himself and why he needs such a scholarship. 3. A 500-word essay stating where he desires to be an osteopathic physician and what his plans for life are.

The committee designated by Dr. Sutton as having full and final authority in the selection of the scholarship is the Academic Committee of Iowa Wesleyan College. All who wish to apply for consideration should write immediately to Professor Harold E. Nelson, Chairman of the Academic Committee, Iowa Wesleyan College, Mount Pleasant, Iowa, for Application blanks, as all applications must be in the hands of the committee on or before August 1, 1944. The committee plans to make its decision immediately thereafter. Any candidate desiring to interview Professor Nelson must notify the committee of his or her wishes. The committee retains full discretion in choosing members of the committee may do so.

Dr. Sutton makes this offer for two reasons: 1. Because early in his life as an education was that desire to absorb himself and why he needs such a scholarship. 3. A 500-word essay stating where he desires to be an osteopathic physician and what his plans for life are.

"The Bureau of Professional Education and Colleges of the American Osteopathic Association is pleased to announce the proposal of Iowa Wesleyan College, covering two alternative curricula offered by that college for pre-osteopathic training courses, according to a statement signed by Dr. R. McFarlane Tilley, chairman of the Bureau of Professional Education and Colleges of the American Osteopathic Association that appeared in the Iowa Wesleyan College Bulletin. Dr. Tilley goes on to say: "One of the courses proposed is designed for completion of two college years of approximately nine months each, and the other for completion in three college years. On successful completion of the latter course and the full course in an osteopathic college approved by the A.O.A. the college plans to grant to the student either the degree of Bachelor of Science in Osteopathic Education and Colleges of Secondary Schools. It has eight college buildings, including two large lecture halls, student dormitories, halls, living quarters and fraternity houses for boys. It has one teacher for every ten students.

This announcement is of special interest to osteopathic physicians who have occasion to advise young people aspiring to become doctors of osteopathy, and especially to vocational guidance directors and counselors. The arrangement was completed as a result of negotiations carried on by Stanley D. Niles, President of Iowa Wesleyan College, Drs. R. McFarlane Tilley, for the American Osteopathic Association, and Dr. R. N. MacBain for the American Association of Osteopathic Colleges.

Birth

Dr. and Mrs. H. W. Merrill have announced the birth of a son, Halbert Waldon, born July 11, 1944. They extend congratulations and best wishes, through the LOG BOOK, to the proud parents.

ARE YOU BUYING YOUR SHARE OF WAR BONDS
In an attempt to beat the heat and gas rationing, the members of Phi Sigma Gamma, under the supervision of Brother Mickey Clauzenee, are planning work on a picnic set-up with a barbecue pit in the back yard. Upon its completion, the chapter will hold an all-school welcome roast and informal dance at the chapter house.

In answer to the question, "Where shall we begin," the Phi Sigma Gamma offers the hospitality of her table to the students at Still College starting July 24th. The delay in opening was brought about by the difficulties encountered in getting the kitchen and dining room redecorated.

Contrary to the opinion that may be derived from reading this article, the Phi Sigs do think of other things besides eating. Initiation and pledging ceremonies have been scheduled for the week of August first.

At a dinner meeting of the members and alumni, to be held during the first week following the summer vacation, a paper on a scientific subject of his own choosing will be presented by one of the new initiates.

The chapter at this time wishes to welcome the new freshmen and transfer students to Still College. We urge you to strive for high scholastic averages for yourselves, your college and your profession.

Due to vacations during the month of July, the meeting on July 18 at the home of Helen Reichtstadt has been changed to July 25 at which time there will be in addition to the regular meeting.

We hope every member will make a special effort to attend.

The last meeting of the pre-vacation season was held the Friday night at the home of Lester Rausch. The most prominent feature of the banquet meeting was an enthusiastic discussion of the practical work night which Brother Bachman so graciously extended to us, to be held again after we return from vacation.

We wish to take this opportunity to congratulate our new pledges, Lennert Lorentson and Norbert Heichelbech. Also, we wish everyone to be having a fine rest during the holiday period.

The first meeting of Delta Omega Sorority for the new members was in the form of a buffet supper at the home of Dr. Beryl Freeman, Miss Theresa Palmer and Miss Shirley Talbott. The main purpose of the meeting was the introduction of these new women students to the alumni members.

Miss Palmer, whose home is in Detroit, Michigan, is a sophomore transfer student from Chicago College of Osteopathy, where she completed her first year this spring. Miss Talbott, who has been in close contact with the osteopathic profession for some months, has been employed by the nursing staff of the Des Moines General Hospital, enrolled as a freshman. Her former home was in Moravia, Iowa.

Plans for the pledge dinner have not been completed, but it will take place shortly after the summer vacation. This will be held as a meeting with the alumni members, whose activity during the past semester has helped the pledges greatly. We are very grateful to them.

On the evening of June 20, at the office of Dr. Sloan, our supreme deity, Beta Chapter held a combined business meeting and a fine technic demonstration conducted by Dr. Sloan, our President. The meeting was conducted by some fine pictures on dental care and a Walt Disney short on vaccination. We thank Dr. Sloan for the use of his office and time and Brother Merrill for an educational meeting.

At this writing the student body and faculty are enjoying a much needed relaxation from teaching and studies. The most of us, however, are, however, taking only a week of vacation, for the clinic is remaining open so that our patients may continue treatments. Brother Merrill plans on attending the war service conference on July 25 and announce the annual Beta Chapter report at the grand council meeting which is held yearly at the national osteopathic convention.

Through this, our personal Beta Chapter column, we are asking continued support of our alumni physicians for financial support of the "1944 Still College Progress Fund." We note with pride those of you, who appear as members of the "1940 and 500 Club" on the plaque in the church reception room. The dynamic force of our new president of Still College, Dr. Hugh Clark, is guiding the expansion of our college with perseverance and vision towards the production of a greater Osteopathic institution. Let's have more plaque members.

—H. R. R.

Osteopathic Teaching

(Continued from Page 1)

Chased for the department. Since May 1, 1944, twenty-eight movie pictures, either hand or longer, have been shown. Of this number, about one-half were sound films, all having been planned to date. The class discussions and lectures. Most of the films were used in the presentation of the public health and sanitation course.

The student response to this method of teaching has been very encouraging so far in that more student interest in the subject has been shown. Examinations have revealed that the acquisition and retention of knowledge on the part of the student has been appreciably greater than that obtained by the previous straight lecture presentation of material.

The duration of this new teaching method has been as, yet, too short to base any definite conclusion upon the findings, but the results have far exceeded our expectations and do well justify continuation of the program on an ever-broadening and permanent basis.

The stock of all types of visual teaching aids is continually being increased. The teaching aids are being loaned to the students at Still College, to be used not only for the benefit of other osteopathic institutions, physicians, and organized groups in the osteopathic profession, but also as a lending library for the expansion of visual instruction in the other department of the college.

It is hoped that the near future will bring about the establishment of a film library at Still College, to be used not only for college instructional purposes, but also as a lending library for the benefit of other osteopathic institutions, physicians, and organized groups in the osteopathic profession.

The opportunity is unusually good at this time for osteopathic education, and for our school in particular, to take the lead in this new field of teaching techniques by intelligently using and increasing our supply of visual and audio-visual equipment.

H. W. MERRILL

Case Reports

(Continued from Page 2)

Low extraction of the lower right third molar, and occurred within two weeks and as often as three times daily. There was no warning or nausea.

treatment

This patient has been through the hands of several medical doctors, each of which used some type of medication and finally gave up without results.

Findings

A side binding lesion of the sphenobasilar point to the left, upper dorsal extension lesion, loss of lumbar index and a flexion of the right sacro-ilac.

Treatment

Instructional or proper sitting and osteopathic treatments twice weekly for correction of cranial and spinal lesions.

Results

Vomiting occurred following the first treatment. Hearing was noticeably improved following the second treatment. The patient left town for one month. Treatment was continued upon her return for a period of two months in order to maintain cor.

Dr. Hannan Leaves Iowa State Board

On July first, Dr. D. E. Hannan of Dr. Hannan's decision not to again become a candidate for reappointment, Governor B. B. Hickenlooper of Iowa states, "I am indeed sorry to learn that the condition of your health will not permit you to be a candidate for reappointment to the State Board of Osteopathic Examiners this year."

"May I take this opportunity to thank you for the excellent work you have done as a member of that Board. I appreciate your service very much personally and I realize that you have experienced the fine satisfaction which comes from a job well done."

Dr. Warren Green of Storm Lake, Iowa, will succeed Dr. Hannan on the Board.
Alumni Elect National Officers

The National Alumni Association of Des Moines Still College of Osteopathy have chosen for their leaders during 1944-45 a particularly strong group of men. Dr. Russell Wright, of Detroit, was named President; Dr. Frank Speed, of Nebraska, was elected Vice-President; and Dr. Charles C. Auseon, of Hillsdale, Michigan, was named Executive Secretary. These men have been extremely active in alumni affairs previously and they have supported the educational campaigns during the past year. A brilliant year of alumni activity is anticipated under their guidance in cooperation with the Des Moines Still College of Osteopathy.

Public Relations Note

The Des Moines Still College of Osteopathy would like to call attention to the rather interesting letterhead which came to its attention through correspondence with its alumni secretary, Dr. C. C. Auseon. Above the identification of Dr. Auseon's institution (Hillsdale Osteopathic Clinic) Dr. Auseon has inscribed "Know Osteopathic Colleges — Six Fine Institutions." Such unsolicited support of osteopathic education is most noteworthy. The fact that it calls to the attention of all of Dr. Auseon's correspondents our college is most commendable. Perhaps the ingenuity of other alumni will enable them to carry still farther the spirit signified by Dr. Auseon's gesture.

Dr. Saul Klein Donates Atlas to Library

Dr. Saul Klein, active member of the Legislative Committee of the Iowa Society of Osteopathic Physicians and Surgeons for several years and alumnus of the Des Moines Still College of Osteopathy, last week presented to the library a fine set of Spalteholz' 3-volume Atlas of Human Anatomy. The college deeply appreciates Dr. Klein's thoughtfulness in the presentation of this masterpiece for student reference. Dr. Klein, victim of a heart ailment which incapacitated him for several months, we are pleased to report is in much better health and is practicing at Clear Lake, Iowa, with Dr. E. E. Chappell.

Des Moines Alumni in Leadership Roles

Dr. Sherwood J. Nye of Pontiac, Michigan, past president and former trustee of the Michigan Association of Osteopathic Physicians and Surgeons, was reelected to the Board of Trustees and in an absence of three years. He was named for this office by Dr. Robert K. Homan and the appointment was confirmed by the board on June 17th. Dr. Robert K. Homan was elected to trusteeship of the American Osteopathic Association during the annual meetings in Chicago. Dr. Homan also holds the post of Chairman of the Department of Professional Affairs, including Professional Education, of the Michigan Society.

Owen Resigns Deanship; Warner Assumes Duties in Des Moines, Oct. 9

Dr. E. O. Owen, Dean of the college, has submitted his resignation from that office. Dr. Owen has previously had charge of the Department of Pathology and then the Laboratory of Clinical Diagnosis as well as instruction in Pharmacology and Immunology. Dr. Owen will remain as Chairman of the Department of Pathology and Director of the Laboratory of Clinical Diagnosis. Dr. Owen took his Bachelor's degree at Penn College at Oaklahoma, Iowa, in 1929 and obtained his Master's degree in 1931 from the University of Missouri in the Department of Zoology. For the year following he was acting head of the Department of Biology at Berea College. He came to Des Moines in 1933 and was graduated in 1937, was retained on the faculty as Professor of Pathology, for which he took a summer of special work at the University of Michigan under Professor Weller. In 1940 he was made Assistant Dean of the Des Moines college and in 1942 Dean, coincident with the election of Dr. Schwartz to the presidency.

Dr. Englund Re-elected Head Ambulant Surgery Society

Dr. V. A. Englund, Des Moines, and Dr. R. E. Brooker, Grinnell, were re-elected President and Secretary, respectively, of the Iowa Osteopathic Society of Ambulant Surgery at its annual meeting on Tuesday, May 16. The membership voted to raise the annual dues to the sum of $2.00.

Dr. Warner Resigns As Kirksville Dean

Dr. M. D. Warner, Dean

Dr. Warner was graduated from high school in Cadillac, Michigan in 1913 and received his B. A. degree from the University of Michigan in 1917. During 1918-19 he was with the Army of the United States, filling a special assignment in the Medical Corps. After release from the army Dr. Warner enrolled in the Des Moines Still College of Osteopathy, from which transferred in 1924 to the American School of Osteopathy. He received his D.O. from the latter institution in 1925. For several years Dr. Warner engaged in general practice in Michigan and Florida.

Graduate Study

He returned to the University of Michigan for graduate study during the summer of 1923 and to the University of Michigan for graduate study in Chemistry during the summer of 1925. At this time Dr. Warner accepted a position with the Kirksville College of Osteopathy and Surgery as Head of the Department of Chemistry and Associate Director.
Alumni Hear Harmon on Educational Problems

The National Alumni Association was particularly fortunate in obtaining for its annual banquet meeting during the War Health Conference Dr. Henry G. Harmon, President of Drake University, as principal speaker. Dr. Harmon gave a stimulating and reassuring talk on the role which alumni might play in educational development. He pointed out three categories of alumni, which could be identified—the "ancient adolescents," who are those who seek to regain the spirit and activities of their college days at the annual homecoming, unavailingly without success; the group of alumni who give lip service to their Alma Mater and whose efforts go little beyond the figurative slap on the back and good word; the third group, which, form the backbone of the alumni structure, are those relatively few men who feel a moral obligation to advance the cause of education through their own institution. Complimenting the Des Moines college alumni that they have shown evidence of belonging to the last group, Dr. Harmon encouraged the alumni body to persist in their strengthening educational efforts.

Professional Education

He pointed out that our professional education, because of the fact that it required extensive laboratory and clinical work, as well as a strong library, was far more expensive than the average Liberal Arts education. Dr. Harmon has shown himself in the past to be a strong supporter of osteopathy and he has previously given lectures before osteopathic groups. Dr. Harmon spoke at the 50th Anniversary of Osteopathic Education in Des Moines two years ago. He also gave the A. T. Still Memorial Address before the Washington sessions on Sunday afternoon during the War Health Conference.

What Do You Think?

The following article was written by Dr. Halladay some three years ago. Virg would be interested in knowing whether our Alumni have gone toward accomplishing "the impossible."—Ed.

The perpetuation of any organization that must provide a service depends upon a number of factors. In the first place its product must be something that is demanded by a large chunk of the people. This product must be delivered to the public by trained men and women who are enthusiastic and sincerely anxious to spread the benefits of its use. It must be produced in sufficient quantity to supply the demand and in the highest quality in order to maintain the demand. The turnover in personnel and lack of proper order that skilled workers will be available to cover new territory and to replace those who are removed by retirement, death, and other causes. This business and the osteopathic profession is certainly a business.

Osteopathy

Returning to the subject matter above we have the answers to these business needs. Osteopathy is a product that is in demand; time has approved its most flattering compliment has come from the opposition, the beginning, improved opportunity to destroy it. Organized osteopathy has been in the flying pan since 1874 but the fire has been hotter lately. It is certainly time now to begin to use something in the way of extinguishers.

Difficulties

The business of training men and women in the art of delivering osteopathy has been difficult. The license to practice has seemed impossible for a man to push himself up hill in his own wheelbarrow but osteopathy has done that. We have never had all that we needed in the way of training facilities. With no endowments and no public aid from tax money we have had to produce osteopathic physicians at the cost of their tuition only. It is a well known fact that the cost per student in securing the medical degree averages about ten times the cost of producing a graduate in osteopathy. The difficulty of adequate payments and state taxes. The paradox in this is that in spite of the difference in cost of education the osteopathic physician has been on the average more successful than the average doctor of orthodox medicine. These facts stand as a challenge to the time we have appreciated the fact that we should make provision for adequate training facilities. But, as an American people we are individually selfish and habitual procrastinators. It usually takes a definite shock to bring us out of our lethargy to the point of putting our talk into action. That shock has been administered and our reaction to it will definitely determine whether or not osteopathy will be trampled under foot perhaps to rise again but if so under different management, or maintained on a different road and in another way that we want it developed.

Facilities

The factors of flavor and quantity are determined also by the standards of the product. We have never been able to meet the demand one hundred percent. At least this is the belief of the admissions and placement in the past we could not meet this demand and this has been due largely to our own fault. Our organization in selling our product to the younger generation. The quality of our product depends entirely on our leadership in colleges and in organizations. Agreed policies in administration must be carried on in the same spirit and unity of thought on basic ideas must be made possible. Our quantity must be increased and our quality must be improved.

The few pointed statements above are merely condensations of many articles and talks that have been before you for years. Seven years ago we tried to impress you with these same ideas. A few in Des Moines aided by a alumni outside of Drake worked until we were exhausted both in mind and body trying to bring you the facts. It is not too late yet and at this time that more has to be done in less time and more money has to be available.

Several years ago we talked of a new building and the various departments needed for adequate work. And the department had plans that were laughed at and not because they were impractical but because they were impractical. We expended $50,000.00 for that department alone. We wanted a separate anatomical lecture room adjacent to a modern air conditioned and ventilated laboratory. This laboratory to be equipped with refrigeration for the specimens and a separate laboratory for research from an osteopathic standpoint. We wanted a library room for that department alone with all reference books and charts together with prepared specimens for study and we wanted time for preparation and particularly the other important subject so that we could train not only osteopathic physicians in anatomy from a manipulative standpoint but to provide special courses in surgical anatomy. This can be done yet. Our college has the department of anatomy but in the others also but it will take money to provide the facilities for such an idea to implement.

Osteopathy will not and cannot assume its rightful place until its colleges are provided with more means to complete training. Our degree of utility is now being measured in more ways than one and if we

Alumni Gifts to College

Dr. A. E. Smith, of Youngstown, Ohio, during the last week, presented the college with a teaching purpose and makes a creditable addition to the instruction materials of the Department of Surgery.

Dr. Robert G. Hatchitt has donated to the college an osteopathic treatment table. Dr. Hatchitt has recently opened a new suite of offices in the Liberty Building in Des Moines, enlarged and nicely appointed.

The interest of Dr. Hatchitt, Dr. Sutton and Dr. Klein where noted in making useful gifts to the college is genuinely appreciated. Equipment, which is now both expensive and difficult to buy, makes one of the finest ways in which alumni may show their interest and affection for their Alma Mater.

Add to these the splendid gestures of Dr. Bachman, Dr. Pauline Brown and Dr. Bos, indicating the spirit of the alumni generosity. Moreover a peculiar type of warning was received—the library was asked not to buy out of stock which will not be released in October because "I want to present it to the library." (Dr. Della B. Caldwell).

Dr. Bachman Presents Journals to Library

The library was enriched during the past week by approximately twelve volumes of the American Journal of Obstetrics and Gynecology, many years of the A. O. A. Journal and Clinical Medicine and Surgery. Dr. Bachman has shown not only interest, but a true sense of values in presenting these works so that students may profit. The library is grateful for Dr. Bachman's contribution.

Dr. Anderson Presents Colorimeter to Lab.

Dr. John S. Anderson, of River Falls, Wisconsin, who has already contributed $125.00, this last week offered to the college a new photoelectric colorimeter for use in clinical laboratories. Such continued and faithful interest in the welfare and development of the college merits for Dr. Anderson the gratitude of the college and the respect of his fellow alumni.

Dr. Anderson Presents Colorimeter to Lab.

The few pointed statements above are merely condensations of many articles and talks that have been before you for years. Seven years ago we tried to impress you with these same ideas. A few in Des Moines aided by alumni outside of Drake worked until we were exhausted both in mind and body trying to bring you the facts. It is not too late yet and at this time that more has to be done in less time and more money has to be available.

Several years ago we talked of a new building and the various departments needed for adequate work. And the department had plans that were laughed at and not because they were impractical but because they were impractical. We expended $50,000.00 for that department alone. We wanted a separate anatomical lecture room adjacent to a modern air conditioned and ventilated laboratory. This laboratory to be equipped with refrigeration for the specimens and a separate laboratory for research from an osteopathic standpoint. We wanted a library room for that department alone with all reference books and charts together with prepared specimens for study and we wanted time for preparation and particularly the other important subject so that we could train not only osteopathic physicians in anatomy from a manipulative standpoint but to provide special courses in surgical anatomy. This can be done yet. Our college has the department of anatomy but in the others also but it will take money to provide the facilities for such an idea to implement.

Osteopathy will not and cannot assume its rightful place until its colleges are provided with more means to complete training. Our degree of utility is now being measured in more ways than one and if we

cannot meet the standards set by the A. O. A. Association. If we wish osteopathy to continue into the future as such we must provide the way now for that profession. The osteopathic institution of proven value we certainly want it to live and serve. That our obligation and our contribution to the American way of life.

(Signed) VIRG HALLADAY.
point out to some extent the stress under which the osteopathic colleges are operating during war time.

Applicants
The added duties of the Dean in maintaining proper relations with the Selective Service System, necessitating reams of correspondence, is too obvious to need emphasis. The number of pre-registered applicants, who have applied for admission, paid a matriculation and were then forced to join the Armed Forces, is large enough to be significant by 300% than the number of students we have lost to the Selective Service System.

Dr. Bachman to Leave Obstetrics Department October 6
Dr. Robert Bachman, Head of the Department of Obstetrics and Supervisor of the Obstetrical Clinic of Des Moines Still College, has resigned his position effective at the close of the present semester, October 6th.

Effects of War on the Des Moines College
Recently a report was prepared for another reason on the effects which the war has had on the various departments of the Des Moines college. During the course of the Osteopathic Progress Fund Campaign attention has been repeatedly called to the need for educational advancement. Items expanding and improving our educational system have been stressed.

We have boasted justifiably about the renovation of the library and the laboratories. The time of dilution of the effects of war on our institution merely serve to accentuate the extreme significance of these several projects because they have been done at a period in our history when they have been most difficult to accomplish.

Enrollment
Enrollment has decreased to an alarming degree from our normal total, indicating that our income from student tuition is at an extremely low point. The faculty, because of the accelerated program, is overburdened and, relative to financial returns from private practice, is underpaid. The alumni owe a great debt of gratitude to those men and women who are giving part of their time to instruction on an insignificant salary in our colleges.

Clinic
The number of students treating in our clinic has decreased from approximately 90 to 24. In spite of the fact that we have only a quarter of the number of students in the clinic, the number of new registrations in the clinic last year showed a decrease of only 30%. Although only one-fourth the usual number of students are treating, they are handling more than three-fourths of a normal clinical load, and alumni owe a great debt of gratitude to the student body now enrolled for maintaining a clinical service to the City of Des Moines at so nearly "par".

In spite of our unduly heavy war time schedule of classes, the college has felt an obligation to provide instruction also in First Aid. This has added to both the burden of the students and to the burden of the private practitioners who have assumed responsibility for this instruction.

Although the foregoing does not constitute the complete report which was filed, it will serve to

OSTEOPATHY

Principles
It is a matter of legislative record that the question of the future of Osteopathy has been of vital concern to both Osteopathic and Medical Physicians. It will be freely admitted by Osteopathic Physicians and by those Medical Physicians who have given Osteopathy intelligent consideration that by "Osteopathy" is meant the Osteopathic person, and not those physiological principles of healing which have been developed under the name "osteopathic."

Those principles announced by A. T. Still and supported by his followers, namely, immortality and intrinsic ability of the body to recover from deleterious effects of adverse environmental agents, are merely natural law — irrefutable, irrevocable and immutable. The art of manipulation, of giving direction and assistance to a human body in a less fortunate position to combat disease, is osteopathic.

Philosophy
Fully 80% of the osteopathic student's curriculum must duplicate that of a medical student. Each is going to see, diagnose, and treat the same diseases, hence the approximate 20% difference between osteopathic and medical curricula is the reason for the existence of the Osteopathic Colleges.

Unfortunately the physiological and pharmacological philosophies toward healing are antithetical. The college has felt an obligation to provide instruction in First Aid. This has added to both the burden of the students and to the burden of the private practitioners who have assumed responsibility for this instruction.

Although the foregoing does not constitute the complete report which was filed, it will serve to

Dr. W. P. Kelsey
Of Remsen Marries
Elnora Klein
Dr. William P. Kelsey and Miss Elnora Klein of Remsen were united in marriage at St. Mary's church in that city by Rev. L. P. Friedman on Wednesday, June 14.

Miss Kathleen Klein attended her sister as bridesmaid and Dr. William P. Kelsey as best man.

Dr. Walley to Hot Springs, N. M., Dr.
Bennett to Corwith
Dr. P. E. Walley, Corwith, moved to Hot Springs, New Mexico, on July 5 where he is associated with Dr. Sherman W. Meyer, formerly of Algona, who operates the Virginia Ann Hospital in that city.

Dr. R. B. Bachman
Dr. Bachman has been a member of the Des Moines college staff for 27 years and during that time has built a strong osteopathic clinic and a widely known Department of Obstetrics. Dr. Bachman is recognized as one of the foremost obstetricians in the osteopathic profession and it is with great regret that the Des Moines college relinquishes the obstetrical direction which Dr. Bachman has given through the years.

Dr. Bachman will accept an obstetrical post at the Kirksville College of Osteopathy and Surgery. Applications are currently being received to fill the vacancy created by Dr. Bachman's resignation.

Dr. W. P. Kelsey
Of Remsen Marries
Elnora Klein
Dr. William P. Kelsey and Miss Elnora Klein of Remsen were united in marriage at St. Mary's church in that city by Rev. L. P. Friedman on Wednesday, June 14.

A rare treat was afforded the Des Moines Alumni and student members of Iota Tau Sigma at the home of Dr. and Mrs. E. E. Steffen the evening of July 22nd. The occasion being Dr. Steffen’s birthday. Dr. Steffen is a practicing physician in Des Moines. Prior to this he was a member of the faculty of the Des Moines Still College. This position he has maintained for ten years. At present he is a member of the Des Moines Still College. He has maintained his professional interest in the Osteopathic Profession, both from teaching and practicing experience, coupled with his keen intellect makes him a most interesting conversationist. In addition, Mrs. Steffen has for years of teaching experience in China, afforded present with an educational and pleasant evening.

A business and educational evening for Beta Chapter was held at the home of Mr. and Mrs. Paul Reichstadt, July 28th. Professor Merrill, who was present at the Grand Council banquet and business sessions in Chicago, reported on fraternity business enacted in that session. Following this, a recent visual educational film on Obstetrics, as practiced in a major hospital, was shown to Alumna, actives, pledges and friends. The treat of the evening, however, was the delicious chocolate cake and ice cream served by Messalades Reichstadt and Slater.

Iota Tau Sigma joins in welcoming a new member into the fraternity and school, by the recent transfer of Mr. Harry Fentonova from the Philadelphia College of Osteopathy. Lastly but not least, the Merrill’s are the proud father and mother of a husky 7 1/2 pound boy born at Des Moines General recently.

G. H.

O.W.C.C.

At the meeting held on August 25th in the home of Helen Reisch, who had as co-hostesses, Miss Sadie Reynolds, Miss Dorothy Long and Miss Elizabeth Jones, following officers were elected for the next period: President, Laura Allshouse; Vice President, Alexander Shidler; Secretary, Doris Martin; Treasurer, Gwen Taylor. An interesting program has been planned. Success will, however, depend upon the attendance of each member. Meetings will again be held in the homes of the members.

The Club extends a hearty welcome to the following new members: Marjorie Conrad, Annella Leibel and Joyce Griffith.

WARNER

(Continued from Page 1)

of Clinics. He was appointed Dean of the Kirksville college in 1934, which position he has held until the present.

Activities

Throughout Dr. Warner’s professional experience he has been recognized as a leader, both in professional matters and civic affairs. He is currently Vice-Commander of the Kirkville Post of the American Legion and is President of the Kirkville Rotary Club. He is Past Master of the Ivanhoe Lodge F. A. M. in Keota, Iowa, a member of Phi Sigma Gamma, Alpha Phi Omega and Sigma Sigma Phi.

Dr. Warner, in addition to his duties as dean at the Des Moines College, will also continue his pharma
cology and Immunology and will serve as general clinician in the college clinics one afternoon a week.

Dr. Warner, an active member of the Alumni Association, is a valued member of the community.

NOTICE

If you change your address, please notify the Log Book promptly.

Dr. Hovis Named To Civil Service

The appointment of Dr. J. Clark Hovis, of 52 Beresford avenue, senior member of the surgical staff of the Detroit Osteopathic Hospital, as a member of the Civil Service Commission was announced by Mayor Norman J. Patterson at Council meeting Monday night. Dr. Hovis succeeds Claude E. Campbell, who resigned his position on the Board in May to accept an appointment as Civil Commissioner.

President of the Wayne County Association of Physicians and Surgeons of Osteopathic Medicine, Dr. Hovis has practiced in Highland Park for the past 14 years. He is also a member of the North End Lions club, the Zion Lodge No. 1 Masonic Order, and an honorary member of Sigma Sigma Phi.

Dr. Hovis, a married man, has two children, Patricia, 12, and James, seven years old.

Dr. George Sutton Visits College

Dr. George Sutton, of Mt. Pleasant, Iowa, who initiated the negotiations with Iowa Wesleyan College culminating in the combined curriculum plan between that institution and the osteopathic colleges, returned to Des Moines for a brief visit last week. Dr. Sutton will also be noted as providing funds to the Iowa Wesleyan College for the Sutton Scholarship for pre-osteopathic study.

Dr. James N. Fox Visits Alma Mater

Dr. James N. Fox, 1942 graduate of Des Moines, returned for a brief visit to renew acquaintances and discuss problems in cranial manipulation. The group also formulated a program for continued study. The following were included in the group: Drs. Paul E. Kimberly, Faye Kimberly, Beryl Freeman, O. E. Owen, L. R. Deltitrick, Bertrand Adams, Glenn Baird, Della B. Caldwell and Augusta Tuckes.

Dr. Blohm Honored

Dr. Hilden Blohm, 1943 graduate, was honored by colleagues and friends of the Muskegon Osteopathic Hospital in Michigan. Dr. Blohm shortly will complete his internship at this hospital and will practice in Wheeling, W. Va. Approximately 200 guests attended the party in Dr. Blohm’s honor prior to his departure for West Virginia.

F. A. Davis Company Gives Encyclopedia To Library

Through the agency of Dr. Myron E. Bos, who completed arrangements and recommended the donation of an unclaimed set of the F. A. Davis Company Encyclopedia of Practice, the library has been enriched to that extent. Both the library and the college are deeply grateful to the F. A. Davis Company for this donation and to Dr. Bos, of Keota, Iowa, both of whom have kept our best interests in view.

Dr. Pauline Brown Starts College Loan Fund

Dr. Pauline Brown, of Belvidere, Illinois, at the A.O.A. Convention presented the college with a check for $50.00 for the purpose of starting a Student Loan Fund. Dr. Brown’s understanding of educational problems of our college, as shown by this gift, is commendable. The college is sincerely grateful for Dr. Brown’s contribution, which it confidently hopes will be the start of a long series of such contributions.

Dr. and Mrs. Stanley C. Pettit, of Cleveland, Ohio, announce the birth of Dr. and Mrs. Robert C. Hatchett, of Des Moines, are the parents of a son, Dennis Leroy, who was born July 22nd.

Births

Dr. and Mrs. John L. Royer, of Woodward, Iowa, announce the birth of a daughter, Sara Kathryn, born at Des Moines General Hospital July 14th, weighing 6 lbs. 3 oz.

Dr. and Mrs. O. E. Rose, of Des Moines, are parents of a daughter, Carolann Louise, born at Des Moines General Hospital August 7, 1944.

Study Course in Cranial Technique

On Wednesday, August 16th, a group of interested Iowa physicians met at the Des Moines College of Osteopathy to review and discuss problems in cranial manipulation. The group also formulated a program for continuation. The following were included in the group: Drs. Paul E. Kimberly, Faye Kimberly, Beryl Freeman, O. E. Owen, L. R. Deltitrick, Bertrand Adams, Glenn Baird, Della B. Caldwell and Augusta Tuckes.
Dr. Harry J. Marshall
To Return in October

Dr. Harry J. Marshall, who has been ill for approximately the past year, will return to Des Moines in mid-October to resume his practice and hospital duties. Dr. Marshall has been resting and recuperating from asthmatic attacks, in Texas and more recently at Lake Okoboji. Friends and colleagues of Dr. Marshall are pleased to know that his health is sufficiently stable that he may again engage in his osteopathic practice.

Dr. H. J. Marshall
Attends Michigan Convention

Professor H. W. Merrill, of the Department of Preventive Medicine, and Dr. Hugh Clark, President of the college, will speak on the program of the Health Service Conference of the Michigan Society of Osteopathic Physicians and Surgeons. Professor Merrill will address the body on the subject of “Malaria” and Dr. Clark on “Osteopathic Education.” The meetings are to be held October 24th to 26th.

Surgeons to Meet in Detroit

The American College of Osteopathic Surgeons will hold its 1944 Annual Clinical Assembly at Detroit, Michigan, October 15 to 19, inclusive. The American Osteopathic Hospital Association and the American Radiological Society will convene jointly with the College at that time.

Organization

A.C.O.S. President Richard A. Sheppard, of Cleveland, has appointed Dr. Aaron Kane, of Detroit, as General Chairman of Convention Arrangements, with Dr. J. Clark Hovis co-chairman in charge of Publicity and Dr. Lloyd A. Seyfried co-chairman in charge of Functions. Dr. H. Willard Sterrett, of Philadelphia, is Program Chairman. Host organizations are the million-dollar Detroit Osteopathic Hospital, with Dr. J. Donald Sheets, chairman; its newly-opened Riverside Osteopathic Hospital division, with Dr. V. H. Dierdorf chairman; and the imposing new Art Centre Hospital, with Chairman Dr. A. C. Johnson.

New Developments

Papers on “What’s New” in the field of surgery, anesthesia, radiology and pathology will be presented in an interesting and well-balanced program arranged by Dr. Sterrett, Program Chairman. Operative clinics will be held at the three host hospitals, under direction of Dr. R. A. Biggs, general chairman of Clinics. Dr. M. L. Axelrod, of Detroit, is chairman of Anesthesia and Dr. C. J. Karibo, of Detroit Osteopathic Hospital, chairman of Radiology.

Surgery Board

Throughout the general sessions program numerous color films will be shown, depicting the newest advances in surgical technique. More than 30 exhibitors will present and demonstrate their products, which promise to be of utmost interest to the membership and guests. Details of the program will be published at a later date.

The Board of Surgery will conduct examinations for specialty certification on Friday, October 13, at 9:00 A.M., according to announcement made by Dr. Ralph Baker, chairman.

Dr. Niles to Address Seniors At Commencement October 6

Seven of the eight graduands, who will receive their degrees on October 6th, have completed arrangements to assume internships shortly after that date. James Granese will intern at Detroit Osteopathic Hospital, William Crotty at the Tulsa Osteopathic Hospital, Herbert Harris at Michigan Street Hospital, Seattle, Washington, Scott Heatherington at Detroit Osteopathic Hospital, Lester Rauh at the Baseline-Rossman Hospital, Grove City, Pa., Richard Snyder at Detroit Osteopathic Hospital. Mr. Kuramoto has not yet made a clean cut decision and Mr. Paul Emmans will enter practice immediately in Wellman, Iowa.

Crotty Recovering From Auto Accident

Mr. William Crotty, graduating senior at the college, was injured August 14th when he was struck by an auto at Ingersoll and 21st Street in Des Moines. Mr. Crotty suffered a fractured tibia, fractured rib, sterno-costal separation of three ribs and puncture wound in the chest. He has been under the care of Dr. Roger Anderson of the Des Moines General Hospital. Mr. Crotty’s injuries have sufficiently healed that he is able to attend classes regularly.

Dr. Anderson Assistant To Dr. Marshall

Dr. Roger B. Anderson, 1942 Des Moines graduate, will be associated with Dr. Harry J. Marshall October Ist. Dr. Anderson will maintain an office in the Taylor Clinic during the afternoons and will serve at the Des Moines General Hospital during the morning. Dr. Anderson will also assist in Eye, Ear, Nose and Throat Department at the Inter institution.

Senior Banquet

The senior banquet will be held on Thursday evening, October 5, at 6:30 P.M. at Younkers Tea Room. It is customary at the senior banquet that the class advisor present the main after dinner speech. The class has selected for this banquet Dr. L. A. Deitrick. Additional speakers will be Dr. O. E. Owen, Dean, and Mr. Herbert G. Harris, Class President. Dr. Hugh Clark, President of the College, will preside and will announce the Psi Sigma Alpha high scholarship awards at that time.

Dr. Anderson Assistant To Dr. Marshall

Dr. Roger B. Anderson, 1942 Des Moines graduate, will be associated with Dr. Harry J. Marshall October Ist. Dr. Anderson will maintain an office in the Taylor Clinic during the afternoons and will serve at the Des Moines General Hospital during the morning. Dr. Anderson will also assist in Eye, Ear, Nose and Throat Department at the Inter institution.

Senior Banquet

The senior banquet will be held on Thursday evening, October 5, at 6:30 P.M. at Younkers Tea Room. It is customary at the senior banquet that the class advisor present the main after dinner speech. The class has selected for this banquet Dr. L. A. Deitrick. Additional speakers will be Dr. O. E. Owen, Dean, and Mr. Herbert G. Harris, Class President. Dr. Hugh Clark, President of the College, will preside and will announce the Psi Sigma Alpha high scholarship awards at that time.

Iowa State Board

Examinations

Dr. Marvin E. Green, member of the Iowa Board of Osteopathic Examiners, announces that the examinations given by that board will be held October 9, 10, 11 at the State House. Basic Science examinations will be given October 10.

NEXT CLASS ENROLLS OCTOBER 9
THE LOG BOOK

G. I. Bill of Rights

Repeatedly different divisions of the osteopathic profession have called to the attention of osteopathic physicians certain provisions of the G. I. Bill of Rights. Let us summarize some of the pertinent information in this regard.

(1) The G. I. Bill of Rights (Servicemen's Readjustment Act of 1944) contains specific provisions for the education of returning veterans.

(2) The ex-serviceman must have served a minimum of ninety days after September 16, 1940, if the service was interrupted by the war. Exception --A refresher course of one year or less will be provided for men over 25 if they so desire.

(3) If the veteran is more than 25 years of age, he must have been discharged because of an injury or disability incurred during his period of service.

(4) Each veteran over 25 years of age, whose education was interrupted, under 25 years of age, may seek educational benefits from the G. I. Bill of Rights by application through the Veterans Administration. If you are in doubt as to the location or address of the Veterans Administration Field Station in your area, you may obtain that information from your nearest osteopathic college.

(5) Each veteran approved by the administration is entitled to government support for one year plus the period of active service after September 16, 1940. A maximum of four years training is allowed. Maximal support for tuition, books and supplies is $500.00 plus living expenses, which vary according to number of dependents and absence or presence of disability.

(6) The veteran must make application not later than two years after discharge from the service.

(7) The veteran may make his application to the Veterans Administration directly, or through the osteopathic college of his choice. He may actually be enrolled in the college before filling his application with the Veterans Administration.

(8) Veterans Administration Offices are located as follows:

Albuquerque, New Mexico
Atlanta, Georgia
Baltimore, Maryland
Batavia, New York
Bay Pines, Florida
Boise, Idaho
Boston, Massachusetts
Brecksville, Ohio
Bronx, New York
Cheyenne, Wyoming
Columbia, South Carolina
Dayton, Ohio
Dearborn, Michigan
Denver, Colorado
Des Moines, Iowa
Fargo, North Dakota
Fayetteville, North Carolina
P. O. Harrison, Montana
Hines, Illinois
Huntington, West Virginia

Indianapolis, Indiana

SYLLABUS OF COURSE IN CRANIAL TECHNIQUE

Des Moines Still College of Osteopathy

Dr. W. G. Sutherland

Dr. P. E. Kimberly
Dr. L. A. Deitrick
Dr. Beryl Arbuckle
Dr. R. S. McVicker

The student who is preparing himself for cranial technique must have a vivid mental picture of the entire skull, its articulations, and its relationships. The meninges, the dural venous channels, and the known physiology of the cerebrospinal fluid are also essential when we consider cranial lesions.

WEEK OF OCTOBER 16

Anatomy and Physiology of the Skull — Drs. Kimberly and Deitrick

In order to maintain proper continuity, this work has been divided as follows:

Monday A.M. — The external morphology of the skull except the base.
Monday P.M. — The internal morphology of the skull including the attachments of the dura.
Tuesday A.M. — Construction of the orbit and nose and the external morphology of the base.
Tuesday P.M. — Review.
Wednesday — A detailed study of the occiput, the sphenoid, and the ethmoid.
Thursday — Temporals, parietals, and frontals.
Friday — Maxillae, palatine, vomer, malar, and lacrimal.
Saturday A.M. — Inferior turbinates, nasals, and mandible.
Saturday P.M. — Review.

WEEK OF OCTOBER 23

Cranial Technique — Drs. Sutherland, Arbuckle and McVicker

Review of diagnosis and correction of cranial lesions in theory and practice. Demonstrations of diagnosis and technique on patients.

INFORMATION

Tuition — $100.00 total, or divided as follows: $25.00 for week of October 16, and $75.00 for week of October 23.

Registration — Applications should be placed immediately and accompanied by a matriculation fee of $25.00, payable to the Des Moines Still College of Osteopathy. Upon arrival at the college, register with Mrs. K. M. Robinson, Secretary. The number will be limited.

Inquiries — Dr. Hugh Clark, President.
Vocational Guidance Without Limitation

The Colleges

Why should a message on Vocational Guidance be repeatedly directed to the osteopathic profession, when it is obvious that the problem is one for the colleges of osteopathy and not for the profession? It is the task of the colleges to provide vocational counselors for these thousands of young men and women who have made no decision regarding a professional career. It is the task of the colleges to provide vocational counsel for these thousands of young men and women who have made no decision regarding a professional career. It is the task of the colleges to provide vocational counsel for these thousands of young men and women who have made no decision regarding a professional career.

High Schools

High school boys and girls are still impressionable. There has been a tendency to decide among the profession that the two years of preosteopathic training in the college building. The X-ray room is the old anatomy demonstration pit, which has no further educational value, and has been moved to a second floor. The X-ray room is the old anatomy demonstration pit, which has no further educational value, and has been moved to a second floor. The X-ray machine has been used for clinical patients and its uses have been increased by multiplying its use.

x-ray Installed

For Clinical Use

During the past two weeks the General Electric X-Ray 200 Milliampere Machine, equipped with facilities for fluoroscopy, has been installed on the first floor of the building. The X-ray room is the old anatomy demonstration pit, which has no further educational value, and has been moved to a second floor. The X-ray machine has been used for clinical patients and its uses have been increased by multiplying its use.

The Colleges

The very nature of the selling program that is being executed on osteopathy necessitates a cautious approach. The time involved by each individual must be limited. If each member of the profession were to make three contacts in his own community and two public appearances a year before interested groups, such a sell would form the basis for an energetic and far-reaching vocational guidance program.

The very nature of the selling program that is being executed on osteopathy necessitates a cautious approach. The time involved by each individual must be limited. If each member of the profession were to make three contacts in his own community and two public appearances a year before interested groups, such a sell would form the basis for an energetic and far-reaching vocational guidance program.

Vocational Literature

The Central Office of the A.O.A. will provide, on a moment's notice, any of the attractive and scholarly pieces of vocational literature. The cost is virtually negligible, the good you may have done is inestimable. Why not contact your State Vocational Guidance Chairman, or the President of your closest osteopathic college and ask if you may participate in their program of vocational guidance. The profession needs, more urgently than ever, your assistance.

G. I. Bill of Rights

(Continued from Page 2) charge, must have a trainable disability from the present war, must be in need of vocational rehabilitation, and must overcome the handicap of such disability.

G. I. Bill of Rights

(Continued from Page 2) charge, must have a trainable disability from the present war, must be in need of vocational rehabilitation, and must overcome the handicap of such disability.

The disabled veteran does not have free choice of occupational fields. This course of instruction can exceed four years in length or shall any training under this legislation be afforded beyond sixty hours after the termination of the present war.

If veterans are to take advantage of either Public Law 16 or Public Law 346, educational provisions for which are reviewed above, you must point out to the veteran the osteopathic application of these bills. Address any questions pertinent to eligibility or enrollment in an osteopathic college to the Dean of the college in question.
College on or before September 18. All members of the club please salvage your old clothes for war relief and bring them to the meeting to be held October 3 at the home of Gwen Taylor, 1522 Eleventh.

A Hard Time party is scheduled for October 17. Watch for further announcements. — D. M.

As we go to press a letter is received from Dr. Aspengren, of Des Moines, Iowa, who, with the help of the library staff is enthusiastic about this most recent alumni gift.

W. R. R.

Weddings

Mr. Gerald A. Rosenthal, a former student and now in the Armed Services, and Miss Cleo Marie Hahn have announced their marriage on August 8th. The wedding took place in San Francisco.

Mr. James Barnett, sophomore student at the college, was married on January 30, 1944, to Miss Barbara Riley of Des Moines. Miss Riley was graduated from Iowa Lutheran Hospital School of Nursing last August.

The Log Book wishes to express for the officers and faculty of the college congratulations and best wishes to both couples.

NOTICE

If any student wants to change his address, please notify the Log Book promptly.
Schwartz, Graney, Cash Attend Detroit Sessions

Dr. J. F. Schwartz, Chief Surgeon and President of the Des Moines General Hospital, Dr. Howard A. Graney, Surgeon, and Dr. Byron L. Cash, Radiologist at the College of Osteopathy.

Dr. Carl Waterbury, who was graduated from the Des Moines College in 1942, will return November 1st to assume duties in the Obstetrical Department. Dr. Waterbury will present the first course in Obstetrics and will be Assistant Director of the Obstetrical Clinic. Dr. Waterbury was graduated with distinction, having the highest scholastic average in his class and also having shown special clinical aptitude. He has completed a year's internship at the Wilshire Hospital in Los Angeles. Dr. Waterbury is a native of Des Moines and during the first year of his instruction in the Obstetrical Department of the college will also fill his spot light turned for his license in surgery. It is his intention to practice in the State of Iowa.

Dr. Niles Impresses 1944 Graduates

At the conclusion of the Commencement ceremony a feature new to graduates of the Des Moines Still College of Osteopathy was added. For the first time graduates of the College were formally received into the Alumni Association by a simple procedure. Dr. Earl O. Sargent, President of the Iowa Alumni Association of the Des Moines Still College of Osteopathy, spoke briefly and pointed out the opportunities open to each October 6 graduate. Dr. Sargent emphasized the importance of service which could be rendered by each new alumni, “service to the public, service to the profession, service to the College and service to yourself in upholding the Osteopathic Oath.”

Alumni Induction Rites Added to Ceremony

At the conclusion of Dr. Sargent's remarks he read congratulatory messages from Dr. R. C. McCaugham, Executive Secretary of the A.O.A., and Dr. C. Robert Starks, President of the A.O.A. Both men welcomed the new graduates into the profession and highly commended the class for 100% membership in the American Osteopathic Association, typifying, said Dr. Starks, “the spirit of the Des Moines Still College of Osteopathy.”

Dr. Byron L. Cash

Dr. Carl Waterbury joins Obstetrical Staff

Possibilities

LET'S TURN THEM INTO REALITIES

In this the first article I have written for the Log Book since my student days at the Des Moines Still College of Osteopathy many back in the early twenties, I want to be entirely informal. I want it to be a sort of letter of personal greeting from the new Dean to each student and alumni. I should like to give some of my impressions of the college and some of the possibilities I see for the future. It is needless to say that I should never have joined the staff at Des Moines Still College of Osteopathy had I not been favorably impressed by the present as well as the future.

View Points

Osteopathic Education is undergoing a rather revolutionary change in the field of medicine. This change is relevant to its professional importance. It is out in front of the whole profession with the full glare of knowledge upon it. Spotlights tend to highlight certain features and to cast others into shadow so that a single object presents different pictures according to the angle from which it is viewed.

Because of the many points of view from which the individual (Continued on Page 3)

Fine Address Before Large Audience

Highlights of the Commencement exercises of the Des Moines Still College of Osteopathy, October 6, 1944, was the address, “Growing Up” by Dr. Stanley H. Niles, President of Iowa Wesleyan College. Brightening his serious message with frequent whimsical and humorous references, Dr. Niles built up his thesis of intellectual maturation by pointing out certain “rights” and “wrongs” of approach to problems. Evasion, a common but unsatisfactory crutch in solving problems, was first in the discussion. Following, a close analysis of evasion, procrastination became the victim of a rather vitriolic attack, pointed by humorous anecdotes. The third escape mechanism which suffered an uneasy few minutes at the hands of Dr. Niles was rationalization. Not least among the topics of his talk was substitution, whereby the original problem is not attacked at all, but is replaced by one which is simpler or by a new attitude which is intended to serve as a goal, however, as “throwing a tantrum.” Dr. Niles assigned to the last method of problem solution the expression “adult infantilism.”

Faculty, friends and recent graduates felt that Dr. Niles address was indeed distinguished.

Other features of the program which received most favorable comment were the renditions of “Byrnon to the Night” and “America the Beautiful” by the Roosevelt High School a capella choir, under the direction of Miss Laura Duncans. Presentations of these boys and girls were masterfully done. Wayne Kueffer’s solo appearance with the choir was both dignified and distinguished.

Additionally the program included Invocation by Dr. Robert Bachman, a vocal number by Mr. H. M. Cleveland and organ music for the Processional and Recessional by Mrs. Samuel Garton. To Dr. Bachman also fell the duties of vesting the graduates with the hood, symbolic of completion of the osteopathic curriculum. The class was presented for conferment of degrees by Dean Owen, and the Osteopathic Oath was administered and the degrees were conferred by President Clark.

Seniors Win Cup

At Picnic Games

The Student-Faculty Council, which has among its duties and privileges the task of selecting a floating holiday, this year named September 28th. Undoubtedly the morning was used by most (Continued on Page 4)
Dr. Bayne Recovers From Prolonged Illness

Word was recently received that Dr. Richard Bayne, of Detroit, 1943 Des Moines graduate, has recovered from a long and serious illness. Dr. Bayne for months has been incapacitated as a result of a siege of typhoid. It is pleasing to his former associates and classmates to know that Dr. Bayne will soon be able to return to his practice.

Lewis and Westfall Take Postgraduate Course

Dr. George P. Lewis, 1943 graduate, who completed his internship at the Madison Street Hospital in Seattle, returned to the college during the summer enroute to the A.O.A. Convention. On his return trip Dr. Lewis detoured through Texas and spent a month in obtaining postgraduate training in his specialty, Eye, Ear, Nose and Throat.

Dr. William Westfall has recently returned to his practice in Ackley, Iowa, after completing his training in Proctology at the Dover Clinic in Boston. Dr. Westfall is enthusiastic about his postgraduate work and will participate in the program of the proctologists who will hold a clinic at the Des Moines College Sunday, October 22nd. On his return from Boston Dr. Westfall had the interesting experience of appearing as a guest on the Thanks to the Yanks program conducted by Bob Hawk.

Dr. Mary Williams Opens Office

Dr. Mary E. Williams, 1943 Des Moines graduate, has announced the opening of her office at 2252 North High Street, Columbus, Ohio. Dr. Williams completed internship and requirements for her college associates for Des Moines associates wishes for deserved and growing success.

Dr. Barr Returns To Alma Mater

Dr. Clyde Barr, 1943 graduate, returned to Des Moines during the past week to write the Iowa basic science examination. Dr. Barr favored his former college associates with a very pleasant, although brief, visit. Dr. Barr recently completed his internship and now is working as a resident in the Riversidge Hospital, opened in Trenton, Michigan last month. Dr. Barr was highly pleased with the changes that have taken place in the college since he was graduated.

Freshman Class Shows Energetic Spirit

Incomplete registration includes among the entering Freshman Class as of October 9, the following:

Doran, May Diener, Palmyra, N. J.
Wilmoth J. Mack, Des Moines George T. Moylan, Detroit
Charles B. Alexander, Des Moines
Gustav Peterson, Gibbon, Minn.

Of this group, Gustav Peterson is entering the college under the provisions of the “G. I. Bill of Rights.” He was previously enrolled in the college.

Mrs. Aline Peace, whose husband (Dr. Tyrus Peace) was graduated in 1943, is returning as a sophomore, to complete the osteopathic course. Mr. Charles Alexander, whose home is Des Moines, transferred to the Des Moines college from Kirkville.

The Log Book is enthusiastic about his postgraduate work and will participate in the program of the proctologists who will hold a clinic at the Des Moines College Sunday, October 22nd. On his return from Boston Dr. Westfall had the interesting experience of appearing as a guest on the Thanks to the Yanks program conducted by Bob Hawk.

Dr. Barr Returns To Alma Mater

Dr. Clyde Barr, 1943 graduate, returned to Des Moines during the past week to write the Iowa basic science examination. Dr. Barr favored his former college associates with a very pleasant, although brief, visit. Dr. Barr recently completed his internship and now is working as a resident in the Riversidge Hospital, opened in Trenton, Michigan last month. Dr. Barr was highly pleased with the changes that have taken place in the college since he was graduated.

Ralph Powers Resigns From Municipal Bench

Mr. Ralph L. Powers, lecturer in Medical Jurisprudence, resigned September 30th as Municipal Judge. Mr. Powers had served the city in this capacity for more than twenty years and has been a symbol for honor, fairness and keen cooperation with the law enforcement officials. Former Judge Powers is now established in a private law practice with firm Powers, Sloan, Woodcock and Orebaugh.

Dr. Bertrand Adams Now With Dr. Gulden

Dr. Bertrand Adams is now associated in practice with Dr. H. L. Gulden at Ames. The past year he has interned at the Detroit Osteopathic hospital, Detroit, Michigan, following graduation from the Des Moines College of Osteopathy.

In addition to his office practice, Dr. Adams also gives anesthesias for major surgery at the Mary Greeley hospital at Ames.

Technique Course Has Auspicious Beginning

The course in Cranial Technique, beginning October 16 with a review of cranial morphology and physiology by Dr. Paul E. Kimberly, will be continued October 23 by Dr. W. G. Sutherland of St. Peter, Minnesota, Dr. Beryl Arshuck, of Philadelphia and Dr. Raleigh S. MacVicker of The Dalles, Oregon. The latter group will offer the clinical and preclinical work of the course. Concurrently with the week of the first two weeks course, Dr. Kimberly will begin a second course, which will be completed November 3 by Drs. Sutherland, Arshuck and MacVicker.

The following doctors have enrolled for the course. October 16-23:

Dr. J. Gordon Zink, Canton, Pennsylvania
Dr. Leo C. Harrison, Cherokee, Iowa
Dr. Richard B. Gordon, Madison, Wis.

Dr. E. E. Reese, Toledo, Ohio Dr. J. J. Henderson, Toledo, Iowa
Dr. P. Frank Miller, Philadelphia

Dr. Sevilla Mullot, Bryan, Ohio
Dr. Estelle A. Wise, Cherokee, Iowa
Dr. Joseph Lindsay, Harrisburg, Pa.

Dr. Lowell R. Morgan, Alton, Ill.
Dr. Philip Coker, Panama City, Florida
Dr. L. E. McOmber, Grand Rapids, Michigan

Dr. Janet MacGregor, Marshall, Minnesota
Dr. Nellie D. Kramer, Pella, Iowa
Dr. Nettie M. Harris, Alanta, Georgia
Dr. Beryl Freeman, Des Moines, Iowa
Dr. Dale M. Weldon, Greenville, Mich.

Dr. A. E. Borchardt, Lidgerwood, N. D.
Dr. Beatrice Blawis, Middle Falls, N. Y.

Dr. Ethel L. Truax, Everett, Wash.

The following will attend the course from October 23 through November 5:

Dr. P. N. Lovewell, Northville, Michigan
Dr. R. B. Beyer, Port Arthur, Texas

Dr. Arvilla B. McCall, Evanson, Ill.
Dr. Floriene A. Mauer, Evanson, Ill.
Dr. E. N. Douglass, Standish, Michigan

Dr. W. E. Reese, Toledo, Ohio Dr. R. O. McGill, for the past year Assistant Director of the Obstetrics Clinic and fellow in obstetrics, has resigned his position with the college. Dr. McGill plans to become associated with Dr. Sherman Meyer, formerly of Algona, Iowa, in the Virginia Ann Clinic and Hospital, Hot Springs, New Mexico.

Dr. McGill has served the Obstetrical Clinic unlately through-out his fellowship and provided excellent instruction in the practice of obstetrics. Before assuming his position with the college faculty Dr. McGill interned at the Des Moines General Hospital. He has since completed requirements for his surgery license.

Barton Nelson in New Guinea Lab

Barton Nelson, former student and claimant by Selective Service, is now stationed in a General Medical Laboratory in New Guinea. Reports interesting work with specialists in the fields of Tropical Medicine and Parasitology.

There is a touch of loneliness in his letter to Dr. Owen, and he would appreciate hearing from former classmates. His address: PFC Barton Nelson, 19th Med. Gen. Lab., APO 5467, c/o P. O. San Francisco.

Dr. Riggle Accepts Post in Urology

Dr. Kenneth B. Riggle, 1941 Des Moines Still College graduate, has taken a position with the faculty of the college in the Department of Urology. Dr. Riggle completed his internship at the Des Moines General Hospital, as well as a year's residency in surgery at that institution. Since completion of his postgraduate training, Dr. Riggle has been practicing in Des Moines. It is his intention to develop in the college a strong Department of Urology, for which purpose he will pursue graduate study as the college curriculum permits.

Births

Congratulations to Dr. and Mrs. John M. Schott, Columbus, Ohio, who recently became parents of a daughter.

Drs. and Mrs. E. F. Leininger are the parents of a daughter born October 12th at Des Moines General Hospital.

Dr. and Mrs. R. P. Perdue, of Flint, Michigan, announce the birth of a daughter, Karen Rae, October 2, 1944.

Osteopathy Without Limitation

Still College Club Announces Program

The Still College Club, under the direction of Dr. Earl Sargent, has for the basic level of its philosophy and planning, support of the Des Moines Still College of Osteopathy. The club consists of alumni and supporters of the college for one year following his graduation in 1938.

P.O.S.S.I.B.L.I.T.Y

(Continued from Page 1)

members of the profession look to us at osteopathic educational system, we find the college subject to a veritable barrage of criticism. That criticism is, in part, variegated. It is sometimes derogatory, sometimes hyperbolic, commending, blaming and praising, all at the same time. But no matter what the form, support of the Des Moines Still College of Osteopathy, membership in the club is provided on a $2.00 per year minimum basis. Support for the Still College Club means contribution toward the increased operating costs of the college. It is not intended to provide extensive additions to laboratory, clinical, or hospital facilities. It is intended to keep the Des Moines Still College operating on the same high educational plane it has achieved during the past several years.

Previous Appeal

Several articles, beginning February, 1944, appeared in the Log Book outlining the necessity for such an organization. Still College Club chapters are now being formed in the several states. Notable among these are Iowa, Michigan and Washington. Our goal by January 1st is a membership of 500.

Guarantee

A membership of 500 by January 1, 1945, will mean assurance to the college of the active support and interest of its alumni in educational progress. It will mean a mean of support to those whom we are currently approaching for financial support in building our clinical hospital, will be assured that the Alumni Club is behind the school. This alone will be one of the biggest selling points in the campaign among the alumni and also new students.

Before December 1st each alumni will be approached, personally or by letter, to join the Still College Club. Your best answer is a check to the limit of your ability. Do not wait to be asked. Join Now. You may send your check directly to Dr. Hugh Clark, President, Des Moines Still College of Osteopathy. SEND YOUR CHECK NOW.

Dr. Della B. Caldwell First Member of Still College Club

Dr. Della B. Caldwell, who recently celebrated her 40th year in practice, is the first member of the Still College Club. Dr. Caldwell is a graduate of this college in the Class of 1902. Each year her enthusiasm for osteopathic education has contributed to the advancement of osteopathic progress for he has no pride in professional advancement. He is completely committed to his therapeutic work and contented in his self centered existence.

The Cowbird

We also expect the individual who sits on the side lines watching the procession move forward but lending no help or support to the movement. When asked to join up, they replies with ifs and buts and when instead of a pledge. We are waiting to see if his enthusiasm can be successfully contributed will be too little and too late.

The Golden Eagle

The great majority of our progress was made by women who in student days and 3 years after graduation seized every educational oppor- tunities for self-improvement. They have—kept abreast of the times and are keenly cognizant of scientific and educational needs. They are grateful for the opportunity which was opened to them through education in osteopathy. They are conscious of the obligation which every alumni owes his alma mater.

Understanding the difficulties of the situation, and respect those who taught them their art and are charitable and con- siderate of the criticisms of others.

The Dodo Bird

In six years of experience in osteopathic education I have observed two forms of criticism which are increasingly prevalent. One stems from the fact that the criticism comes from the alumni who has never visited his college since the day of his graduation. He has not realized the changes, additions and improvements that have been made through the years. It was in his student days and he still carries the gripe of those days with him. To those alumni who attended Des Moines Still College of Osteopathy in the old building on Locust Street and have never visited the new one, I would say, give us a visit before passing critical comment.

To those graduates who attended college at the Sixth Avenue location but who have not returned recently—you will be amazed at the new modern laboratories and x-ray equipment.

Give us a visit.

Regardless of present deficiencies the evidence of improved warrant commendation and the fact that a former student who has just returned, certainly commend the college administration for the excellence of completed and proposed improvements.

The Stuffed Duck

Then there is the alumni who was entirely satisfied and still is with the status quo of his student days. Some how or other he got by the boards and achieved a degree of financial success which he is often too proud intro the snobsmanship of his own security. He has been immune to the advances of science and ignorant of the ever increasing possibilities for change and improvement. He joins no professional societies and attends no graduate courses. He feels faithful to his college and re-

fuses to contribute to any form of osteopathic progress for he has no pride in professional advancement. He is completely com-

The growth and relative excellence of osteopathic education be assured and the de-

Dr. Sargent Remodels And Enlarges Offices

Dr. Earl Sargent, President of the Des Moines Still College Alumni Association, has recently completed a most extensive reorganization of his office located at East 12th and University Avenue in Des Moines. Dr. Sargent has a suite of three treating rooms, laboratory and consultation room, and has added new equipment and apparatus. The new offices are adjacent to Dr. Sargent’s home and are an index to one of his competence and ambitions. It is Dr. Sargent’s plan to include a dentist in his suite following the war.

Dr. Sargent held a fellowship in the clinical office of the college for one year following his graduation in 1938.
THE LOG BOOK

MEMBERSHIP NOTES

Members of the Osteopathic Women's College Club sponsored a Hard Time Masquerade... of the College feel a pride in the support of the Des Moines Still College alumni and its able leader.

Treasurer: Gordon

NEW OFFICERS

The last meeting of the previous semester for the Atlas club was held September 26th at the Y. M. C. A. Our Noble, Skutt appointed the committee for this semester and the organization of the club now is seated.

A very much enjoyed evening was spent on September 26th at Youngker's Tea Room during the form of the Atlas Senior banquet. Mr. Dwight James was the interesting and inspiring speaker of the evening. Keys were presented to the two departing seniors, Dr. Lester Raub and Dr. J. Scott Heathe. We express our best wishes for success and happiness.

At a special meeting Dr. Robert Bachman and presented with the Atlas key. There is a certain quality of fellowship gone from each of our hearts with Dr. Bachman's leaving. Also at the meeting our fine brother, Dr. McGill, who has served so faithfully and well as Assistant Director of the Osteopathic Clinic, was presented with a gift! We wish continued success for Brother McGill.

NEWLY ELECTED OFFICERS

Recently elected officers of the P.S.G. fraternity are President: V. Claswing; Vice President, H. Eakle; Secretary L. Luidara; Treasurer, M. Morey; First Reader, H. Allhouse, Second Reader, G. Snyder, and W. Crotty; likewise, the same courtesy was extended to the past senior class. A large crowd attended the affair and all experienced a grand time. We wish our graduating brothers the best of luck.

Following the commencement exercise brothers J. Crane and Wm. Crotty were married. Congratulations.

Addition to the F.S.G. membership are brothers Robert Sedar and William Huls.

After returning from the P.S.G. vacation, from the most noted summer vacation, our fellows reopened their dinner table, 2141 Grand, "with food fit for a king." Sticks, which are always highly invited. Both lunch and dinner are served, try it--its good.

The aged and decrepit seniors, through a five inning rally surged ahead, sparked by first baseman Lonnie Facto (borrowed by the seniors because graduation was in the offing). The game was a treat to watch, scampering by Dr. Deltrich behind the pitcher and Dr. Clark on the bases they had to admit was at least a minor factor in victory. The juniors, however, were too tired to protest and they had their finals to take too. The seniors finally won 8 to 7.

FRESHMEN-SeniORS

Immediately after the victory over the juniors, the seniors were carried on to the field with the same high spirit and enthusiasm. The pitching for the fresmen was mostly of the nature of polishing off the fresh-

Fraternity Notes

was customary, in the fraternity, a paper on a scientific subject is prepared by each member for the subject of his own choice and presented at the regular dinner meetings; following this, the paper is added to the bulletin of the fraternity. Mr. Allhouse's paper is a fine addition to the many valuable educational talks which have been presented. To all, the welfare. Mr. Allhouse's paper is a fine addition to the many valuable educational talks which have been presented.

Honorbert Harris and Lester Raub, our graduating seniors, Psi Sigma Alpha held its senior banquet at Lowrie's Cafe, October 2nd. An inspiring after dinner talk was given by Dr. Deltrich, who also awarded the life certificates to both men. Herb is leaving by plane to inter in the State of Washington and Lester will inter in his home state of Pennsylvania. We hate to lose these two fine members, but hope they will keep us in mind wherever they may go.

G. S.

H.T.

Beta chapter of Iota Tan Sigma celebrates with its graduating seniors. This semester with an informal chicken dinner, self service style, at the Terrace Club, Sunday, Sept. 27th. Many of the seniors enjoyed an evening of dancing and technicolor motion pictures entertainment by our President, Brother Merrill. Mrs. E. Studebaker obliged by giving an impromptu talk on China and its position in the recent international developments.

Now that the new semester has again settled down into high gear, senior Bertram Brown reports a fine and growing practice. Beta Chapter sends congratulations.

To those who get your number through this article, we wish to announce that our own Dr. Bob Hatchitt in the Liberty Building, and practicing physicians. Those who were not too tired to eat report that it was bang-up good meal. A few of the super-athletes remained for dancing. The last couple collapsed and was carried off about nine o'clock.

Anatomy

Dr. Kimberly, freshman coach and timer for the foot races, was faced on the day following the race with various anatomical problems, chief among them was "Why is it that we have so many more muscles today than we had yesterday?"

Although the mathematics involved is somewhat complicated, the evolution of scoring among the seniors to be far in the lead. Re-formed teams were in a state of confusion. As was used, the seniors have the cup and will hold it until their classmates attract either more athletic women or fewer 4F's.

CANOE RACE

It was a half mile course as the crow flies, but there were no crows flying. Consequently the canoe race was less than three miles as a tilled fish would swim, won. This is one of the events of Still College which will be remembered in the history of Des Moines.

HORSESHOES

This sport was limited to class representatives who, in their younger days, had spent their mornings playing squash and their afternoons preparing for the favorite pastime of all college students, horseshoes. There is a little dispute as to the winner, but President Clark, inasmuch as he is editor of the Log Book, insisted that he had supervisory, although close competition was offered by Obstetrician Mc Gill, Ed Yogus, and E. Ayers. Wendell Taylor, Lester Raub and Walter E. Peterson assisted.

Pickle Supper

Scott Heatherington, as President of the Faculty-Council, had arranged a fine picnic supper which was attended by most of the student body and the following clinicians. No outside physicians. Those who were not too tired to eat report that it was bang-up good meal. A few of the super-athletes remained for dancing. The last couple collapsed and was carried off about nine o'clock.

Dr. Wright, Alumni Head, Visits College

Dr. Russell M. Wright, President of the National Alumni Association, returned to Des Moines October 8 and 9 for a brief and business visit. President Wright is highly pleased with the trend of advancement in educational procedures and facilities at the College, and reports high enthusiasm among alumni of his home state, Michigan.

Calling attention to the Cranial Technique course being offered at the College October 16 to November 5, Dr. Wright expressed the wish that further contributions of the college toward postgraduate study would be welcome. Officials of the College feel the pride in the support of the Des Moines Still College alumni and its able leader.
Living Endowment Fund At $50,000

Dr. J. P. Leonard Named To Hospital Committee

The following article is an excerpt from the Bulletin of the Michigan Society of Osteopathic Physicians & Surgeons.

Announcement was made September 21st by Governor Harry F. Kelly of the appointment of a committee of thirty-two persons, including Dr. J. Paul Leonard, treasurer of the Detroit Osteopathic Hospital, to direct a study of hospital needs and resources in Michigan.

The study, the first of three similar surveys projected as models for the nation, will be financed by the W. K. Kellogg Foundation, the Commonwealth Foundation, the National Foundation for Infantile Paralysis.

In appointing Dr. Leonard to this important survey committee, Governor Kelly said: “I should appreciate it very much if you could find time to serve as a member of this committee. You would be forming a truly valuable public service.”

Dr. Leonard accepted the appointment as a representative of the Michigan Association of Osteopathic Physicians and Surgeons. We quote from Dr. Leonard’s letter of acceptance to the Governor: “Such a study under the able direction which has been chosen, is a truly intelligent approach to a long-range program in the public interest. I shall be pleased to work in cooperation with Dr. Bachmeyer, Director of the Medical Library, Dr. Davis, the chairman, and other members of the committee, in the hope that I may make some helpful contribution.”

Dr. J. Philip Gurka Commended for Bravery

The following article is reprinted from the Evening Tribune—Lawrence, Massachusetts, Aug. 23, 1944.

Captain J. Philip Gurka, fighting in France with an infantry regiment in the crack First Division, has been awarded the Soldier’s Medal for gallantry a year ago during the Sicilian campaign. He is the son of Mrs. Rose Gurka and the late Lucas Gurka, 12 Bennington street.

The citation accompanying the medal, dated June 21, states it was awarded “For heroism in the vicinity of Randazzo, Sicily, 14 August, 1943. When exploding mines wounded a number of men advancing through the provincemined area, Captain Gurka, then first lieutenant, fearlessly proceeded to their assistance and promptly administered first aid. His gallant action and exemplary conduct, despite great personal danger, undoubtedly saved the lives of several of the wounded.”

Captain Gurka was well qualified to treat the wounded men since he is a graduate of the Des Moines Still College of Osteopathy and served his internship at the Des Moines, Iowa, General Hospital. A member of the college’s Officers Reserve, he received notification—that he had passed the state board examinations here in the same mail that instructed him to report for active military service with the First Division.

He took part in the initial invasions of North Africa and Sicily and then was moved to England, where his unit trained until it struck at the beachhead of Normandy with the first wave on D-Day.

Osteopathic Education For Veterans Authorized By Federal Government

Under provisions established by federal laws for the vocational rehabilitation and readjustment of ex-service men it is possible for every young man and woman who was under twenty-five years of age at the time of enlistment or induction and who has been honorably discharged after a minimum of ninety days service to obtain education or training in any vocation of his own choosing with tuition, fees, supplies and maintenance furnished by the federal government.

Three Already

Already three veterans are registered at Des Moines Still College as so called G. I. students and a number are completing their preosteopathic course at other colleges for entrance to their professional course.

Dr. Leonard, in his letter of acceptance, said the college has received many inquiries from service men concerning osteopathic education. The ever increasing number of returned service men there should be a veritable flood of inquiries providing every osteopathic physician familiarizes himself with the provisions of the federal program and interests competent veterans in osteopathic education.

Purposes of Laws

The laws establishing the provisions of the educational program for veterans are designed to serve two general purposes:

1. To rehabilitate the veteran who is vocationally handicapped by a service incurred disability and thereby “restore” the employability which has been lost by virtue of a handicap due to a disability incurred or aggravated by service.

2. To enable the veteran “whose education or training was impeded, delayed, interrupted or interfered with by reason of his entrance into service or who desires a refresher course” to continue such education or training.

Although the two programs are established by separate laws and are designed for different purposes they are both administered by the Veterans Administration which has regional offices in over fifty principle cities of the United States. (See Log Book, September.)

Michigan Alumni Set High Goal

Plan to Carry Campaign To State Immediately

During the meeting of the Michigan State Society of Osteopathic Physicians and Surgeons, Des Moines Still College alumni of that state, set a goal of $50,000 annual contribution to the College. At a luncheon meeting, Michigan alumni subscribed $10,000 with an average contribution of approximately $155 per man.

State Alumni officers (President, Donald Evans; Secretary, Howard A. Johnson; Treasurer, John W. Eddy) are carrying the campaign district by district throughout the state and report good success in their initial efforts. They are being aided in their state project by National Alumni Officers: Russell M. Wright, President, and C. C. Aspenson, Secretary, as well as by district chairmen.

Everyone is urged to subscribe immediately to this endeavor.

Purpose

The Living Endowment Program of the Des Moines Still College of Osteopathy, has as its purpose, support of operational expenses of the College under its program of balanced expansion. It will provide for:

1. Postgraduate program. It will be possible to present graduate and post-graduate work for D.O.’s who wish further training in the field of their choice at a reasonable cost.

2. Biographical. Evidence that the college is growing in size and that the profession is behind the college 100% will attract larger contributions.

3. Biographical. Evidence that the college is growing in size and that the profession is behind the college 100% will attract larger contributions. (Continued on Page 2)
Public Law No. 16, 78th Congress provides vocational rehabilitation for those veterans whose employability has been lost because of a service-connected disability. To be eligible for training under this law, the veteran:
1. Must have been in active military or naval service at any time since December 6, 1941 and during the present war.
2. Must have an honorable discharge.
3. Must have a permanent disability incurred in or aggravated by service.
4. Must be in need of vocational rehabilitation to overcome the handicap of such disability.

Under this law the veteran is not permitted free choice of the course he is to pursue but makes his selection in consultation with the vocational guidance officer of the Veterans Administration on the basis of previous education and experience and present ability, disability and desire. No course can exceed four years in length or extend beyond six years after termination of the present war.

"Maintenance and support during training and for two months after employability has been determined will be provided through increased pension. A single person will receive a pension at the rate of $80.00 per month, a married person $90.00 a month, with $5.00 a month for each dependent and an additional allotment in the amount of $10.00 a month for each dependent parent. Tuition, books, supplies and other incidentals are furnished in institutional training."

THE G. I. BILL

The Servicemen's Readjustment Act, Public Law 346, 78th Congress provides that the veteran, to be eligible for training, must have served in active military or naval service on or after September 16, 1940, for a period of 90 days or more (exclusive of certain Army Specialized or Navy College training programs) and must have received an honorable discharge. If his period of service is less than 90 days he must have received a medical discharge because of actual service incurred disability.

The veteran who thus qualifies and who was not over twenty-five years of age at the time of entrance into service is entitled to one year of training plus an additional period equal to the length of his service. Veterans over twenty-five years of age at the time of enlisting in the service of the United States are not eligible for training.

Under this law the veteran has practically free choice of the course of education and of any approved educational institution whether or not located in the state in which he resides. Tuition, fees and supplies (maximum $500 per school year) and maintenance allowance of $50 to $75 per month according to number of dependents.

Application

Des Moines Still College is approved by the Veterans Administration for the training of veterans under either law. Applications for vocational rehabilitation are filed on V. A. Form 1500 at the nearest regional office of the Veterans Administration. Applications for training under the G.I. Bill are filed on V. A. Form 1950, (a) with the regional office where the case file is located, (b) with the regional office in the state in which the educational institution is located, or (c) with the educational institution. The veteran may also be enrolled in college before making application under the G. I. Bill. He must make application not later than two years after discharge from service or the termination of the present war which ever is later.

These educational programs form an important phase of the reconversion program and provide a means of personal readjustment of the ex-service man. Veterans should be encouraged to avail themselves of this opportunity to prepare themselves for civilian employment. What greater contribution could the osteopathic physician render to the qualified veteran than to inform him of the opportunities which are available in the study and practice of osteopathy?

Fraternity Notes

AI0

The members of O.G.C. offer their sympathy to Mr. Harry Elmers on the death of his mother.

At our last meeting held November 12, Mr. William Stoler presented a lecture on the benefits of osteopathic management of pregnancy. An informal discussion followed.

A fraternity dinner is now being planned in honor of Mr. Stoler's coming graduation. We want to take this opportunity to express our thanks for his cooperation in the true spirit of fraternalism.

—R. L. D.

OMCC

Members of the O.M.C.C. enjoyed an interesting talk given by Dr. Paul E. Kimberly after the (Continued on Page 3)

Dr. S. J. Lillard Dies of Heart Attack

Dr. S. J. Lillard of Canton, Missouri, passed away at his home while convalescing from an attack of double pneumonia. Dr. Lillard's untimely death came at the age of 42 years.

He entered Kirksville College of Osteopathy in 1926 and still College in 1936. He was graduated in 1927 from the latter school.

Dr. Lillard has been an ex-

tensive practice in north-

east Missouri, and had, dur-

ing his 15 years of public

service, been an ardent sup-

porter of his college and

state and national osteo-

pathic associations. He was

county health phy-

sician. His passing is not only a great loss to the osteo-

pathic profession, but also to the people whom he served so faithfully.

Dr. T. B. Larrabee Passes Away

Dr. T. B. Larrabee, Web-

ster City, Iowa, alumnus of the Des Moines Still College of Osteopathy in the class of 1923, died October 1 at the age of 73.

Dr. Larrabee had prac-

ticed in Webster City more

than 30 years. He was one of

the first osteopathic phy-

sicians in the state of Iowa, and was one of the or-

ganizers of the Iowa Osteo-

pathic Association. He

served as its secretary more than 10 years.

Dr. Larrabee has been a

faithful alumnus of Des

Moines Still College, render-

ing service to his college as

well as his colleagues. For

many years he was a mem-

ber of the Corporate Board of the Des Moines Still Col-

lege.

The passing of Dr. Larra-

bee removes from the pro-

fession of osteopathy one of

its most stalwart servants

and hardest workers.

Living Endowment

(Continued from Page 1)

4. Diagnostic Clinic. It will enable the College to expand their present clinical services and provide a means of han-

dling referred patients which will add to the services of the College, not only to students in training, but also physicians in the field. Such a clinic will provide a source of income for maintenance of the clinical hospital and support of the academic pro-

gram outlined above.

5. Public Relations. When it becomes evident that Des Moines Still College is a going, growing, expanding institution, offering unparalleled services, not only to Des Moines, but to the midwest; public support and philanthropic funds will then be available.

We Cannot Ask the Public to

Build Our House

These are the reasons why the program of Living Endowment is being encouraged among the pro-

fession.

These are the reasons why the following names have already sub-

scribed to our program:

6. Clinical Hospital. The teach-

ing clinical hospital, the greatest unit efficiency of the college, will be built from other funds. It will be obvious, however, that it will be essential to develop all the previous plans in order to make the clinical hospital of maximum service.

Iowa

The State of Iowa has not been formally campaigned. Conse-

quently, the following list consists only of those who we knew about the program and insisted on getting in on the ground floor. We will be able to publish a much more exclusive list in the Decem-

ber issue.

regular business meeting on November 7th at the home of Mrs. Robert O. Fugan, Club Spon-

sor. The meeting was well attended by guests Mrs. M. D. Warner, Mrs. A. W. Dennis, Mrs. Paul E. and Mrs. Dean G. Hume. The evening was concluded

with a lovely luncheon served by Mrs. Fagan.

The meeting has been elected

a Club Historian and we anticipate

having a complete compilation of the club's history in the near future.

Anne L. McCarron, Des Moines Osteopathy

A meeting of Delta Omega was

held October 29 at the home of

Dr. and Mrs. Paul E. Kimberly.

A supper was served by Mrs.

Kimberly.

The main discussion of the meeting was the formulation of plans for a Sorority Dance to be
given before the Christmas holi-
day.

Dr. Frank W. Diener became a member of the

sorority.

— G. H.

Dr. Mary E. Golden was a guest of Beta Chapter on the evening of November 3rd at the

home of Brother and Mrs. Reich-

stadt. Dr. Golden, again as she

always has in the past, instilled

the boys present with the desire

and ambition to become a

thorough and efficient Osteo-

pathic Physician. She especially

stressed the importance of sup-

port for the State and National

Osteopathic Associations. In this

way only can one expect aid from

their organizations in time of dire need, she said.

Preceding the talk and technic

sessions by Dr. Golden the active

members held a business meeting laying plans for the first degree ceremony for its pledges.

Brother Taylor also gave a de-

tailed financial report at that

time.

Lunch was served by Mesdames Reichstadt and Griffith.

Living Endowment Shows Progress

Arthur Kenworthy Named Trustee of Still College

Arthur Kenworthy, president of Storey-Kenworthy Company, office supply firm in Des Moines, was elected a trustee of Des Moines Still College of Osteopathy at a meeting of the corporate board Thursday, November 30.

Mr. Kenworthy has been active in Des Moines Community Chest, Red Cross and war bond drives. He is a member of the Rotary Club, Masons and Plymouth Congregational Church in that city.

Other Still college trustees are Dr. Hugh Clark, president; Mrs. L. L. Facto, secretary; J. Roy Capps, Drs. E. F. Leininger, H. A. Graney, L. L. Facto, Harry Marshall and Robert B. Buchman.

Dr. Tilley Makes Annual Still College Inspection

Dr. R. McFarlane Tilley, Chairman of the Bureau of Professional Education and Colleges of The American Osteopathic Association spent Tuesday and Wednesday, December 3 and 6 inspecting Des Moines Still College of Osteopathy.

In an address before the student body December 6 he praised the institution on the marked improvement made in the last year in the laboratories, library and clinical facilities.

Osteopathic Research Clinic Organized

In St. Louis

The Drennan Clinic, a non-profit anatomical research institution, will be established and provided with a building in St. Louis County. A trust fund being raised by a group of business and professional persons interested in the work of Dr. G. F. Drennan, osteopathic orthopedic surgeon," says the St. Louis Post-Dispatch of December 13th. Dr. Drennan adds, "The Drennan Clinic is to be a teaching research clinic and is to be conducted as a non-profit institution. Provision will be made for clinic officials and de-

(Continued on Page 4)

Osteopathic Progress Fund Rolls On

Over 3,900 doctors of osteopathy have given once and many of them more than once to the support of osteopathic institutions. The college goals have not yet been met, but tremendous progress has been made. As our doctors begin to figure out their income taxes for the year 1944, they may find it possible to reduce these taxes further by giving additional sums to the college of their choice or to the Overall Fund. Make checks payable to the college chosen or to the American Osteopathic Association for the Overall Fund. Get them in before December 31.

Dr. R. Coker Pledges $500.00 to Foundation

Dr. R. Philip Coker, Panama City, Florida, this week pledged $500.00 for the Osteopathic Progress Fund for 1945. Dr. Coker recently took the graduate course in Cranial Technique at the Des Moines college.

Season's Greetings

Perhaps more aware of the great strides of progress made by the Des Moines Still College of Osteopathy during 1944 than any other group, we wish to extend to all our readers a note of appreciation and gratitude for the splendid support which has come to the college from the profession.

We may look at the accomplishments of the past year with justifiable pride and a keen sense of responsibility to the profession for our future. The generosity of the profession has enabled us to accomplish in the field of education tasks which could previously only have been dreamed of. We approached not only the financial assistance but the moral support and loyalty of our alumni as well. At the dawn of a new year we feel encouraged and resolved to continue to offer the best in osteopathic education.

We resolve a cooperation with our loyal constituents in planning and executing our program of balanced expansion and academic excellence. We are resolved to devote our every energy toward recognition in the educational world for our accomplishments, and recognition by the public of our service to humanity.

We express for all of our readers a hopeful wish for a Happy, Prosperous and Peaceful Year of 1945.

High School Health
A Critical Review

Over fourteen columns of the publication were devoted to the printing of complete direction for conducting exercise tests and grading. The sit-up, half-lever, leg-lift, forward-bend, and back-twist were briefly described, and 3,150 gradations were tabulated and printed to aid in accurately recording initial and subsequent grading of the students. The word "Strength," when used in this connection, must be interpreted in its broadest sense; apparently it is meant to include endurance, agility, coordination, cooperation, initiative, and follow directions. Progress is scaled on this basis.

Significance
The foregoing discussion is confusing. Several men spent many man-hours standardizing sit-ups and devising methods of grading. If a student is stupid, refractory, or physically handicapped so that he does his best and correctly, his initial grade is zero if he does 100 sit-ups correctly, what does it prove?

It should be obvious to any thinking physician that the value of such a program may be twofold. The first and least important is the spirit of competition which might be instilled in the students. The second is largely potential. It lies in the grading system if an intelligent effort is made by the instructor to determine the etiological factors behind the low grade brackets. In this case the services of a physician must be available to evaluate and correct factors responsible for subnormal grades.

Opportunity
This plan of testing and grading physical training classes is already in effect in several of the nation's largest high schools. Medication and physical training are becoming a part of the everyday routine. If the grading system is an intelligent effort it may be adopted in many others. Whether or not it is of the greatest possible value will depend largely upon the cooperation of the osteopathic physicians and osteopathic organizations. In any event, here is an opportunity for many young osteopathic physicians to perform an invaluable public service, and at the same time lay a firm foundation for future practice.

To know the coach of the local high school, and to care for his athletic team is good. To know the Phy. Ed. director is one step further toward extending your service in the community.

L. A. DETTRICK, D.O.

THE FROG
Biological Paragon

Concepts of the science of life vary as widely as the blind men's definitions of the elephant, approached from various sides. The trunk reminded one of a snake, another held the tail which felt like a rope, a third was reminded of a tree as he felt a sturdy leg. Biology may at the same time suggest worm, bugs, flowers and butterflies (the conventional comic strip professor chafing them with a net) or perhaps the frog. In spite of the convincing arguments of biological kinship, and organic evolution, seldom does one think of man as a symbol of things biological.

The Approach
The frog rates highly as an object of biological form and function in biology at all levels of education, from grade school to research specialist. Many are inclined to spur the simple creature presented to them for dissection or experimentation, and the cold shudders and screams that have been registered by enterprising coeds in his presence would certainly reach somewhere if placed end to end. Many a beginning class in medicine finds the student curiously working when he enters his first course in physiology, only to discover that the physiology of man is no more sacred than the physiology of frogs. Half of the experiments in laboratory manuals in medical (E. G. Goodenough) physiology are based on the frog; the other half involve warm-blooded vertebrates. The first is selected because it best illustrates a principle of the functions of the anterior and posterior roots of the spinal nerve; and on a piece of paper with a couple of inches long, Helmholtz measured the velocity of the nerve impulse, a scientist who died many years before his great master J. Muller declared to be impossible of solution.

Joseph Lister made early observations on its pigment cells, and researches on the papillae of its tongue. Its tissues, cornea and otherwise, have been ground down and served for interested laboratories. In medicine and biology at all levels are associated with early studies, regarding inflammation has been conducted. And so on...

More Contributions
The list of contributions to biology by way of the frog has been lengthy. Much has been learned in fields of experimental embryology and tissue culture involving frog tissue transplants, regenerations. Studies of capillary contractility have placed a greater emphasis than ever before on the role of the capillary network, as seen by these minute circulators. In frogs Richards and his fellows verified the filtration theory of the glomerular functions with re-absorption in the tubules. Studies of cilia, the movements of the cilia, and intestinal absorption are among the more common laboratory studies demonstrated in the frog. Finally, a study of purines in man, more sensitive and more reliable than the Aschel-Zondek test is made with frogs (Xenopus laevis), a fitting climax to a history rich in service to mankind. But even more significant findings may reap our gratitude. Salute the frog!

TWENTY FROGGIES WENT TO SCHOOL

Twenty frogs went to school
(The box said "RUSH! LIFE FROGS! KEEP COOL!")

Twenty coats of brown and green,
Twenty wets all white and clean.
We must be on time, they said,
Late to lab, then late to play.
(That is how we keep the rules,
Where the frogs went to school).

THE LOG BOOK

Dr. R. H. Singleton
Sponsors Ninth Annual Essay Prize Contest

The American Osteopathic Association has recently announced that for the ninth consecutive year it is sponsoring an essay contest for osteopathic students. This contest is known as the "Undergraduate Essay Prize Contest," and is open to all undergraduate students in the approved osteopathic colleges. The subject for this year is "The Approach to the Osteopathic Manipulation in Prenatal Care."

A cash prize of $25.00 will be awarded to the author of the best paper submitted in each college in which there are four or more contestants. If at least 4 colleges have a minimum of 4 contestants each, a grand prize of an additional $25.00 will be awarded to the author of the paper adjudged to be the best among the prize winning papers from the competing colleges.

Manuscripts should be typewritten, double-spaced, on one side of the paper with liberal margins and no more than 2000 words in length. All references should be listed. Manuscripts must be submitted with a number instead of a name and accompanied by a sealed envelope with similar number containing the name, address, and college of the contestant.

Committee
The committee for Des Moines will consist of Dr. D. M. Wariner, L. L. Facto, Harry Berquast and Carl Waterbury. All papers must be submitted to this committee by April 15, 1945, as the winning manuscript must be forwarded to the central office of the A. O. A. not later than April 15, 1945.

A very useful and valued phase of the physicians' armamentarium is the ability to write technical papers. Dr. Singleton's purpose in sponsoring this contest is to encourage the development of that ability and to promote original investigation and thought among osteopathic students. It is his desire that as many undergraduates as possible will participate.

Notice of Opening
For Physician

Mrs. J. George Heillegan writing in behalf of her husband, Dr. R. H. Singleton, Coldwater, Michigan, points out that Dr. Heillegan is in urgent need of a doctor to assume his office as his personal practice is well established and Dr. Heillegan has maintained for many years an extensive practice in the area. Doctor Heillegen has been in ill health since March 1944, and has spent several weeks in the Battle Creek Osteopathic Hospital. Those interested should apply to Dr. Heillegen directly, (62 Marshall Street, Coldwater, Michigan.)
THE FROG

(Continued from Page 2)

They had seen the others bold,
"Off to college!" (they were told). "Education must appeal!"
(None could ever truth reveal).
So they gaily croaked and sang—
How the echo rang and rang—
Back upon that fateful day,
Twenty froggies went away!

Then into the lab, they went,
Had their heads down sharply bent.
Swish! The needle went in deep—
A feeble jerk, a husky peep.
Now they line the garbage can,
Twenty corpses dead for man.
Mixed with sawdust, chalk, and mud—
Twenty vats all stained with blood!

OUR FRIEND THE FROG

His mouth is but the advent
Of our most objective search.
His muscles then intrigue us
With a sudden pull or lurch.
His heart and brain both receive
A brief investigation,
And then his circulation scheme
Gets due consideration.

We pith him and we probe him
Most urgently, 'fore and aft'.
We fill a hypodermic luer—
"Here lies your friend the frog!"
We gouge his eyes and place one
In a bath of adrenin.
We paint his leg with alkali,
"He gets pituitrin."

With his pupil widely opened
And his color changed to dark,
His glands all readjusted—
"His life is but a spark.
All the frogs who died before him
Lie around with jaws ajar
As if to say in mockery,
"Here lies your friend the frog!"

—R. DEAN SCHICK.
The Dean's Letter

Dear Alumnus:

Nearly four months have passed since I joined the staff of your Alma Mater as your dean. A part of my time has been engaged in writing a new college catalog. It is now in the hands of the printer and will be ready for distribution in the near future. Our list of prospective students has been sharply curtailed by the large number of men who have entered the armed forces and by others who have moved without notice of change in address to enter various phases of war work. It is not feasible to send catalogs to their former addresses. Therefore, if you have previously referred a prospective student who should receive a catalog and whose address has been changed, will you please let me know the new address. Also include the names of any other desirable young men or women who are interested in studying osteopathy.

It is not enough to just send names and addresses. You should interview each prospect to ascertain his or her ability and to establish an active interest in the mind of the prospect so that the college literature will be received with a degree of expectancy. Otherwise the college spends good money to write letters and mail literature which all too often goes directly into the waste basket.

Dean's letters and college catalogs can list requirements and courses and faculty and fees; they can answer questions and give information; but it is the professional advice of vocational guidance counselors and the friendly interest, enthusiasm and example of physicians that turns prospects into osteopathic students.

In referring the names of prospects, give as much information as possible concerning personality, age, financial and scholastic ability, and present scholastic status. Is the prospect acquainted with osteopathy? Does he or she need advice concerning pre-professional studies? Such information enables the dean to make a more personal contact.

Keep in mind that with present pre-professional requirements, it is essential that the student definitely plan his pre-professional course to include the required work in English, Biology, Physics, Chemistry, else he may waste a semester or a year of preparatory effort. This also emphasizes the importance of establishing an interest in high school students.

At the present time, many young men and women are returning from service in the armed forces. Practically every one of them is entitled to education and training under either the Vocational Rehabilitation Act or the G. I. Bill. Many of these veterans already have college credit and are qualified for or lack only a portion of the pre-professional entrance into D. M. S. C. O. Most of them are seeking a vocation in medicine as well as osteopathy.

It is now in the hands of the veteran as well as to your college in acquainting him with the possibilities which lie in an osteopathic career.

I trust that our combined efforts will result in enrolling a good class at D. M. S. C. O. next February-twentieth.

Cordially,

M. D. Warner, Dean

College Designated For Cranial Research

Dr. W. G. Sutherland, of St. Peter, Minnesota, in a bulletin recently issued, summarized the relationship of the cranial concept to osteopathy as follows:

"The Academy of Applied Osteopathy, incorporated, and affiliated with the American Osteopathic Association, appointed a cranial committee to cooperate in the advancement of the cranial concept. The committee consisting of Dr. Richard E. Maegerle, W. S. Wisconsin, chairman; Dr. Rebecce Cornew, Lippincott, Morristown, New Jersey; Dr. Kenneth E. Little, Altion, Illinois; Dr. Helen A. Rhodewo, Missouri, and Dr. S. Raleigh S. McVicker, The Dalles, Oregon, a sub-committee, to be known as the research committee, has been chosen to carry on research activity at the Des Moines Still College of Osteopathy; Dr. Raleigh S. McVicker, The Dalles, Oregon, chairman; Dr. W. A. Newland, Seattle, Washington, secretary - treasurer, and Dr. Della B. Caldwell, Des Moines, Iowa."

NOTICE

If and when you change your address, please notify the Log Book promptly.
